The main thrust of his Lecture was that the development is too important a matter could be left to bureaucrats and Government. He further pointed out that today we have to tackle intricate social and Economic Problems. These problems cannot be tackled by Government alone. He focused that people must be empowered not only to demand results from the Government but also to actively participate in the attainment of the result.

The habit of the people always looking to the Government for a solution to every problem must be removed and a new democratic attitude fully participating in the Government efforts. These calls for a new partnership between the government and the people. In agreement with the true spirit of democracy. This again demands a better work culture a superior civil culture, strong discipline and a radical shift in the attitude of citizenry from rights to duties.

If the republic is to be rebuilt it is not only going to be the work of leaders but also the work of citizens. In this content citizens actions become necessary. Individuals associations in addition to working for particular cause can also educate and enlighten the new citizenship traits. This can do by converting their place as citizens centre, where people of that locality can come and meet deliberate discuss and decide on issues concerning them. These centres could function as information centres, guidance centres, action centres, monitoring center, these kind of activities

of the citizens in the centres will develop the cooperative spirit and to spread the feeling of fraternity certainly this exercise may be the starting point to rebuild the Republic through Public.
