CHEMCON-2010

The Indian Chemical Engineering Congress CHEMCON-2010, the 63rd Annual session of Indian Institute of Chemical Engineers is jointly organized by the Annamalai-Neyveli Regional Centre of Indian Institute of Chemical Engineers and the Department of Chemical Engineering, Annamalai University, during 27 to 29.12.2010.

The Indian Institute of Chemical Engineers(IICChE) is the premier professional organization providing a platform to Indian Chemical and allied industries, Academia and Research for continuing education, Professional excellence networking. It helps us to provide a forum for substantial discussion on the emerging technologies and methodologies being developed to overcome the challenge that exist in all the areas of Chemical Engineering.

CHEMCON-2010 is feature a host of events, which will include memorial and plenary lectures, seminars, symposia, panel discussions, exhibitions and cultural events.

The theme of the conference is "Emergence of Bio-technology in Process Industries- A Sustainable Growth & Clean world".

The production of chemicals through biotechnology has become essential to make the process economically viable. Biotechnology research is facing an upward trend and is very useful in solving energy crisis and in the production of various bioproducts and pharmaceuticals. "Biotechnology is Bharath Tomorrow" is the most spelt slogan everywhere. Natural renewable resources constitute an interesting and reliable set of feed stocks. Biofuels made directly from agricultural crops are becoming increasingly competitive with conventional fuels. In the current scenario of Carbon emission and Global warming, the conference aims to address these burning issues. In making the process industries more sustainable and to save the environment from disasters the Conversion of the conventional processes into bio-technological processes using new and renewable feedstock becomes inevitable.

The CHEMCON-2010 is organized for three days from 27 to 29.12.2010. The schedule is given below:

C) Future Prospects

community cardiac health check up unit

Rajah Muthiah Heart Foundation is easily accessible and in view of better health care facilities available in this city, if attracts a large number of sick persons the surrounding states. Heart disease is sometimes called the "silent killer." This is because many people do not have the obvious symptoms of heart trouble until they are having a real heart attack. Heart disease is the number one cause of death for men and women.

"Heart disease and stroke mortality continue to decline, in both the white and black populations; however the excess mortality for blacks as compared to whites has increased".

The risk factors include particular biologic, lifestyle, and social conditions were associated with increased risk for disease developed out of CVD epidemiology. In addition to the major risk factors (i.e., high blood pressure, high blood cholesterol, and smoking), other Stroke risk factors include; cardiac disease, atrial fibrillation, systolic hypertension, left ventricular hypertrophy, diabetes and cigarette smoking, as well as previous stroke or transient ischemic episodes. Reduction of stroke deaths is dependant on detection and management of hypertension and its control by changes in lifestyle and by supportive medication with long-term management and follow-up. Where stroke mortality is high, public health and medical services need to cooperate in developing education, screening and management programs to reduce risk factors.

It is unlikely that the health care facilities in the surrounding states will improve by and therefore, while planning the health requirement of Rajah Muthiah Heart Foundation, Annamalai nagar. The people who all are need to travel from so long and it take time for them to reach for treatment and care. In such a case, Rajah Muthiah Heart Foundation will set up a health check up unit to provide Primary Health Care Services are provided through a chain of dispensaries, Community health centre.
