The department and the placement cell of the university are continuously making efforts for the students to acquire the requisite skills. The experts from diverse fields are invited in order to develop personality development, generate the soft skills, building up of self confidence and develop the employment skills amongst the students. In the academic year 2021-20022, 12 students from our Department were placed in IT companies through on-campus recruitment drives as follows:

Company Name	No. of students
PENTAGON SPACE PVT LTD, Chennai	6
AZENTIO SOFTWARE PVT LTD, Chennai	6

**Sports Day** is a day dedicated for praising and rewarding talented students who participate in intramural sports on campus. Our department arranged a great sports event at University Pavilion on 19 & 20.04.22. In which all the students from our department were participated with great enthusiasm and manifested their athletic skills with an unimpeachable finesse.

Our department has organized a Mini Hackathon contest for students to test their coding skills. Nearly 60 students participated and showed their talent. This event indeed helped the participants to learn new technologies and to bring up their idea in a better precise manner with the help of the comments given by the staff members.

Google Forms is a free online tool from Google which allows users to create forms, surveys, and quizzes. Our staff members use Google forms to assess their students gauge pre-existing knowledge. Our faculty members created Google forms with objective type questions in the courses they had handled in previous semesters, and it was also an additional support to the students in obtaining placement.

Numerous literary events have been organized such as eloquution competition, essay writing competition, drawing competition, lectures and debates for the personality development of our students. Theses competitions were conducted from 18 to 27.04.2022 without interrupting the regular classes.

The student creative visual board (4'×6') has been placed closer to the HOD room, and our students regularly exhibit new advancements and innovations in the field computer and information science. The content is printed in A4 format and verified by the staff members.

Two smart classrooms have been established in our department in this academic year. Instead of writing on the board, the teacher uses PowerPoint presentations, Word documents, photos, videos, and audios. Softcopy of these resources are distributed to students as learning materials.

As part of the development of research activities, researchers were recommended to formulate and share with each other a conceptual framework in their research field. They are evaluated by the senior staff members of the department. They gave their best suggestions and shared their research experiences. This will be a great motivation for the researchers.

On 12.05.2022, our Department's Computer and Information Science Association (CISA) was established by our Honourable Vice Chancellor. In this event, The Registrar gave presidential address. Association activities include special lectures, placement

assistance, personality development, group discussions, staff-student interaction and more.

Mr.B.Sureshkumar, Assistant Professor/Programmer was deputed to administer the technical frame work for the smooth processing of TamilNadu Engineering Admissions (TNEA) counselling conducted by the Directorate of Technical Education, Chennai during the period of July 2021 to June 2022.

#### Policy of prohibiting sexual harassment

One of the core objectives of Annamalai University (here in after referred to as “University”) is to ensure gender equality and gender justice through the University interventions and practices. In keeping with this principle, it is important to ensure a climate free from discrimination and harassment, with a particular focus on prevention of sexual harassment. Sexual harassment of individuals occurring in the place of work or study or in other settings in which they may find themselves in connection with their association with the University is unlawful and will not be tolerated by the University. Further, any retaliation against an individual who has complained about sexual harassment complaint is similarly unacceptable. To achieve this goal, conduct that is described as “Sexual harassment” in this policy will not be tolerated and a procedure is provided by which inappropriate conduct will be dealt with, if encountered among employees / students.

The University will also take all the appropriate steps necessary to protect individuals from retaliation. Such steps include:

- Action to stop retaliatory behavior
- Providing required security measures
- Counseling help to complainant and accused.

The University takes allegations of sexual harassment seriously, and will respond promptly to complaints of sexual harassment and where it is determined that such inappropriate conduct has occurred, prompt and appropriate corrective action as is necessary, including disciplinary action, will be taken.

While this policy sets forth the goal of the University of promoting a study or workplace that is free of sexual harassment, the policy is not designed or intended to limit the authority of the University to discipline or take remedial action for conduct which the University deems unacceptable, regardless of whether that conduct satisfies the definition of sexual harassment. The committee organises an awareness drive among the staff and students of the University to impart knowledge on sexual harassment at work place, the legal aspects and rights. The drive also aims at throwing light on sexual hygiene and effects of nutrition on adolescence.

#### Independent office and infrastructure

The Complaints committee against sexual harassment at workplace (CCSH) have a designated office with a board outside displaying details of the CCSH. An independent designated separate office with full facilities such as office tables and chairs are available for CCSH in the ground floor of Tech park building of Annamalai University for effective functioning of the committee. The Director is responsible for planning, development and implementation of various technology mission mode programmes and other technical activities to be implemented by CIAR.

The main objectives of this Centre are:

- I. Conduct world class research to develop low cost, low polluting and high efficiency Technologies.
- II. Conduct the research to develop alternative fuels, hybrid vehicles, Vehicles based on solar and cell technologies.
- III. To plan, coordinate and execute integrated R&D Programmes, involving interested institutions, R&D organizations and industries at National level.
- IV. To do the consultancy works with automobile companies and industries.
- V. To design and offer customized Diploma programs, PG Diploma programs, PG Programmes to the working professionals through on campus and off campus mode.
- VI. Presently Dr.M. Loganathan, Professor in the Department of Mechanical Engineering is the director for this centre. In addition, three teaching faculty and five supporting staff members are working in the centre. This centre having the following facilities
  1. Biodiesel preparation and fuel properties testing centre
  2. Multicylinder diesel engine test rig (Ashok Leyland) with ECU and loading device
  3. Single cylinder diesel engine test rig with eddy current dynamometer.
  4. Hydrogen engine with hydrogen flow line.
  5. four stroke single cylinder (TVS) petrol engine
  6. Biodiesel operated single cylinder and multicylinder diesel engine
  7. Two stroke engine test rig with electronic manifold and direct fuel injection system .

Keynote Address: Mr. Sadagoban Krishnan, Senior vice president, Engine Development, Ashok Leyland, Chennai

**The one week National level short term training programme on “Biofuels and fuel cell – fundamentals and applications” was held by CIAR during December 3-9, 2018. The participants from various institutions, companies and Universities from different part of India attended the programme. Various experts from industries, academia delivered the lecture. The keynote address given by Mr. Sadagoban Krishnan, senior vice president, Engine Development, Ashok Leyland, Chennai.**

**The following work is done in the centre**

- 1. Biodiesel is prepared from different edible and non edible oil**
- 2. physical properties of the different fuels are determined**
- 3. Chemical kinetics of hydrogen and biodiesel is analysed by "COMSOL" multi physics software.**
- 4. The performance and emission test are carried out in hydrogen engine, biodiesel engine, four stroke and two stroke petrol engine.**
- 5. Engine combustion analysis are done by data acquisition system**
- 6. Calibration of exhaust gas analyser by standard calibration gas**
- 7. Five Scopus research papers are published from the above research work**

**This year The engine was modified to run in the dual fuel mode like diesel and biodiesel. in addition the EGR also fitted in the exhaust pipe side to reduce the exhaust emission levels. The students starts doing projects in this engine and other facility. I hope that in coming year we will publish high impact journal paper. The available facilities used presently. In addition we need equipment like high capacity dynamometer**

to match this engine. This may be purchased in coming year if we get project fund from funding agencies. we hope that our University will allot fund for above research centre in coming year.
