

Annamalai University

(Accredited with 'A' Grade by NAAC)

Faculty of Science

Department of Computer and Information Science

**M.Sc. INFORMATION TECHNOLOGY
(5-Year)**

Programme Code: SCIS52

Regulations, Curricula and Syllabi

(2019-20)

Annamalai University

Faculty of Science

DEPARTMENT OF COMPUTER AND INFORMATION SCIENCE

M.Sc. INFORMATION TECHNOLOGY

Programme Code: SCIS52

These rules and regulations shall govern the Five year post graduate studies leading to the award of degree of **Master of Science in Information Technology** in the Faculty of Science. These academic Regulations shall be called "**Annamalai University, Faculty of Science, Five year M.Sc. Information Technology (Integrated) Regulations 2019**". They shall come into force with effect from the academic year 2019 – 2020.

1. Definitions and Nomenclature

- 1.1 **University** refers to Annamalai University.
- 1.2 **Department** means any of the academic departments and academic centers at the University.
- 1.3 **Discipline** refers to the specialization or branch of knowledge taught and researched in higher education. For example, Computer Science is a discipline in the Mathematical Sciences, while Economics is a discipline in Social Sciences.
- 1.4 **Programme** encompasses the combination of courses and/or requirements leading to a Degree. For example, M.Sc., M.A.
- 1.5 **Course** is an individual subject in a programme. Each course may consist of Lectures/ Laboratory /Seminar/Project work/viva-voce etc. Each course has a course title and is identified by a course code.
- 1.6 **Curriculum** encompasses the totality of student experiences that occur during the educational process.
- 1.7 **Syllabus** is an academic document that contains the complete information about an academic programme and defines responsibilities and outcomes. This includes course information, course objectives, policies, evaluation, grading, learning resources and course calendar.
- 1.8 **Academic Year** refers to the annual period of sessions of the University that comprises two consecutive semesters.
- 1.9 **Semester** is a half-year term that lasts for a minimum duration of 90 days.
- 1.10 **Choice Based Credit System:** A mode of learning in higher education that enables a student to have the freedom to select his/her own choice of elective courses across various disciplines for completing the Degree programme.
- 1.11 **Core Course** is mandatory and an essential requirement to qualify for the Degree.
- 1.12 **Elective Course** is a course that a student can choose from a range of alternatives.
- 1.13 **Language Course** is a mandatory course includes Tamil/Hindi/French and English.
- 1.14 **Value-added Courses** are optional courses that complement the students' knowledge and skills and enhance their employability.
- 1.15 **Credit** refers to the quantum of course work in terms of number of class hours in a semester required for a programme. The credit value reflects the content and duration of a particular course in the curriculum.

- 1.16 **Credit Hour** refers to the number of class hours per week required for a course in a semester. It is used to calculate the credit value of a particular course.
- 1.17 **Programme Outcomes** (POs) are statements that describe crucial and essential knowledge, skills and attitudes that students are expected to achieve and can reliably manifest at the end of a programme.
- 1.18 **Programme Specific Outcomes** (PSOs) are statements that list what the graduate of a specific programme should be able to do at the end of the programme.
- 1.19 **Learning Objectives** are statements that define the expected goal of a course in **Course Objectives** in terms of demonstrable skills or knowledge that will be acquired by a student.
- 1.20 **Course Outcomes** (COs) are statements that describe what students should be able to achieve/demonstrate at the end of a course. They allow follow-up and measurement of learning objectives.
- 1.21 **Grade Point Average** (GPA) is the average of the grades acquired in various courses that a student has taken in a semester. The formula for computing GPA is given in section 11.3
- 1.22 **Cumulative Grade Point Average** (CGPA) is a measure of overall cumulative performance of a student over all the semesters. Calculation of CGPA is given in section 11.4.
- 1.23 **Letter Grade** is an index of the performance of a student in a particular course. Grades are denoted by the letters S, A, B, C, D, E, RA, and W.

2. **Programme Offered and Eligibility Criteria:**

The Department of Computer and Information Science offers a M.Sc. Information Technology five year programme. A pass in H.S.E. (10+2 level) OR Equivalent thereto under academic stream with Mathematics as one of the subjects.

- 2.1 In the case of SC/ST and differently abled candidates, a pass in minimum qualification for the above programme.

- 3. **Reservation Policy:** Admission to the various programmes will be strictly based on the reservation policy of the Government of Tamil Nadu.

4. **Programme Duration**

- 4.1 The Five Year Master's Programme consists of five academic years.
- 4.2 Each academic year is divided into two semesters, the first being from July to November and the second from December to April.
- 4.3 Each semester will have 90 working days (18 weeks).

5. **Programme Structure**

- 5.1 The Five Year Master's Programme consists of Language courses, Allied courses, Core Courses, Elective Courses (Departmental & Interdepartmental), and Project.

5.2 **Language Courses**

- 5.2.1 Each student shall take two languages of four courses each, one in each semester for the first two years of the programme.
- 5.2.2 Language-I shall be Tamil or another language such as Hindi or French.
- 5.2.3 Language-II shall be English.

5.3 **Core courses**

- 5.3.1 These are a set of compulsory courses essential for each programme.

5.3.2 The core courses include both Theory (Core Theory) and Practical (Core Practical) courses.

5.4 **Allied courses**

5.4.1 Each student shall take courses in mathematics discipline allied to the main subjects of the programme in the first four semesters..

5.5 **Elective courses**

5.5.1 Departmental Electives (DEs) are the Electives that students can choose from a range of Electives offered within the Department.

5.5.2 Interdepartmental Electives (IDEs) are Electives that students can choose from amongst the courses offered by other departments of the same faculty as well as by the departments of other faculties. IDEs are listed in the Handbook available in the University Website.

5.6 **Soft Skills**

5.6.1 Soft Skills are intended to enable students to acquire attributes that enhance their performance and achieve their goals with complementing hard skills.

5.6.2 Soft Skills include communication skills, computer skills among others.

5.7 **Value Education**

5.7.1 All students shall take a course on Value Education that includes human values, sustainable development, gender equity, ethics and human right.

5.7.2 **Value Education** is categorized as **Non-Credit Compulsory Course**.

5.8 **Experiential Learning**

5.8.1 Experiential learning provides opportunities to students to connect principles of the discipline with real-life situations.

5.8.2 In-plant training/field trips/internships/industrial visits fall under this category.

5.8.3 Experiential learning is categorized as Core.

5.9 **Extension Activities**

5.9.1 It is mandatory for every student to participate in extension activities.

5.9.2 All the students shall enrol under NSS/NCC/YRC/RRC or any other Service organisation in the University.

5.9.3 Students shall put in a minimum attendance of 40 hours in a year duly certified by the Programme Coordinator.

5.9.4 Extension activities shall be conducted outside the class hours

5.9.5 Extension activity is categorized as **Non-Credit Compulsory Course**

5.10 **Project**

5.10.1 Each student shall undertake a Project and submit a dissertation as per guidelines in the final semester.

5.10.2 The Head of the Department shall assign a Research Supervisor to the student.

5.10.3 The Research Supervisor shall assign a topic for research and monitor the progress of the student periodically.

5.10.4 Students who wish to undertake project work in recognized institutions/industry shall obtain prior permission from the Department. The Research Supervisor will be from the host institute.

5.11 **Value added Courses (VACs)**

- 5.11.1 Students may also opt to take Value added Courses beyond the minimum credits required for award of the Degree. VACs are outside the normal credit paradigm.
- 5.11.2 These courses impart employable and life skills. VACs are listed in the University website.
- 5.11.3 Each VAC carries 2 credits with 30 hours of instruction. Classes for a VAC are conducted beyond the regular class hours and preferably in the in the VIII and IX Semester.

5.12 Online Courses

- 5.12.1 The Heads of Departments shall facilitate enrolment of students in Massive Open Online Courses (MOOCs) platform such as SWAYAM to provide academic flexibility and enhance the academic career of students.
- 5.12.2 Students who successfully complete a course in the MOOCs platform shall be exempted from one elective course of the programme.

- 5.13 **Credit Distribution:** The credit distribution is organized as follows:

	Credits
Semester I to VI	
Language-I (Tamil or any other Language)	12
Language-II (English)	12
Core Courses	94
Allied-I (1 st Year- SEM I & II)	10
Allied-II (2 nd Year- SEM III & IV)	10
Electives	09
Environmental studies (UGC mandated)	03
Mini Project	02
Experiential learning	02*
Extension activities	02*
Total Credits (Semester I to VI)	152
Semester VII to X	
Core Courses	68
Electives (DE)	12
Electives (IDE)	03
Project	08
Constitution of India	02*
Total Credits (Semester VII to X)	91
Total Credits (Semester I to X)	243

5.14 Credit Assignment

Each course is assigned credits and credit hours on the following basis:

- 1 Credit is defined as,
- 1 Lecture period of one hour duration per week over a semester
- 1 Tutorial period of one hour duration per week over a semester
- 1 Practical/Project period of two hours duration per week over a semester.

6 Attendance

- 6.1 Each faculty handling a course shall be responsible for the maintenance of Attendance and Assessment Record for candidates who have registered for the course.
- 6.2 The Record shall contain details of the students' attendance, marks obtained in the Continuous Internal Assessment (CIA) Tests, Assignments and Seminars. In addition the Record shall also contain the organization of lesson plan of the Course teacher.
- 6.3 The record shall be submitted to the Head of the Department and Dean once a month for monitoring the attendance and syllabus coverage.
- 6.4 At the end of the semester, the record shall be placed in safe custody for any future verification.
- 6.5 The Course teacher shall intimate to the Head of the Department at least seven calendar days before the last instruction day in the semester about the attendance particulars of all students.
- 6.6 Each student shall have a minimum of 75% attendance in all the courses of the particular semester failing which he or she will not be permitted to write the End-Semester Examination. The student has to redo the semester in the next year.
- 6.7 Relaxation of attendance requirement up to 10% may be granted for valid reasons such as illness, representing the University in extracurricular activities and participation in NCC/NSS/YRC/RRC.

7 Mentor-Mentee System

- 7.1 To help the students in planning their course of study and for general advice on the academic programme, the Head of the Department will attach certain number of students to a member of the faculty who shall function as a Mentor throughout their period of study.
- 7.2 The Mentors will guide their mentees with the curriculum, monitor their progress, and provide intellectual and emotional support.
- 7.3 The Mentors shall also help their mentees to choose appropriate electives and value-added courses, apply for scholarships, undertake projects, prepare for competitive examinations such as NET/SET, GATE etc., attend campus interviews and participate in extracurricular activities.

8 Examinations

- 8.1 The examination system of the University is designed to systematically test the student's progress in class, laboratory and field work through Continuous Internal Assessment (CIA) Tests and End-Semester Examination (ESE).
- 8.2 There will be two CIA Tests and one ESE in each semester.
- 8.3 The Question Papers will be framed to test different levels of learning based on Bloom's taxonomy viz. Knowledge, Comprehension, Application, Analysis, Synthesis and Evaluation/Creativity.

8.4 Continuous Internal Assessment Tests

- 8.4.1 The CIA Tests shall be a combination of a variety of tools such as class tests, assignments and seminars. This requires an element of openness.
- 8.4.2 The students are to be informed in advance about the assessment procedures.
- 8.4.3 The question paper will be set by the respective faculty using Blooms Taxonomy.
- 8.4.4 CIA Tests will be for one or two hours duration depending on the quantum of syllabus.
- 8.4.5 A student cannot repeat the CIA Test-I and CIA Test-II. However, if for any valid reason, the student is unable to attend the test, the prerogative of arranging a special test lies with the teacher in consultation with the Head of the Department.
- 8.4.6 For the CIA Tests, the assessment will be done by the Course teacher

8.5 End Semester Examinations (ESE)

- 8.5.1 The ESE for the first and third semester will be conducted in November and for the second and fourth semester in May.
- 8.6 Candidates who failed in any course will be permitted to reappear in failed course in the subsequent examinations.
- 8.7 The ESE will be of three hours duration and will cover the entire syllabus of the course.

9 Evaluation

9.1 Marks Distribution

- 9.1.1 For each course, the Theory and Practical shall be evaluated for a maximum of 100 marks.
- 9.1.2 For the theory courses, CIA Tests will carry 25% and the ESE 75% of the marks.
- 9.1.3 For the Practical courses, the CIA Tests will carry 40% and the ESE 60% of the marks.

9.2 Assessment of CIA Tests

- 9.2.1 For the Theory Courses, the break-up of marks shall be as follows

CIA for Theory Courses	Marks
Test-I & Test-II	15
Seminar	5
Assignment	5
Total	25

- 9.2.2 For the Practical Courses (wherever applicable), the break-up of marks shall be as follows:

CIA for Practical	Marks
Test-I	15
Test-II	15
Viva-voce and Record	10
Total	40

9.3 Assessment of End-Semester Examinations

- 9.3.1 Evaluation for the ESE is done by the Internal examiner.

9.4 Assessment of Project/Dissertation

- 9.4.1 The Project Report/Dissertation shall be submitted as per the guidelines.
- 9.4.2 The Project Work/Dissertation shall carry a maximum of 100 marks.
- 9.4.3 CIA for Project work/dissertation will carry 25% and ESE 75%.
- 9.4.4 The Project Report evaluation and viva-voce will be conducted by a committee constituted by the Head of the Department.
- 9.4.5 The Project Evaluation Committee will comprise the Head of the Department, Project Supervisor, and a senior faculty.
- 9.4.6 The Marks shall be distributed as follows

Continuous Internal Assessment (25 Marks)		End Semester Examination (75 Marks)	
Review-I – 10	Review-II -15	Project / Dissertation Evaluation	Viva-voce
		50	25

9.5 Assessment of Value-added Courses

- 9.5.1 Assessment of VACs shall be internal. Two CIA Tests shall be conducted during the semester by the Department(s) offering VAC.
- 9.5.2 The grades obtained in VACs will not be included for calculating the GPA/CGPA.

9.6 Passing Minimum

- 9.6.1 A student is declared to have passed in each course if he/she secures not less than 50% marks in the ESE and not less than 50% marks in aggregate taking CIA and ESE marks together.
- 9.6.2 A candidate who has not secured a minimum of 50% of marks in a course (CIA + ESE) shall reappear for the course in the next semester/year.

10. Conferment of the Master's Degree

A candidate who has secured a minimum of 50% marks in all courses prescribed in the programme and earned the minimum required credits shall be considered to have passed the Master's Programme.

11. Marks and Grading

- 11.1 The performance of students in each course is evaluated in terms Grade Point (GP).
- 11.2 The sum total performance in each semester is rated by Grade Point Average (GPA) while Cumulative Grade Point Average (CGPA) indicates the Average Grade Point obtained for all the courses completed.
- 11.3 **The GPA** is calculated by the formula

$$GPA = \frac{\sum_{i=1}^n C_i G_i}{\sum_{i=1}^n C_i}$$

where, C_i is the Credit earned for the Course i in any semester;
 G_i is the Grade Point obtained by the student for the Course i and
 n is the number of Courses passed in that semester.

- 11.4 **CGPA** is the Weighted Average Grade Point of all the Courses passed starting from the first semester to the current semester.

$$\text{CGPA} = \frac{\sum_{i=1}^m \sum_{j=1}^n C_i G_i}{\sum_{i=1}^m \sum_{j=1}^n C_i}$$

Where, C_i is the Credit earned for the Course i in any semester;

G_i is the Grade Point obtained by the student for the Course i

n is the number of Courses passed in that semester.

m is the number of semesters.

11.5 Evaluation :

11.5.1 Performance of the student for each course will be rated as shown in the Table.

Range of Marks	Grade Points	Letter Grade
90 and above	10	S
80-89	9	A
70-79	8	B
60-69	7	C
55-59	6	D
50-54	5	E
Less than 50	0	RA
Withdrawn from the examination	0	W

- 11.5.2 A ten point rating scale is used for evaluation of the performance of the student to provide overall grade for the Master's Programme.

CGPA	CLASSIFICATION OF FINAL RESULT
8.25 and above	First Class with Distinction
6.5 and above but below 8.25	First Class
5.0 and above but below 6.5	Second Class
0.0 and above but below 5.0	Re-appear

- 11.6 **Classification of Results.** The successful candidates are classified as follows:
- 11.6.1 **For First Class with Distinction:** Candidates who have passed all the courses prescribed in the Programme in the first attempt with a CGPA of 8.25 and above within the programme duration. Candidates who have withdrawn from the End Semester Examinations are still eligible for First Class with Distinction (See Section 12 for details).
 - 11.6.2 **For First Class:** Candidates who have passed all the courses with a CGPA of 6.5 and above.
 - 11.6.3 **For Second Class:** Candidates who have passed all the courses with a CGPA between 5.0 and less than 6.5.
 - 11.6.4 Candidates who obtain highest marks in all examinations at the first appearance alone will be considered for University Rank.
- 11.7 **Course-Wise Letter Grades**
- 11.7.1 The percentage of marks obtained by a candidate in a course will be indicated in a letter grade.
 - 11.7.2 A student is considered to have completed a course successfully and earned the credits if he/she secures an overall letter grade other than RA.
 - 11.7.3 A course successfully completed cannot be repeated for the purpose of improving the Grade Point.
 - 11.7.4 A letter grade RA indicates that the candidate shall reappear for that course. The RA Grade once awarded stays in the grade card of the student and is not deleted even when he/she completes the course successfully later. The grade acquired later by the student will be indicated in the grade sheet of the Odd/Even semester in which the candidate has appeared for clearance of the arrears.
 - 11.7.5 If a student secures RA grade in the Project Work/Field Work/Practical Work/Dissertation, he/she shall improve it and resubmit if it involves only rewriting/incorporating the clarifications suggested by the evaluators or he/she can re-register and carry out the same in the subsequent semesters for evaluation.
- 12. Provision for Withdrawal from the End Semester Examination**
- 12.1 The letter grade W indicates that a candidate has withdrawn from the examination.
 - 12.2 A candidate is permitted to withdraw from appearing in the ESE for one course or courses in ANY ONE of the semesters ONLY for exigencies deemed valid by the University authorities.
 - 12.3 Permission for withdrawal from the examination shall be granted only once during the entire duration of the programme.
 - 12.4 Application for withdrawal shall be considered only if the student has registered for the course(s), and fulfilled the requirements for attendance and CIA tests.
 - 12.5 The application for withdrawal shall be made ten days prior to the commencement of the examination and duly approved by the Controller of Examinations. Notwithstanding the mandatory prerequisite of ten days notice, due consideration will be given under extraordinary circumstances.
 - 12.6 Withdrawal will not be granted for arrear examinations of courses in previous semesters and for the final semester examinations.
 - 12.7 Candidates who have been granted permission to withdraw from the examination shall reappear for the course(s) when the course(s) are offered next.
 - 12.8 Withdrawal shall not be taken into account as an appearance for the examination when considering the eligibility of the candidate to qualify for First Class with Distinction.

13. **Academic misconduct:** Any action that results in an unfair academic advantage/interference with the functioning of the academic community constitutes academic misconduct. This includes but is not limited to cheating, plagiarism, altering academic documents, fabrication/falsification of data, submitting the work of another student, interfering with other students' work, removing/defacing library or computer resources, stealing other students' notes/assignments, and electronically interfering with other students'/University's intellectual property. Since many of these acts may be committed unintentionally due to lack of awareness, students shall be sensitized on issues of academic integrity and ethics.
14. **Transitory Regulations:** Wherever there has been a change of syllabi, examinations based on the existing syllabus will be conducted for two consecutive years after implementation of the new syllabus in order to enable the students to clear the arrears. Beyond that, the students will have to take up their examinations in equivalent subjects, as per the new syllabus, on the recommendation of the Head of the Department concerned.
15. Notwithstanding anything contained in the above pages as Rules and Regulations governing the Five Year Master's Programmes at Annamalai University, the Syndicate is vested with the powers to revise them from time to time on the recommendations of the Academic Council.

M.Sc. Information Technology (Five Year) Programme
Programme Code: SCIS52

CURRICULA AND SCHEME OF EXAMINATIONS
(For students admitted from the academic year 2019-2020)

Course Code	Course Title	Hours/Week			Credit	Marks		
		L	T	P	C	CIA	ESE	Total
Semester – I								
19ITAMC11	Language-I	3	0		3	25	75	100

ANNAMALAI UNIVERSITY
Department of Computer and Information Science
Pattern of question paper for END semester examinations
(Based on Revised Bloom's Taxonomy)

Programme: M.Sc. Five Year Integrated PG

Year: I/II

Semester:

Course Code:

Course Name:

Time: 3 Hrs

Max.Marks:100

Part-A (Level-K1)

Marks: (15x2=30)

(Answer ALL of the questions)

1. Define.....
2. What?
3. Choose/ Relate.....
4. How?
5. Why?
6. Find.....
7. Spell out.....
8. Multiple Choices a. b. c. d.
9. Multiple Choices a. b. c. d.
10. Multiple Choices a. b. c. d.
11. Multiple Choices a. b. c. d.
12. Match the following i - a ii - b iii - c iv - d v -
13. Match the following i - a ii - b iii - c iv - d v -
14. Match the following i - a ii - b iii - c iv - d v -
15. Match the following i - a ii - b iii - c iv - d v -

Part-B (Level-K2)

Marks: (5x5=25)

(Answer any FIVE of the questions)

16. Explain.....
17. Describe.....
18. Select.....
19. Classify....
20. Compare....
21. Interpret...

Part-C (Level-K3/ Level-K4)

Marks: (5x7=35)

(Answer any FIVE of the questions)

22. Apply....
23. Show.....
24. Solve....
25. Calculate....
26. Categorize...
27. Distinguish....
28. Test for.....

Part-D (Level-K5)

Marks: (1x10=10)

(Answer any ONE of the questions)

29. Discuss....
30. Summarize....

PROGRAMME OUTCOMES (POs)

After the successful completion of the M.Sc. Information Technology (5 year) Degree Programme, the graduates will be able to:

PO1:	Domain knowledge: Demonstrate knowledge of basic concepts, principles and applications of the specific science discipline.
PO2:	Resource Utilisation. Cultivate the skills to acquire and use appropriate learning resources including library, e-learning resources, ICT tools to enhance knowledge-base and stay abreast of recent developments.
PO3:	Analytical and Technical Skills: Ability to handle/use appropriate tools/techniques/equipment with an understanding of the standard operating procedures, safety aspects/limitations.
PO4:	Critical thinking and Problem solving: Identify and critically analyse pertinent problems in the relevant discipline using appropriate tools and techniques as well as approaches to arrive at viable conclusions/solutions.
PO5:	Project Management: Demonstrate knowledge and scientific understanding to identify research problems, design experiments, use appropriate methodologies, analyse and interpret data and provide solutions. Exhibit organisational skills and the ability to manage time and resources.
PO6:	Individual and team work: Exhibit the potential to effectively accomplish tasks independently and as a member or leader in diverse teams, and in multidisciplinary settings.
PO7:	Effective Communication: Communicate effectively in spoken and written form as well as through electronic media with the scientific community as well as with society at large. Demonstrate the ability to write dissertations, reports, make effective presentations and documentation.
PO8:	Environment and Society: Analyse the impact of scientific and technological advances on the environment and society and the need for sustainable development.
PO9:	Ethics: Commitment to professional ethics and responsibilities.
PO10:	Life-long learning: Ability to engage in life-long learning in the context of the rapid developments in the discipline.

PROGRAMME SPECIFIC OUTCOMES (PSOs)

At the end of the programme, the student will be able to

PSO1	Take leading roles in industry, academia, entrepreneurship and applications.
PSO2	Analyze, design, validate and implement state-of-the-art Information Communication Technology systems in their operational context.
PSO3	Scientific, ethical and socially responsible approach for conducting and contributing to research in their specific area of study and to international trends in and related to their field of study.
PSO4	Implement the concepts of computer networks, cyber security, computer communication, data repository, data analytics, and to implement these concepts, the students are expected to develop skills on design and analyzing the problem and to take a decision on the problem.
PSO5	Identify appropriate mathematical and statistical techniques to solve the problems and develop a system which is useful to the industry and scientific communities, and the society.
PSO6	Develop programming skills in recent computer software to implement the above concepts.
PSO7	Handle the projects related to electronic commerce, software development related to on-line applications and can achieve organizational goals and objectives.
PSO8	Control, and maintain the communication system networks, and they should be cope up with the cutting-edge communication technology.

முதலாம் ஆண்டு - முதற்பருவம்

19ITAMC11	நவீன இலக்கியமும் நாடகமும்	L	T	P	C
I		3			3

கற்பித்தலின் நோக்கம் (Learning Objective (LO))

- ❖ தமிழில் தோன்றிய நவீன இலக்கியங்களின் வளர்ச்சியைக் கூறல்.
- ❖ சிறுகதை, புதினங்கள் காட்டும் சமூகச் சிக்கல்களையும் கதை உத்திகளையும் விளக்குதல்.
- ❖ தமிழின் நீடயாக வளர்ந்துள்ள புதுக்கவிதை வகைமைய எடுத்துரைத்தல்.
- ❖ நவீன நாடகங்களை இலக்கிய நாடகங்களோடு ஒப்பிடல்.
- ❖ ஐரோப்பியர் வருகையால் தமிழில் ஏற்பட்ட மாற்றங்களையும் மறுமலர்ச்சியை விளக்குதல்.

Course Outcomes

At the end of the course, the student will be able to

CO1:	மொழிப் பாடம் வழியே தமிழின் சிறப்புக்களை மாணவர்கள் அறிந்து கொள்வர்.
CO2:	உலக இலக்கியங்களுக்குத் தமிழ் இணையானது என்னும் மனநிலையை அடைவர்
CO3:	மாணவர்களுக்கு நாவல்கள், சிறுகதை வாசிப்புத் திறன் மேம்படும்
CO4:	புதுக்கவிதைப் படைப்புத் திறன் தோன்றும்
CO5:	பாடப்பகுதிக்குரிய நாடகங்களை விழாக்களில் நிகழ்த்தும் ஆர்வம் ஏற்படும்.

அலகு - 1 சிறுகதை

- | | |
|--------------------------|------------------------|
| 1. புதுமைப்பித்தன் | - பால்வண்ணம் பிள்ளை |
| 2. கி.ராஜநாராயணன் | - கதவு |
| 3. கு.அழகிரிசாமி | - ராஜா வந்திருக்கிறார் |
| 4. கண்மணி குணசேகரன் | - உயிர்த் தண்ணீர் |
| 5. மேலாண்மை பொன்னுச்சாமி | - தேசிய மயில் |

அலகு - 2 புதுக்கவிதை

- | | |
|------------------------|---|
| 1. பாரதியார் | - புதுமைப்பெண் |
| 2. பாரதிதாசன் | - தமிழ் உணவு |
| 3. உவமைக் கவிஞர் சுரதா | - தமிழில் பெயரிடுங்கள் (துறைமுகம்) |
| 4. தேவதேவன் | - புகட்டல் (அமுதம் மாத்திரமே வெளிப்பட்டது) |
| 5. அறிவுமதி | - நட்புக்காலம் (முதல் 20- கவிதைகள் மட்டும்) |
| 6. மித்ரா | - ஹைகூ என் தோழி
(முதல் 20- கவிதைகள் மட்டும்) |

அலகு - 3 புதினம்

- | | |
|------------------|---------------------|
| 1.. டி.செல்வராசு | - பொய்க்கால் குதிரை |
|------------------|---------------------|

அலகு - 4 நாடகம்

1. இன்குலாப்

- ஓளவை

அலகு - 5 இக்கால இலக்கிய வரலாறு

ஐரோப்பியர் வருகை - நவீன இலக்கியங்கள் அறிமுகம் - புதுக்கவிதை - சிறுகதை - புதினம் ஆகியவற்றின் தோற்றமும் வளர்ச்சியும் - இலக்கிய முன்னோடிகள் - செய்தித்தாள் வருகை - நாடகம் - தோற்றமும் வளர்ச்சியும்.

அலகு - 6

(மாணவர்கள் அறிந்துகொள்வதற்கு மட்டும் - தேர்வுக்கான பகுதி அல்ல)

இலக்கியங்களையும் அவை தொடர்பான இலக்கிய வரலாற்றையும் இணைத்துப் படித்தல். நவீன இலக்கியங்கள் சமூகத்தைப் படம் பிடித்துக்காட்டுவதை சமூகக் கண்ணோட்டத்தோடு அறிதல். நவீன இலக்கிய வடிவங்களின் வளர்ச்சி வாழ்வியலுக்குப் பயன்படும் முறையை விளக்குதல்.

பாட நூல்

1. புதுமைப்பித்தன் - பால்வண்ணம் பிள்ளை
நியூ செஞ்சரி புக் ஹவுஸ், சென்னை
ஐந்தாம் பதிப்பு - 2015
2. கி.ராஜநாராயணன் - கதவு
அன்னம் வெளியீடு,
தஞ்சாவூர், ஏழாம் பதிப்பு - 2015
3. கு.அழகிரிசாமி - ராஜா வந்திருக்கிறார்
காலச்சுவடு பதிப்பகம், நாகர்கோயில்
முதற்பதிப்பு - 2012
4. கண்மணி குணசேகரன் - உயிர்த் தண்ணீர்
தாமரைச்செல்வி பதிப்பகம்
சென்னை, முதற்பதிப்பு- 1997
5. மேலாண்மை பொன்னுச்சாமி - தேசிய மயில்
வானதி பதிப்பகம், சென்னை
முதற்பதிப்பு - 1997
6. பாரதியார் - பாரதியார் கவிதைகள்
நியூ செஞ்சரி புக் ஹவுஸ், சென்னை
முதற்பதிப்பு - 2014
இரண்டாம் பதிப்பு- செப்டம்பர்- 2017
7. பாரதிதாசன் - பாரதிதாசன் கவிதைகள்
மணிவாசகர் பதிப்பகம், சென்னை
ஏழாம் பதிப்பு - 2016
8. உவமைக் கவிஞர் சுரதா - துறைமுகம்

சுவாதி பதிப்பகம்,
அம்பத்தூர், சென்னை, முதற்பதிப்பு 2010

9. தேவதேவன் - அமுதம் மாத்திரமே வெளிப்பட்டது
நியூ செஞ்சரி புக் ஹவுஸ், சென்னை
முதற்பதிப்பு - 2016
10. அறிவுமதி - நட்புக்காலம்
கவிதா பதிப்பகம், சென்னை
எட்டாம் பதிப்பு-2005
11. மித்ரா - மித்ரா கவிதைகள்
சாரல் வெளியீடு, சென்னை
முதற்பதிப்பு, 1990
12. டி.செல்வராசு - பொய்க்கால் குதிரை
நியூ செஞ்சரி புக் ஹவுஸ், சென்னை
முதற்பதிப்பு - 2014
13. இன்குலாப் - ஓளவை
அகரம் பதிப்பகம், தஞ்சாவூர்
ஐந்தாம் பதிப்பு - 2015
14. ச.வே.சுப்பிரமணியன் - தமிழ் இலக்கிய வரலாறு
மணிவாசகர் பதிப்பகம்
சென்னை, ஏழாம் பதிப்பு- 2015
15. சோ.நா. கந்தசாமி - தமிழ் இலக்கிய வரலாறு
மணிவாசகர் பதிப்பகம்
சென்னை, முதற்பதிப்பு- 2004

பார்வை நூல்கள்

1. வல்லிகண்ணன் - புதுக்கவிதையின் தோற்றமும் வளர்ச்சியும்
பாரிநிலையம், சென்னை-108
முதற்பதிப்பு- 2008
2. க. கைலாசபதி - தமிழ் நாவல் இலக்கியம்
குமரன் பதிப்பகம்
வடபழனி சென்னை
முதற்பதிப்பு- 1968, மறுபதிப்பு 2010
3. கார்த்திகேசசிவதம்பி - தமிழில் சிறுகதை தோற்றமும்
வளர்ச்சியும், நியூசெஞ்சரி, புத்தகநிலையம்,
சென்னை- 98, முதற்பதிப்பு- 2013

4. ஆறு. அழகப்பன் - தமிழ் நாடகத் தோற்றமும் வளர்ச்சியும் பாரி நிலையம், சென்னை, மு.ப. 2011
5. சு. சக்திவேல் - இருபதாம் நூற்றாண்டுத் தமிழ் உரைநடை மணிவாசகர் பதிப்பகம், சிதம்பரம்

I					3	0	0	3

Learning Objective (LO)

LO1	To know the Hindi terms for various professions.
LO2	To gain knowledge of poem and prose
LO3	To help the student to learn the importance of the moral, spiritual and human values
LO4	To study short stories and imbibe morals
LO5	To know about national leaders

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand the basic structure of poems.
CO2	Knowledge on various common hindi words.
CO3	Describe the basic concepts of moral stories.
CO4	Apply the concepts of in life.
CO5	Analyze the difference between prose and poem

Unit - I: Introduction

Mathruvandana(poem) ,peshwar,chalo bazaar chalo, ahimsa kivijay

Unit - II:Poem ,Prose

Balwanbano ,Gandhiji keasheram me chor,

Unit - III:vani ka theer ,Bharth, daku se mahatma.

Unit - IV:chandhini,samaykipabandhi, vitamin.

Unit - V:Rajiv Gandhi, titiali(poem),Bangalore.

Current Streams of Thought: The Faculty will impart the current developments in the subject during the semester to the students and this component will not be a part of Examinations.Understanding on Hindi drama basis and concepts and nibandh.

Text Books

1. Adharshahindi reader I-DBHPSabha-Chennai.17.
2. ParichyaDBHPS ,Trichi 17.

Supplementary Reading

1. Naveen Hindi Patamala: Part - I , D.B.H.P. Sabha, Chennai - 600 017.
2. Hindi prachar vahini.1,DHBS,sabha Chennai 17.

Semester	19IFREC11: Part-I Language French-I	L	T	P	C
I		3	0	0	3

Learning Objective (LO):

LO1	Greet People
-----	--------------

LO2	Introduce oneself (Basic 1)
LO3	Identify the things and the persons; spell a word
LO4	Ask about the day, the time and the date
LO5	Asking excuse

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Greet people appropriately, ask how they are, tell them how I am and ask how others are
CO2	Obtain another different culture, the sound of the French language, certain words in French, some famous French symbols/landmarks.
CO3	Understand basic classroom instructions
CO4	Can use different forms of address to speak to friends, teachers and people I do not know, using formal and informal modes of address and language.
CO5	Understand when the teacher is speaking to one or more persons in class and understand simple commands (mostly passive, receptive language with some active, productive language) and polite language. I can recognise 'tu' and 'vous' forms and help phrases such as ' Pardon ', ' s'ilvousplaît ', ' excusez-moi ', ' merci '.

Unit I

Aborder quelqu'un; Dire son nom
 Identifier une langue, la nationalité et le nombre.
 Identifier les choses et les personnes

Unit II

Remplir une fiche de renseignements.
 Découvrir la carte postale, un message sur internet et le blog très simples.
 Les pays francophones ; Les lieux de la ville
 Dire si on comprend ; Saluer ; Prendre congé
 Dire s'excuser ; Affirmer et nier ; Epeler son nom

Unit III

L'espace francophone ; Découvrir la France et les pays francophones
 Exprimer ses goûts ; Identifier les professions
 Demander quelque chose à quelqu'un

Unit IV

Comprendre un article de presse sur un portrait d'une personne.
 Première approche de la société française (noms, âges, origines, lieux d'habitation)
 Parler des loisirs ; Faire un projet

Unit V

Proposer-accepter ou refuser une proposition
 Demander une explication
 Ecrire les cartes et messages d'invitation, d'acceptation ou de refus.
 Découvrir la carte de France et les connaissances.

19IENGC12	ENGLISH THROUGH LITERATURE I: PROSE	L	T	P	C
I		3			3

Learning Objective (LO)

LO1	Develop the Language ability of the students vocabulary, and to enjoy reading and writing Develop their inquiry skills.
LO2	Enable students to understand the passage, to read fluently, to enrich their
LO3	Make the students proficient in the four language skills
LO4	Make the students read with correct pronunciation, stress, intonation, pause, and articulation of voice.
LO5	Develop their inquiry skills.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Obtain competency in communication, both in written and oral skills
CO2	Acquire fluency in English language
CO3	Become knowledgeable about construction of sentence structures

CO4	Develop English vocabulary to use the English language effectively
CO5	Exhibit proficiency in the four communication skills

Unit I

Stephen Leacock "With the Photographer"
Winston S. Churchill "Examinations"
Grammar: Parts of Speech: Nouns, Verbs, Adjectives, and Adverbs

Unit II

G.B. Shaw "Spoken English and Broken English"
M.K. Gandhi "Voluntary Poverty"
Grammar: Articles

Unit III

Robert Lynd "On Forgetting"
Virginia Woolf "Professions for Woman"
Grammar: Pronouns

Unit IV

A. G. Gardiner "On Umbrella Morals"
R.K. Narayan "A Snake in the Grass"
Grammar: Prepositions

Unit V

Martin Luther King (Jr.) "I Have a Dream"
George Orwell "The Sporting Spirit"
Grammar: Conjunctions & Interjections

Text Book:

1. Ayyappa Raja, S T. Deivasigamani. N. Saravana Prabhakar, B .Karthikeyan. *English through Literature: Prose, Chidambharam, Manibharathi Publishers, 2010.*

19IENSC13	ENVIRONMENTAL STUDIES	L	T	P	C
I		3			3

Learning Objective (LO)

LO1	To make the student aware of World Environmental System
LO2	To make the student aware of the fundamental Concepts and Principles of Eco- system and energy-flow

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	To evaluate the present condition of environmental pollution
CO2	To understand the nature of the atmosphere
CO3	To be aware of causes of pollution and precautionary measure

UNIT: I ENVIRONMENTAL SYSTEM

- (1.1)The Services provided by the Environmental System
- (1.2)Ecosystems: Food Chains, Food Webs, Ecological Pyramids
- (1.3)Biochemical Cycles: Hydrological Cycle, Carbon Cycle

UNIT: II ENVIRONMENTAL DAMAGE –POLLUTION

Sources and impact of

- (2.1) Air Pollution
- (2.2) Water Pollution
- (2.3) Land Pollution
- (2.4) Municipal Solid Waste (2.5) Noise Pollution

UNIT: III RESOURCE DEPLETION

- (3.1) Importance of Forests: Causes and Consequences of Deforestations
- (3.2) Bio Diversity: Meaning and Importance – Reasons and Consequences of Biodiversity

Decline

(3.3) Consequences of overdrawing Water Resources.

UNIT: IV GLOBAL CLIMATE CHANGE

(4.1) The Science of Climate Change The Green House Effect (4.2) Sources and Impact of Climate Change (4.3) Coping with Climate Change

UNIT:V SUSTAINABLE DEVELOPMENT

(5.1) Concept and Definition of Sustainable Development (Brundtland Commission Definition)

(5.2) Poverty, Population Growth and Environmental Damage

(5.3) Policies for Sustainable Development

CURRENT STREAM OF THOUGHTS

For Knowledge Purpose and not for Examinations

Current issues in environmental eco system Effects, Climate Change and Global Warming.

Semester	19IINFC14: Digital Computer Fundamentals	L	T	P	C
----------	--	---	---	---	---

I		4	0	0	4
---	--	---	---	---	---

Learning Objective (LO)

LO1	It aims to train the student to the basic concepts of Digital Computer Fundamentals
LO2	To impart the in-depth knowledge of logic gates, Boolean algebra,
LO3	To provide basic ideas about combinational circuits and sequential circuits.
LO4	
LO5	

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Analysis different type of codes and number systems which are used in digital communication and computer systems.
CO2	Form different digital circuits and analyse different types of digital electronic circuit
CO3	Implement logical operations using combinational logic circuits.
CO4	Understand the counters
CO5	Learn the basic terms and ideas of ROM and RAM

Unit-1

Number Systems and Codes: Number System – Base Conversion – Binary Codes – Code Conversion. Digital Logic: Logic Gates – Truth Tables – Universal Gates.

Unit-2

Boolean Algebra: Laws and Theorems – SOP, POS Methods – Simplification of Boolean Functions – Using Theorems, K-Map, Prime – Implicant Method – Binary Arithmetic: Binary Addition – Subtraction – Various Representations of Binary Numbers – Arithmetic Building Blocks – Adder – Subtractor.

Unit-3

Combinational Logic: Multiplexers – Demultiplexers – Decoders – Encoders – Code Converters – Parity Generators and Checkers.

Unit-4

Sequential Logic: RS, JK, D, and T Flip-Flops – Master-Slave Flip-Flops. Registers: Shift Registers – Types of Shift Registers.

Unit-5

Counters: Asynchronous and Synchronous Counters - Ripple, Mod, Up-Down Counters– Ring Counters. Memory: Basic Terms and Ideas –Types of ROMs – Types of RAMs.

Current Streams of thought: Microprocessors, Microcomputers and Assembly Language

Semester		L	T	P	C
I	19IINFC15: Programming in C	4	0	0	4

Learning Objective (LO)

LO1	To impart adequate knowledge on the need of programming languages and
-----	---

	problem involving techniques
LO2	To develop programming skills using the fundamentals and constructs.
LO3	To enable effective usage of arrays, attributes, functions, pointers and to implement the memory management concepts.
LO4	To teach the issues in file organization and the usage of file systems.
LO5	To develop logics which will help them to create programs, applications in C.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Develop programs using the basic elements like control statements, arrays and strings
CO2	Understand about the code reusability with the help of user defined functions.
CO3	Develop advanced applications using enumerated data types, function pointer, nested structures, pre-processors and various header file directories.
CO4	Learn the basics of the handling mechanism that is essential for understanding the concepts in systems develop applications.
CO5	Describe the arrays, structures, pointers and more importantly files.

Unit-1

C fundamentals Character set - Identifier and keywords - data types - constants - Variables - Declarations - Expressions - Statements - Arithmetic, Unary, Relational and logical, Assignment and Conditional Operators - Library functions.

Unit-2

Data input output functions - Simple C programs - Flow of control - if, if-else, while, do-while, for loop, Nested control structures - Switch, break and continue, go to statements - Comma operator.

Unit-3

Functions -Definition - proto-types - Passing arguments - Recursions. Storage Classes - Automatic, External, Static, Register Variables - Multi-file programs.

Unit-4

Arrays - Defining and Processing - Passing arrays to functions - Multi-dimension arrays - Arrays and String. Structures - User defined data types - Passing structures to functions - Self-referential structures - Unions - Bit wise operations.

Unit-5

Pointers - Declarations - Passing pointers to Functions - Operation in Pointers - Pointer and Arrays - Arrays of Pointers - Structures and Pointers - Files: Creating Processing, Opening and Closing a data file.

Current Streams of thought: File Management and Pre-processors.

Semester	19IINFP16: Practical – I: C Programming Lab															L	T	P	C
I																0	0	4	2

Learning Objective (LO)

LO1	The course is oriented to those who want to advance structured and procedural programming understanding and to improve C programming skills.
LO2	The course is designed to provide complete knowledge of C language.
LO3	Students will be able to develop logics which will help them to create programs, applications in C.
LO4	Also by learning the basic programming constructs they can easily switch over to any other language in future.
LO5	The major objective is to provide students with understanding of code organization and functional hierarchical decomposition with using complex data types

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Learn concepts in problem solving and understand the fundamentals of C programming.
CO2	Analyse the loops and decision making statements to solve the problem.
CO3	Implement different Operations on arrays.
CO4	Ability to work with textual information, characters and strings.
CO5	Understand the different sorting algorithm and their complexity

List of Exercises

I Summation of Series

1. Sin(x), Cos(x), and Exp(x) (Comparison with built in functions)

II String Manipulation

1. Counting the number of vowels, consonants, words, white spaces in a line of text and array of lines.
2. Reverse a string and check for palindrome.
3. Sub string detection, count and removal.
4. Finding and replacing substrings.

III Recursion

1. ${}^n P_r$, ${}^n C_r$
2. GCD of two numbers
3. Fibonacci sequence
4. Maximum & Minimum

IV Matrix Manipulation

1. Addition and Subtraction
2. Multiplication
3. Transpose, and trace of a matrix
4. Determinant of a Matrix

V Sorting and Searching

1. Insertion Sort
2. Bubble Sort
3. Linear Search
4. Binary Search

Semester	19IMATA01: Allied I: Mathematics-I	L	T	P	C
I		3	0	0	3

Learning Objective (LO)

LO1	Matrices
LO2	Differential Calculus
LO3	Integral calculus
LO4	Differential Equations
LO5	Vector differentiation

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Handle matrix applications.
CO2	Understand the calculus, differential calculus, integral calculus and vector differentiation.
CO3	To solve problems related to computer science and applications.
CO4	Handle matrix applications.
CO5	Understand the calculus, differential calculus, integral calculus and vector differentiation.

Unit-1

Matrices: Rank of a matrix – Computation of the inverse of a matrix by elementary transformation – Characteristic equations – Eigen values and Eigen vectors and their properties – inverse of a matrix using Cayley – Hamilton theorem – real quadratic forms – Reduction to canonical form by elementary congruent transformations – Nature of quadratic forms.

Unit-2

Differential Calculus: Curvature – radius of curvature – centre and circle of curvature – Evolutes – Envelopes – Taylor and Maclaurin series of functions of two variables – Jacobians – Maxima

and minima of functions of two variables – constrained maxima and minima – Lagrange's method of multipliers.

Analytical Geometry of three dimensions.

Unit-3

Integral Calculus: Methods of integration (Revision) – Integration by parts – properties of definite integrals – Reduction formulae – Evaluation of double and triple integrals – Change of order of integration – Application of multiple integrals for finding areas and volumes – Beta and Gamma functions.

Unit-4

Differential Equations: Linear differential equations of second order with constant coefficients. Simultaneous linear differential equations – Linear differential equations of second order with variable coefficients – Euler's homogeneous differential equations – Legendre's differential equations.

Unit-5

Vector: Vector differentiation – Scalar and vector point functions – Differentiation of vectors – gradient of a scalar function – simple applications – Divergence and curl of vector functions – solenoidal and irrotational fields – simple applications – Laplacian operator – Expansion formulae of first and second order differential operators.

முதலாண்டு-இரண்டாம் பருவம்

19ITAMC21	பக்திஇலக்கியமும்சிறுநிலக்கியமும்	L	T	P	C
II		3			3

கற்பித்தலின் நோக்கம் (Learning Objective (LO))

- ❖ பக்தி மற்றும் சிறுநிலக்கிய வரையறைகளையும் வகைகளையும் அறிமுகம் செய்தல்.
- ❖ தமிழின் தனித்துவமான பக்தி இலக்கிய வகைமையை ஒப்பிட்டுக்காட்டல்.
- ❖ சைவ வைணவ இலக்கியங்களின் தனித்துவத்தை எடுத்துரைத்தல்.
- ❖ கிறித்துவ, இசுலாமிய இலக்கியங்களையும் பாடு பொருட்களையும் விளக்குதல்.
- ❖ சிறுநிலக்கியத் தோற்ற பின்னணிகளின் வழி அவ்விலக்கியங்களை அறிய வைத்தல்.

Course Outcomes

At the end of the course, the student will be able to

CO1:	பக்தி இலக்கியம் சிற்றிலக்கியம் வகைமைகளையும் உத்திகளையும் அறியும் திறன்.
CO2:	திருஞானசம்பந்தரின் பக்தித் திறத்தை உணர்தல்.
CO3:	ஆண்டாளின் பக்தி மார்க்கதையும் பாவை நோன்பையும் குறித்துத் தெளிதல்.
CO4:	வள்ளலாரின் உயிர் நேயக் கோட்பாட்டை அவசியம் அறிவர்
CO5:	இந்தியத் தத்துவ ஞான வரலாற்றுடனும் இதிகாசங்களுடன் தொடர்பு ஏற்பட்டிருக்கும்.

அலகு-1 பக்தி இலக்கியம்

1. திருஞானசம்பந்தர் - திருநள்ளாறு - பச்சைப் பதிகம்
(முதல் 5 பாடல்கள்)
2. திருமூலர் - திருமந்திரம் (உடம்பினை முன்னை,
யாவர்க்குமாம், ஒன்றே குலமும்,
உள்ளம் பெருங்கோயில்,
ஆர்க்கும் எனத் தொடங்கும் பாடல்கள்)
3. சிவவாக்கியர் - அறிவுநிலை (5 பாடல்கள்)

அலகு - 2 பக்தி இலக்கியம்

1. ஆண்டாளர் - திருப்பாவை (முதல் 5 பாடல்கள்)
2. வள்ளலார் - திருவருட்பா - பிள்ளைச் சிறு விண்ணப்பம்

அலகு - 3 பக்தி இலக்கியம்

1. தேம்பாவணி - குழவிகள் வதைப்படலம்
2. சீறாப்புராணம் - மானுக்குப் பிணை நின்ற படலம்

அலகு - 4 சிற்றிலக்கியம்

1. குற்றாலக் குறவஞ்சி - மலை வளம் (வானரங்கள்... பாடல் முதல்)
2. முக்கூடற்பள்ளு - நாட்டு வளம்

அலகு - 5 இலக்கிய வரலாறு

பக்தி சிற்றிலக்கிய வரலாறு - இடைக்காலத் தமிழகச் சூழல் - சைவ வைணவ சமயங்களின் செல்வாக்கு - சமண பௌத்த சமய இலக்கியங்கள் - கிறித்துவ இசுலாம் இலக்கியங்கள் - நாயக்கர் காலச் சிற்றிலக்கியங்கள் தோற்ற பின்னணி - சிற்றிலக்கிய வகை.

அலகு - 6

(மாணவர்கள் அறிந்துகொள்வதற்கு மட்டும் - தேர்வுக்கான பகுதி அல்ல)

இலக்கியங்களையும் அவை தொடர்பான இலக்கிய வரலாற்றையும் இணைத்துப் படித்தல். பக்தி இலக்கிய வளர்ச்சியில் தமிழ்ப் பனுவல்களில் ஏற்பட்ட வளர்ச்சியைச் சுட்டிக்காட்டுதல். மனித மனத்தை பண்படுத்தவும், சமூக அமைதியை நிலைநாட்டவும், உலக நல்லிணக்கம் காணவும் பக்தி இலக்கியம் பயன்படுமாற்றை விளக்குதல்.

பாட நூல்:

1. ச.வே.சுப்பிரமணியன்(ப.ஆ) - பன்னிருதிருமுறைகள்
மணிவாசகர் பதிப்பகம், சென்னை
மூன்றாம் பதிப்பு - 2010
2. ச.வே.சுப்பிரமணியன் (ப.ஆ) - நாலாயிரத்திவ்ய பிரபந்தங்கள்
முல்லைநிலையம்
சென்னை-17
முதற்பதிப்பு - 2000, இரண்டாம் பதிப்பு 1996
3. சி.எஸ். முருகேசன் (ப.ஆ) - சித்தர் பாடல்கள்
மணிவாசகர் பதிப்பகம், சென்னை
இரண்டாம் பதிப்பு - 1996
4. வள்ளலார் - திருவருட்பா,
அண்ணாமலைப் பல்கலைக்கழகப் பதிப்பு
அண்ணாமலைநகர்
5. வீரமாமுனிவர் - தேம்பாவணி
பாரி நிலையம்,
சென்னை - 8
முதற்பதிப்பு - 2010
6. உமறுப்புலவர் - சீராப்புராணம்
நேஷனல் பதிப்பகம்
சென்னை
முதற்பதிப்பு - 2004
7. திரிகூடராசப்பக்கவிராயர் - குற்றாலக்குறவஞ்சி
பாவை பதிப்பகம்
சென்னை
இரண்டாம் பதிப்பு - 2014
8. முனைவர் கதிர்முருக(ப.ஆ) - முக்கூடற்பள்ளு
பாரி நிலையம்
சென்னை -108 , மறுபதிப்பு - 2015

பார்வை நூல்கள்

1. ந.வீ.செயராமன் - சிற்றிலக்கியச் செல்வம்
மணிவாசகர் பதிப்பகம், சென்னை.
முதற்பதிப்பு- 1968.
2. ந.வீ. செயராமன் - பள்ளு இலக்கியம்
மணிவாசகர் பதிப்பகம், சென்னை.
முதற்பதிப்பு- 1980.

3. கோ.கேசவன் - பள்ளு இலக்கியம் ஒரு சமூகவியல் பார்வை அன்னம் வெளியீடு, தஞ்சாவூர் - 1981. முதற்பதிப்பு - 1981
4. ச.வே.சுப்பிரமணியன் - தமிழ் இலக்கிய வரலாறு மணிவாசகர் பதிப்பகம், சென்னை. ஏழாம் பதிப்பு - 2010
5. சோ.நா.கந்தசாமி - தமிழ் இலக்கிய வரலாறு மணிவாசகர் பதிப்பகம், சென்னை. முதற்பதிப்பு - 2004

19IHINC21	BASIC HINDI-II				L	T	P	C
II					4	1		5

Learning Objective (LO)

LO1	To know the life of National leaders.
LO2	To introduce the Gandhiji's thought.
LO3	To understand the concepts of teaching and learning from Dr.Sarvapalli Radhakrishnan's life.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand the basic structure of poem and prose.
CO2	Classify and compare various poems.
CO3	Describe the basic concepts of moral stories.

CO4	Apply the teachings of various national leaders.
CO5	Understand the spirit of spirituality.

Unit - I: Introduction

man ki shakti dena ,prathighnapalan, hamaraRajchinga,adhbhudmaya..

Unit - II:Poem ,Prose

sarvapalliradhakrishnan,amedkar, mahaveer, sadakkeniyam,sanghi ka phal(poem),

Unit - III:Stories.

Tyog ka such,bhavansabkaekhai,chirjivan ka jharna, , lob ka parinam.

Unit - IV:dadhakimookatha, kuthekipoonchandebabarardhana.

Unit - V:bakri do ghav kha gayi, ,Dhankimagima,

Current Streams of Thought:The Faculty will impart the current developments in the subject during the semester to the students and this component will not be a part of Examinations.

Text Books

Semester	19IFREC21: FRENCH – II (Option)	L	T	P	C
II		3	0	0	3

Learning Objective (LO)

LO1	Talk about their family members
LO2	Engage a simple conversation about family members.
LO3	Talk about your likes and dislikes
LO4	Fill in a simple form
LO5	Read simple notices, posters and catalogues

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand simple texts providing personal details of others
CO2	State how many people are in my family and who they are, using vocabulary including family members, possessive adjectives and negatives such as 'je n'ai pas de frères/sœurs'.
CO3	Write a short text to inform others of my likes and dislikes and provide reasons. Ask others about their likes and dislikes, showing that I appreciate diverse viewpoints and personalities e.g. 'Quelest ton ... favori/préfér�?'
CO4	Understand in filling up a simple form
CO5	Write a short introduction about myself, providing personal details and use simple connectors, such as 'et', 'mais' and 'aussi'.

Unit I

Demander /donner des pr cisions sur le temps

Demander / indiquer l'heure et la date

Demander / dire ce qu'on a fait

F liciter

Unit II

Comprendre et  crire un journal personnel en fran ais.

Comprendre l'agenda de quelqu'un

Les rythmes de vie en France

Evaluez-vous

Unit III

Evasion en français par l'Internet, la télévision, la radio et la presse.

Découvrir la France dans votre pays

Unit IV

Les voyages et les transports

Comparer les choses ; Montrer ; Indiquer une appartenance

Demander / donner une explication

Unit V

Voyager en France ; Situations pratiques relatives au voyage.

Parler d'un repas.

Situations pratiques à l'hôtel et au restaurant

Les habitudes des Français sur un repas.

19IENGC22	English Through Literature II: Poetry	L	T	P	C
II		3			3

Learning Objective (LO)

LO1	Develop the ability of the learner to comprehend and appreciate poems in English
LO2	Enhance the competence of the learner in using the English language

LO3	Improve the interest of the learner in human values and perceptions
LO4	Enable students to study and analyze the use of language in poetry
LO5	Provide learners with the theoretical and practical understanding of grammar

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Become competent in communication, both in written and oral skills
CO2	Gain fluency in English language
CO3	Attain knowledge about construction of sentence structures
CO4	Acquire the vocabulary to use the English language effectively
CO5	Acquire the aesthetic sense for appreciating poetry

Unit I

William Shakespeare	“Sonnet 116”
William Blake	“Lamb”
Robert Burns	“A Red, Red Rose”
Grammar	Finite & Non-finite verbs

Unit II

PB Shelley	“To Wordsworth”
John Keats	“Sonnet to Sleep”
Thomas Hardy	“Neutral Tones”
Grammar	Strong and Weak Verbs, Auxiliaries and Modals

Unit III

Robert Frost	“Stopping By Woods on a Snowy Evening”
Wilfred Owen	“Anthem for Doomed Youth”
Emily Dickinson	“A Narrow Fellow in the Grass”
Grammar	Transitive, Intransitive Verbs, Active and Passive Voice

Unit IV

Sri Aurobindo	“The Tiger and the Deer”
AK Ramanujan	“Obituary”
Sarojini Naidu	“Queen’s Rival”
Grammar	Concord

Unit V

Roger Mc Gough	“My Bus Conductor”
Maya Angelou	“Still I Rise”
Langston Hughes	“The Negro Speaks of Rivers”
Grammar	Tenses and their forms

TEXT BOOKS

Semester	19IINF23: Data Structures and Algorithms	L	T	P	C
II		4	0	0	4

Learning Objective (LO)

LO1	To impart the basic concepts of data structures and algorithms.
LO2	To understand the concepts of about stacks, queues, lists trees and graphs.

LO3	To gain knowledge on hashing/symbol tables and study various sorting algorithms
LO4	To Study various sorting algorithms
LO5	To develop applications using data structures

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Analyse suitable data structures for various applications.
CO2	Learn sorting techniques.
CO3	Understand the different file organizations.
CO4	Familiarize with the usage of symbol tables.
CO5	Analyse suitable data structures for various applications.

Unit-1

Introduction of algorithms, analyzing algorithms, Arrays : Representation of Arrays, Implementation of Stacks and queues, Application of Stack: Evaluation of Expression - Infix to postfix Conversion - Multiple stacks and Queues, Sparse Matrices.

Unit-2

Linked list: Singly Linked list - Linked stacks and queues - polynomial addition - More on linked Lists - Doubly linked List and Dynamic Storage Management - Garbage collection and compaction.

Unit-3

Trees: Basic Terminology - Binary Trees - Binary Tree representations - Binary trees - Traversal - More on Binary Trees - Threaded Binary trees - counting Binary trees. Graphs: Terminology and Representations - Traversals, connected components and spanning Trees, Single Source Shortest path problem.

Unit-4

Symbol Tables: Static Tree Tables - Dynamic Tree Tables - Hash Tables : Hashing Functions - overflow Handling. External sorting : Storage Devices - sorting with Disks : K-way merging - sorting with tapes.

Unit-5

Internal sorting: Insertion sort - Quick sort - 2 way Merge sort - Heap sort - shell sort - sorting on keys. Files: Files, Queries and sequential organizations - Index Techniques - File organization.

Current Streams of thought: Dynamic Programming, Backtracking Strategy

Semester	19IINF24: Object Oriented Programming Using C++	L	T	P	C
II		4	0	0	4

Learning Objective (LO)

LO1	To explain the advantages of object oriented programming over procedure oriented programming.
LO2	Understand how to apply the major object-oriented concepts to implement object oriented programs in C++, encapsulation, inheritance and polymorphism.

LO3	To learn how to implement constructors, function, pointers and class member functions.
LO4	Explain array handling, function overloading, operator overloading and virtual functions.
LO5	Helps in implementing some important features of C++ including templates, utilizing the I/O classes in C++ and exception handling.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Describe the principles of object-oriented problem solving and programming.
CO2	Understand the programming fundamentals, including statement and control flow.
CO3	Apply the concepts of class, method, constructor, pointers, data abstraction, function abstraction, inheritance, overriding, overloading, polymorphism, IO streams, Templates.
CO4	Develop program with basic data structure like array.
CO5	Describe the principles of object-oriented problem solving and programming.

Unit-1

Principles of Object- Oriented Programming – Beginning with C++ - Tokens, Expressions and Control Structures – Functions in C++

Unit-2

Classes and Objects – Constructors and Destructors – New Operator – Operator Overloading and Type Conversions.

Unit-3

Inheritance: Extending Classes – Pointers- Virtual Functions and Polymorphism

Unit-4

Managing Console I/O Operations – Working with Files – Templates – Exception Handling

Unit-5

Standard Template Library – Manipulating Strings – Object Oriented Systems Development

Current Streams of thought:

Current Streams of thought: Streams - formatted I/O with its class functions and manipulators

Semester	19IINFP25: Practical – II: Data Structures Using C Lab	L	T	P	C
II		0	0	4	2

Learning Objective (LO)

LO1	To develop skills to design and analyse simple linear and non-linear data structures.
LO2	It enables them to gain knowledge in practical application of data structures.
LO3	To Understand concepts about searching and sorting techniques
LO4	To understand basic concepts about Stacks, Queues, List, Tree and Graphs.
LO5	To understanding about writing algorithm and step by step approach in solving with the help of fundamental data structures.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Learn and develop the mathematical logic and algorithm.
CO2	Describe the dynamic memory concepts.

CO3	Analyse the problem and should have the implementation of the non-linear data structures like Tree and Graph.
CO4	Implement the various Searching and Sorting Techniques with Time complexity.
CO5	Understand and implement the appropriate data structures with optimized memory and computational time complexity.

List of Exercises

- Write a C program to create two array list of integers. Sort and store the elements of both of them in third list.
- Write a C program to multiply two matrices A and B and store the resultant matrix in C using arrays.
- Write a C program to experiment the operation of STACK using array.
- Write a C program to create menu driven options to implement QUEUE to perform the following
 - (i) Insertion (ii) Deletion (iii) Modification (iv) Listing of elements
- Write a C program to create Linked list representations of employee records and do the following operations using pointers.
 - To add a new record.
 - To delete an existing record.
 - To print the details about an employee.
 - To find the number of employees in the structure.
- Write a C Program to count the total nodes of the linked list.
- Write a C program to insert an element at the end of the linked list.
- Write a C program to insert an element at the beginning of a doubly linked list.
- Write a C program to display the hash table, using the mid square method.
- Write a program to demonstrate Binary Search.
- Write a C program to insert nodes into a Binary tree and to traverse in pre order.
- Write a C program to traverse the given binary tree using all traversal methods.
- Write a C program to arrange a set of numbers in ascending order using QUICK SORT.

Outcome Mapping

CO/ PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6	PSO7	PSO8

CO4	3		2							3	2					3			2
CO5	3									3	1			3					

Semester	19IINFP26: Practical – III: C++ Programming Lab	L	T	P	C
II		0	0	4	2

Learning Objective (LO)

LO1	To develop solutions to problems demonstrating usage of control structures, modularity, I/O. and other standard language constructs.
LO2	To demonstrate the usage of data abstraction, encapsulation, and inheritance.
LO3	To implement the abstract interface and polymorphism
LO4	To learn syntax, features of, and how to utilize the Standard Template Library.
LO5	To learn other features of the C++ language including templates, exceptions, forms of casting, conversions, covering all features of the language.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Demonstrate the procedural and object oriented paradigm with concepts of streams, classes, functions, data and objects.
CO2	Implement dynamic memory management techniques using pointers, constructors, destructors, etc.
CO3	Learn the concept of function overloading, operator overloading, virtual functions and polymorphism.
CO4	Implement early and late binding, usage of exception handling and generic programming.
CO5	Understand the use of various OOPs concepts with the help of program.

List of Exercises

1. Write a program in C++ to swap two numbers?
2. Write a C++ program to find the largest three elements in an array?
3. Write a program in C++ to calculate the series?
 $(1) + (1+2) + (1+2+3) + (1+2+3+4) + \dots + (1+2+3+4+\dots+n)?$
4. Write a C++ program to find the Transpose of a Matrix?
5. Write a C++ program to convert binary number to decimal?
6. Write a C++ program to calculate area of a circle, a rectangle or a triangle depending upon user's choice?

7. Write a C++ program to do Addition, subtraction and multiplication of two numbers using function?
8. Write a C++ program to overload unary operators that is increment and decrement.
9. Write a C++ program to read and print student's information using two classes and simple inheritance?

Semester	19IMATA03: Allied – II: Discrete Mathematics	L	T	P	C
II		5	0	0	5

Learning Objective (LO):

LO1	To study various finite structures of mathematics.
LO2	To understand the concepts of sets, functions and groups.
LO3	To understand the relations and digraphs

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Acquire the basic concepts in mathematical logic and theory of inferences.
CO2	Understand the concepts of set theory, relations and equivalence classes with matrix representation
CO3	Formalities lattice theory, Boolean algebra and group theory
CO4	Understand the basic concepts of graph theory, Eulerian and Hamiltonian graphs
CO5	Acquire the basic concepts in mathematical logic and theory of inferences.

Unit-1

Fundamentals: Sets and Subsets – Operations on Sets – Sequences – Division in the integers – Matrices – Mathematical Structures – Logic: Propositions and Logical Operations – Conditional Statements – Methods of Proof – Mathematical Induction Counting: Permutations – Combinations – The Pigeonhole Principle – Elements of Probability – Recurrence Relations.

Unit-2

Relations and Digraphs: Product Sets and Partitions – Relations and Digraphs – Paths in Relations and Digraphs – Properties of Relations – Equivalence Relations – Computer Representation of Relations and Digraphs – Manipulation of Relations – Transitive Closure and Warshall's Algorithm.

Unit-3

Functions: Functions – Functions for Computer Science – Permutation Functions – Growth of Functions Topics in Graph Theory: Graphs – Euler Paths and Circuits – Hamiltonian Paths and Circuits – Coloring Graphs.

Unit-4

Order Relations and Structures: Partially Ordered Sets – External Elements of Partially Ordered Sets – Lattices – Finite Boolean Algebras – Functions on Boolean Algebras – Boolean Functions as Boolean Polynomials Trees: Trees – Labelled Trees – Tree Searching – Undirected Trees – Minimal Spanning Trees.

Unit-5

Semigroups and Groups: Binary Operations Revisited – semigroups – Products and Quotients of Semigroups – Groups – Products and Quotients of Groups, Groups and coding: Coding of Binary Information and Error Detection – Decoding and Error Correction.

இரண்டாம் ஆண்டு-மூன்றாம்பருவம்

19 ITAMC31	அறஇலக்கியமும் காப்பியமும்	L	T	P	C
III		3			3

கற்பித்தலின் நோக்கம் (Learning Objective (LO))

- ❖ தமிழ் அற இலக்கிய வரலாற்றை அறிமுகம் செய்து விளக்கப்படும்.
- ❖ அற இலக்கியங்களின் வழித் தனி மனித ஒழுக்கம் வலியுறுத்தப்படும்.
- ❖ காப்பிய இலக்கிய இலக்கணத்துடன் அதன் வரலாறும் புகட்டப்படும்.
- ❖ தமிழில் தோன்றியுள்ள காப்பியங்களின் தனித்துவம் உணர்த்தப்படும்.
- ❖ தமிழில் அற இலக்கியங்களின் தேவையைப் புரிய வைத்தல்.

Course Outcomes

At the end of the course, the student will be able to

CO1:	திருக்குறள் வழி மனித மான்புகளையும் ஒழுக்கங்களையும் அறியும் திறன்.
CO2:	பெரியவர்களை மதிக்கும் மனப்பான்மையும் பிழைக் கூறாமையும் வளரும்.
CO3:	இந்திர விழா கொண்டாடிய தமிழர்கள் பண்பாட்டை உணர்ந்திருப்பர்.
CO4:	நாயன்மார்கள் வரலாற்றையும் பக்தி நெறியையும் பெற்றிருப்பர்.
CO5:	வாலி வதைப் படலம் வழிவிவாத திறன் ஏற்படும்.

அலகு - 1 அற இலக்கியம்

1. திருக்குறள் - உழவு, ஒழுக்கமுடைமை, காலமறிதல், நட்பு, பிரிவாற்றாமை

அலகு - 2 அற இலக்கியம்

1. நாலடியார் - பெரியாரைப் பிழையாமை
2. பழமொழி நானூறு - கல்வி

அலகு - 3 காப்பியம்

1. சிலப்பதிகாரம் - இந்திர விழவு ஊரெடுத்த காதை
2. மணிமேகலை - ஆபுத்திரன் திறன் அறிவித்த காதை

அலகு - 4 காப்பியம்

1. பெரிய புராணம் - அப்பூதி அடிகள் புராணம்
2. கம்பராமாயணம் - வாலி வதைப்படலம்

அலகு - 5 இலக்கிய வரலாறு

சங்க மருவிய கால அற இலக்கியங்கள் - திருக்குறளின் பெருமை - அற இலக்கியங்களின் வளர்ச்சி - காப்பிய இலக்கணம் - பகுப்புகள் - காலந்தோறம் தோன்றிய காப்பியங்கள் - வரலாறு.

அலகு - 6 (மாணவர்கள் அறிந்துகொள்வதற்கு மட்டும் - தேர்வுக்கான பகுதி அல்ல)

அறஇலக்கியங்கள் மனதை நெறிப்படுத்துவதோடு சமூக நடத்தைகளையும் கற்றுத்தருகின்றன. அற இலக்கியங்களின் தொடர்பால் மாணவர்கள் நல்லக்கருத்துகளைக் கற்றுக்கொள்வதோடு வாழ்விலும் கடைபிடிக்க எண்ணுதல் நல்ல சமூகம் உருவாகும். சமூகத்திற்கு அறநெறிகளில் தேவையானவை எடுத்துரைத்தல்.

பாடநூல்கள்

1. பதிப்பாசிரியர் ச. மெய்யப்பன் - திருக்குறள்
மணிவாசகர் பதிப்பகம், சென்னை- 08.
இரண்டாம் பதிப்பு -2017
2. ச.வே.சுப்பிரமணியன் - நாலடியார்,பழமொழி நானூறு
மணிவாசகர் பதிப்பகம், சென்னை- 08.
இரண்டாம் பதிப்பு -2012
3. இளங்கோவடிகள் - சிலப்பதிகாரம்
டாக்டர் உ.வே.சா. பதிப்பு
2, அருண்மடல் கடற்கலை சாலை
பெசன்ட் நகர், சென்னை
பதினொன்றாம் பதிப்பு -2008
4. சீத்தலைச்சாத்தனார் - மணிமேகலை
டாக்டர் உ.வே.சா. பதிப்பு
2, அருண்மடல் கடற்கலை சாலை
பெசன்ட் நகர், சென்னை
எட்டாம் பதிப்பு -2008
5. சேக்கிழார் - பெரியபுராணம்
முல்லை நிலையம், சென்னை
முதற்பதிப்பு -2010
6. கம்பர் - கம்பராமாயணம்
அண்ணாமலைப் பல்கலைக்கழகம்
வெளியீடு,
7. ச.வே.சுப்பிரமணியன் - தமிழ் இலக்கிய வரலாறு
மணிவாசகர் பதிப்பகம், சென்னை.
முதற்பதிப்பு- 1999

பார்வை நூல்கள்

1. சோ.ந.கந்தசாமி - தமிழ் இலக்கிய வரலாறு
மணிவாசகர் பதிப்பகம், சென்னை.
முதற்பதிப்பு - 2004
2. க.ப. அறவாணன் - அறஇலக்கியக்களஞ்சியம்
தமிழ்க்கோட்டம்
சென்னை, முதற்பதிப்பு - 2000

19IHINC31	BASIC HINDI-III			
III	L	T	P	C
	4	1		5

Learning Objective (LO)

LO1	To study various comedy stories.
LO2	To introduce Indian epics.
LO3	To understand the concepts of drama

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand the basic structure of short stories.
CO2	Knowledge on Mahabharath.
CO3	Describe the basic concepts of human feelings.
CO4	Apply the concepts of comedy in stories.
CO5	Describe the effects of western culture.

Unit - I: Introduction,ekanki.

. Andher Nagari - Bharathendhoo Harishchandra

Unit - II:Mahabharath Ki EkSanj - Bharath BhoosahnAgrwal [Full]

Unit - III:Drama.

3.Ladai - SarveswarDayalSaxeena [Full]

Unit - IV:stories,Tatava-vyanghya

Unit - V:Upstick Ki Muskhan - Vishnu Prabakar [Full]

Current Streams of Thought:The Faculty will impart the current developments in the subject during the semester to the students and this component will not be a part of Examinations.

Text Books

- 1.Andher Nagari - Bharathendhoo Harishchandra, VinodhPustak Mandir, Agra-2
2. PrathinidhiEkanaki - Dr. Dashrath Oojaa, Jawahar Pustakalya, Mathura
3. EkanakiManach - Dr.V.P. Abhithap, Jawahar Pustakalya, Mathura
4. Ladai - SarveswarDayalSaxeena, RajkamalPrakashan, New Delhi

Supplementary Reading

- 1.Hindi natakuthbhavaurvikas-dashrath ojha-rajpal and saons, new Delhi.7.
- 2.hindi natakaurrangmanch-pahachanaurparak-Dr. Indranathmadan, newdelhi.7.

Semester	19IFREC31: FRENCH – III (Option)	L	T	P	C
III		3	0	0	3

Learning Objective (LO)

LO1	Buy some products in a shop
LO2	Ask the news of someone
LO3	Talk about the climate
LO4	Introduce their family

LO5	Talk about their accommodation
------------	--------------------------------

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Ask the price of the product, pay the product
CO2	Ask about their daily activities
CO3	To give and ask information about the climate
CO4	Describe their family
CO5	Describe their accommodation where they live

Unit I

Demander des nouvelles de quelqu'un (les activités de la journée)

Choisir, acheter, payer un objet

Unit II

S'informer sur la présence ou l'existence d'une personne ou d'un objet (Parler d'un logement ; s'orienter, Décrire un trajet, Exprimer un besoin)

S'informer sur l'état physique de quelqu'un

Le temps en France et parler du temps

Unit III

Évaluez-vous

Evasion dans la Poésie

Unit IV

Souvenez-vous (Les moments de la vie)

Demander /donner des informations sur la biographie d'une personne (enchaîner les idées)

Unit V

Demander /donner des informations sur ses relations amicales ou familiales.

Présenter sa famille.

19IENG32	ENGLISH THROUGH LITERATURE III: DRAMA	L	T	P	C
III		3			3

Learning Objective (LO)

LO1	Enhance the conversational competence of the learners by introducing drama in English.
LO2	Make the students the understand characteristics of the Elizabethan Age.
LO3	Make them appreciate Shakespearean drama
LO4	Make them appreciate Shakespearean drama
LO5	Make the students master the mechanics of writing

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Obtain a literary acumen to answer MCQs of NET/SET examinations and other competitive examination
CO2	Appreciate conversational English
CO3	Recognize the dramatic elements of Shakespearean dramas
CO4	Use punctuations and capitals effectively in their composition
CO5	Recognize the elements of the spoken discourses

Unit I

William Shakespeare
Grammar

The Tempest (Act I)
“Phrases and Clauses”

Unit II

William Shakespeare
Grammar

The Tempest (Act II)
“Simple, Compound, and Complex Sentences”

Unit III

William Shakespeare
Grammar

The Tempest (Act III)
“Transformation of Sentences”

Unit IV

William Shakespeare
Grammar

The Tempest (Act IV)
“Sequence of Tenses and Reported Speech”

Unit V

William Shakespeare
Grammar

The Tempest (Act V)
“Punctuation and Capitals”

Text Books:

Semester	19IINF33: Computer Organization and Architecture	L	T	P	C
III		4	0	0	4

Learning Objective (LO)

LO1	To understand the Architecture and Organization of the Computer System.
LO2	To understand what a process is going on the Address modes and Programs.
LO3	To understand different approaches to Memory management Systems.
LO4	Students should be able to how to process going on Input and Output Organizations.
LO5	Students should understand the Computer Instruction, Arithmetic Instruction and Logical Instruction

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand the Organization of Computer and Basic Architecture Components involved in Computer Designs.
CO2	Describe the Central Processing Units system and Address, Arithmetic and Logical Instructions.
CO3	Understand the Organization of Computer and Basic Architecture Components involved in Computer Designs.
CO4	Understand the Addressing methods and Programs of Bus Structure in Computer Systems.

Unit-1

Basic of Computer, Von Neumann Architecture, Generation of Computer, Classification of Computers, Instruction Execution. Register Transfer and Micro operations: Register Transfer, Bus and Memory Transfers, Three-State Bus Buffers, Memory Transfer, Micro-Operations, Register Transfer Micro-Operations, Arithmetic Micro-Operations, Logic Micro-Operations, Shift Micro-Operations.

Unit-2

Stack Organization, Register Stack, Memory Stack, Reverse Polish Notation. Instruction Formats, Three- Address Instructions, Two – Address Instructions, One - Address Instructions,

Zero - Address Instructions, RISC Instructions, Addressing Modes. RISC & CISC and their characteristics.

Unit-3

Addition And Subtraction With Signed-Magnitude, Multiplication Algorithm, Booth Multiplication Algorithm, Array Multiplier, Division Algorithm, Hardware Algorithm, Divide Overflow, Floating-Point Arithmetic Operations, Decimal Arithmetic Operations, BCD Adder, BCD Subtraction.

Unit-4

Modes Of Transfer, Priority Interrupt, DMA, Input-Output Processor (IOP), CPU-IOP Communication. Memory Organization: Memory Hierarchy, Main Memory, Auxiliary Memory, Cache Memory, Virtual Memory, Associative Memory.

Unit-5

Control memory – Address sequencing – Design of Control unit. Pipelining: Parallel Processing, Pipelining - Arithmetic Pipeline, Instruction Pipeline. Multiprocessors: Characteristics of Multiprocessors, Interconnection Structure: Time-Shared Common Bus, Multi-Port Memory, Crossbar Switch, Multistage Switching Network, Hypercube Interconnection.

Current Streams of thought: Parallel processing architectures and challenges, Hardware multithreading, Multicore and shared memory multiprocessors, Introduction to Graphics Processing Units, Clusters and Warehouse scale computers – Introduction to Multiprocessor network topologies.

Semester	19IINFC34: Basics of Information Technology	L	T	P	C
III		4	0	0	4

Learning Objective (LO)

LO1	Give students an in-depth understanding of why computers are essential components in business, education and society.
LO2	Introduce the fundamentals of computing devices and reinforce computer vocabulary, particularly with respect to personal use of computer hardware and software, the Internet, networking and mobile computing.
LO3	Provide hands-on use of Microsoft Office 2013 applications Word, Excel, Access and PowerPoint. Completion of the assignments will result in MS Office applications knowledge and skills.
LO4	To get familiar with basics of the Internet Programming.
LO5	To acquire knowledge and skills for creation of web site considering both client and server side programming.
LO6	To explore different web extensions and web services standards and ability to develop responsive web applications.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Describe the usage of computers and why computers are essential components in business and society.
CO2	Analyse common business problems using appropriate Information Technology applications and systems.
CO3	Learn categories of programs, system software and applications. Organize and work with files and folders and utilize the Internet Web resources and

	evaluate on-line e-business system.
CO4	Understand a responsive web site using HTML5 and demonstrate Rich Internet Application.
CO5	Develop various types of networks, network standards and communication software.

Unit-1

Introduction to computers:- Introductions, History, Generation of computers, Input, Output Devices – Computers Peripherals, Hardware devices – Software – Operating systems – Application software – Networking – Windows OS – Windows NT and its features – Linux History – Architecture – Visual editor.

Unit-2

Personal productivity software:- Introduction – MS-office 2000 – MS-word – MS-Excel – MS-Access – MS-Powerpoint and its utilities.

Unit-3

Multimedia:- Introduction – Elements – Features – Application-Image, Video, Audio Editing.

Desktop Publishing:- Introduction-Word processing package – Operations – Desktop publishing systems and packages – Data communication packages – Email systems.

Computer Networking:- Introduction – LAN-WAN-connectivity options – Layers – Networking devices – Topology – Protocols.

Unit-4

Internet:- Introduction – ISP Domain name systems – ISDN-PP-TSP/IP – Types of browsers.

Email:- Fundamentals – Email server & Clients – Email address – Internet tools – Concepts of FTP usage – Web page creation – Tools for web development.

HTML:- Introduction – Structure & creation of HTML page – Formatting – Hyperlink creation – FTP sites.

Unit-5

Management Information systems:- Introduction – MIS design – Planning – Centralization – Decentralization – Decision support systems- organizing MIS department.

Programming Languages:- Introduction – Generation – Machine, Assembly and Programming languages – Data types – Variables- Programming statements – functions – structures – arrays – pointers. Tamil Word Processor:- Introduction – Ponmozhi and Padhami software – Tamil browsers – Tamil Email.

Current Streams of thought: Computer & Internet Security

Identify different types of spyware, malware and adware; Evaluate computer/Internet security processes and threat prevention methods; ensure that privacy is safe when using computer systems or navigating the Internet.

Semester	19IINFC35: Programming in Java	L	T	P	C
III		4	0	0	4

Learning Objective (LO)

LO1	To introduce the basic features of Java
LO2	To educate JAVA Programming structure, Virtual Machine concept etc.,
LO3	To introduce java classes and java applets

LO4	To educate inheritance, exception handlings and Threads.
LO5	To educate the design of web pages.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Learn declare and define the data type with scope of the variables and methods.
CO2	Understand and define the modules, classes, subclasses and methods.
CO3	Describe a package using inheritance and interface.
CO4	Analyse and divide the system into various subsystems and apply the multithreading concepts. Also the student can be able to operate file handling mechanisms.
CO5	Develop GUI based applications using Applet and Swing.

Unit-1

Genesis of Java: Creation of Java – why java is important to internet – The Java Buzz words – An overview of Java Object Oriented Programming. Data types – Variables – Type conversion and casting – Automatic type promotion in Expressions – Strings. Arrays: One Dimensional Array – Multi Dimensional Array – Operators – Control statements.

Unit-2

Class Fundamentals – Declaring objects – Assigning object Reference variables – Introducing Methods – Constructors – Garbage collection – Finalize () Method – Stack class. A Closer Look at Methods and classes: Overloading Methods – Argument passing – Nested and Inner classes – String class – Using command line arguments. Inheritance Basics & Types - Method overriding – Dynamic Method Dispatch – Using Abstract class – Using final with inheritance.

Unit-3

Packages & Interface - Exception Handling - Creating your own Exception subclasses. Multithreaded Programming: Java Thread Model – Main Thread – Creating a Thread - Creating Multiple Threads–Using is Alive () and join () – Thread priorities – Synchronization – Inter thread Communication.

Unit-4

I/O &Applets : I/O Basics Reading console Input – writing console output – The Print Writer class – Reading and Writing Files. The Applet class: - Applet Architecture – Applet Skeleton – Applet Display method – Requesting Repainting – HTML APPLET tag- Passing Parameters to Applet – Audio Clip Interface. Event Handling Mechanisms – Delegation Event Model – Event classes – Sources of Events – Event Listener Interfaces – Adapter Classes.

Unit-5

AWT Classes – Window fundamentals – working with Frame Windows - working with Graphic
 Using AWT controls: Controls fundamentals – Labels – using Buttons – Applying check Boxes –
 Check Box group – Choice controls – Using a Text field – Using a Text Area – Understanding
 Layout Managers (Flow Layout only) – Menu Bars and Menus.

Current Streams of thought: Networks basics - Socket Programming - Proxy Servers -
 TCP/IP Sockets - Net Address - URL - Datagrams - Working with windows using AWT Classes -
 AWT Controls - Layout Managers and Menus.

Semester	19IINFP36: Practical – IV: Java Programming Lab	L	T	P	C
III		0	0	4	2

Learning Objective (LO)

LO1	To teach the basics of JAVA programs and its execution.
LO2	To teach the differences between C++ and Java programming.
LO3	To educate learn concepts like packages, applets and interfaces.
LO4	To understand the life cycle of the applets and its functionality.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand Android platform, Architecture and features.
CO2	Design User Interface and develop activity for Android App.
CO3	Describe Use Intent, Broadcast receivers and Internet services in Android App.
CO4	Design and implement Database Application and Content providers.

List of Exercises

Define a class called Student with the attributes name, reg_number and marks obtained in four subjects(m1,m2,m3,m4).Write a suitable constructor and methods to find the total mark obtained by the student and display the details of the student.

Write a Java program to find the area of a square, rectangle and triangle by

- (i) Overloading Constructor (ii) Overloading Method.

Write a java program to add two complex numbers. [Use passing object as argument and return object].

Define a class called Student_super with data members name, roll number and age. Write a suitable constructor and a method output () to display the details.

Derive another class Student from Student_super with data members height and weight. Write a constructor and a method output () to display the details which overrides the super class method output().[Apply method Overriding concept].

Write a java program to create an interface called Demo, which contains a double type constant, and a method called area () with one double type argument. Implement the interface to find the area of a circle.

Write a java program to create a thread using Thread class.

Demonstrate Java inheritance using extends keyword.

Create an applet with four Checkboxes with labels MARUTI-800, ZEN, ALTO and ESTEEM and a Text area object. The program must display the details of the car while clicking a particular Checkbox.

Write a Java program to throw the following exception,

- 1) Negative Array Size 2) Array Index out of Bounds

Write a java program to create a file menu with option New, Save and Close, Edit menu with option cut, copy, and paste.

Write a java programming to illustrate Mouse Event Handling

Write a Java program to practice String class and its methods

Semester	19IMATA04: Allied III: Resource Management Techniques	L	T	P	C
III		5	0	0	5

Learning Objective (LO):

LO1	Resource management techniques to finds applications in diverse fields including Engineering, Management Science, Computer Science and Economics.
LO2	In this course, the general linear programming problem, simplex computation procedure, revised simplex method, duality problems in linear programming and some nonlinear programming problems, Integer programming problem, transportation and assignment problems, PERT and CPM are also covered. The main objective is to solve varieties of problems.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Model any real life situation into a mathematical model,
CO2	Solve the problem for the required demand,
CO3	Optimize the transportation and assignment of jobs,

CO4	Upgrade their ability in production management through project scheduling and allocation of resources,
CO5	Develop their personnel management through manpower planning and salary administration.

Unit-1:

Linear programming (LP) – principle components of decision problem – operations research (OR) modelling – phases of OR study – LP formulation and graphical solution – resource allocation problem – the simplex method – sensitivity analysis – revised simplex method.

Unit-2:

Duality and networks – definition of dual problem – primal – dual relationships – dual simplex method – post optimality analysis – transportation and assignment models – transshipment models – network minimization – shortest route problems – maximal flow problem.

Unit-3:

Integer programming – cutting plane algorithm, branch and bound method – multistage (dynamic) – programming solution of LP by dynamic programming.

Unit-4:

Classical optimization theory: unconstrained external problem – newton Raphson method – equality constraints – Jacobian method – Lagrangian method – Kuhn tucker conditions – simple problems.

Unit-5:

Project scheduling. network diagram representation – critical path method – time charts and resources levelling – PERT.

Semester-IV இரண்டாம் ஆண்டு - நான்காம் பருவம்

19 ITAMC41	சங்கஇலக்கியமும்செம்மொழிவரலாறும்	L	T	P	C
IV		3			3

கற்பித்தலின் நோக்கம் (Learning Objective (LO))

- ❖ தமிழ்ச் செம்மொழி இலக்கியங்கள் குறித்து அறிமுகம் செய்தல்..
- ❖ செம்மொழி வரலாற்றுடன் அதன் தகுதிபாடுகளுக்கான வரையறைகள் சுட்டப்படும்.
- ❖ சங்க அக, புற இலக்கியங்களின் தனித்தன்மைகளை உணர்த்தல்.
- ❖ பத்துப்பாட்டு இலக்கியங்களில் நெடுநல்வாடை வழிப் பண்பாட்டைச் சுட்டிக் காட்டல்.
- ❖ தமிழின் பயன்பாடும் தேவையும் எடுத்துக்காட்டுகளுடன் விளக்குதல்.

Course Outcomes

At the end of the course, the student will be able to

CO1:	சங்க அக இலக்கியங்களைத் திணை அடிப்படையில் ஆராய்ந்து கற்கும் திறன்.
CO2:	புற இலக்கியங்களில் பெண்பாற் புலவர்களின் புலமையை அறியும் ஆற்றல்
CO3:	நெடுநல்வாடை வழி இலக்கியங்களில் இயற்கைப் பெறுமிடத்தைச் சுட்டுவர்
CO4:	சங்க இலக்கியங்களின் வகைமை, வடிவம், உள்ளடக்கம் குறித்த அறிவைப் பெற்றிருப்பர்
CO5:	தொல்காப்பியம் என்னும் தனித்துவமான இலக்கணத்தை விவரிக்கும் திறன்

அலகு - 1 அக இலக்கியங்கள்

- | | | | | |
|----|-------------|---|-------------------------|------------|
| 1. | குறுந்தொகை | - | 125, 128, 177, 303, 397 | (நெய்தல்) |
| 2. | நற்றிணை | - | 206, 217, 304, 334, 383 | (குறிஞ்சி) |
| 3. | ஐங்குறுநூறு | - | 17, 18, 71, 75, 96, | (மருதம்) |
| 4. | அகநானூறு | - | 147, 303, 371 | (பாலை) |
| 5. | கலித்தொகை | - | 104, 105 | (முல்லை) |

அலகு - 2

- | | |
|------------------|--|
| புற இலக்கியங்கள் | |
| 1. புறநானூறு | - பெண்பாற்புலவர்கள்
66, 83, 112, 140, 187,
226, 269, 271, 278, 290 |

அலகு - 3 பத்துப்பாட்டு

- | |
|-----------------|
| 1. நெடுநெல்வாடை |
|-----------------|

அலகு - 4 சங்க இலக்கிய வரலாறு

தொல்காப்பியம் - சங்க காலம் - முற்சங்கங்கள் - பாட்டும் தொகையும் - தொகுப்புமுறை - தனித்தன்மைகள்.

அலகு - 5 பயன்பாட்டுத் தமிழும் செம்மொழி வரலாறும்

மொழி விளக்கம் - மொழிக்குடும்பங்கள் - உலகச் செம்மொழிகள் - இந்தியச் செம்மொழிகள் - செம்மொழித் தகுதிகள் - வரையறைகள் - வாழும் செம்மொழித் தமிழ் -

தமிழின் தொன்மை - தமிழின் சிறப்புக்கள் - தமிழ்ச் செம்மொழி நூல்கள் - தமிழ் செம்மொழி அறிந்தேற்பு - பரிதிமாற்கலைஞர் முதல் தற்கால அறிஞர்கள் வரை (அறிஞர்கள் - அமைப்புகள் - நிறுவனங்கள் - இயக்கங்கள் தொடர்முயற்சிகள் - அறப்பேராட்டங்கள் - உலகத் தமிழ்ச் செம்மொழி மாநாடு, கோவை-2010)

அலகு - 6

(மாணவர்கள் அறிந்துகொள்வதற்கு மட்டும் - தேர்வுக்கான பகுதி அல்ல)

பண்டைய தமிழ் மரபுகளையும் சமூக அமைப்புகளையும் விளக்குதல், தமிழ் மொழியில் தனித்துவத்தையும் செம்மொழி இயல்புகளையும் சங்க இலக்கியங்களின் துணைக்கொண்டு விளக்குதல். சங்கப் பனுவல்களில் பொதுமைத்தன்மையையும் அவற்றின் சிறப்பியல்புகளையும் விளக்குதல்.

பாட நூல் :

1. ச.வே.சுப்பிரமணியன் (ப.ஆ) - குறுந்தொகை, நற்றினை, ஐங்குறுநூறு, " அகநானூறு, கலித்தொகை, மணிவாசகர் பதிப்பகம், சென்னை இரண்டாம் பதிப்பு -2011
2. ச.வே.சுப்பிரமணியன் (ப.ஆ) - புறநானூறு, மணிவாசகர் பதிப்பகம், சென்னை இரண்டாம் பதிப்பு -2011
3. ச.வே.சுப்பிரமணியன் (ப.ஆ) - பத்துப்பாட்டு (நெடுநல்வாடை) மணிவாசகர் பதிப்பகம், சென்னை இரண்டாம் பதிப்பு -2011
4. தெ.பொ.மீனாட்சி சுந்தரம் - சங்க மொழி வரலாறு நியூசெஞ்சரி, புத்தக நிலையம் முதற்பதிப்பு -2018
5. மணவை முஸ்தபா - செம்மொழி உள்ளும் புறமும் சீதை பதிப்பகம், சென்னை முதற்பதிப்பு -2010
6. ச.வே.சுப்பிரமணியன் - சங்க இலக்கியம் மணிவாசகர் பதிப்பகம், சென்னை இரண்டாம் பதிப்பு -2011
7. மு.வரதராசன் - தமிழ் இலக்கிய வரலாறு, சாகித்திய அகாதெமி வெளியீடு, புதுதில்லி மூன்றாம் பதிப்பு- 2015

19IHINC41	BASIC HINDI-- IV	L	T	P	C
1V		4	1		5

Learning Objective (LO)

LO1	To learn the important poems of famous Hindi poets.
LO2	To imbibe the knowledge of writing in Premchand stories.
LO3	To understand the relation between poems and stories.
LO4	To gain knowledge on stories of BeeshmaSahini

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand the concepts of Hindi poems.
CO2	Knowledge on stories of Premchand.
CO3	Describe the basic concepts of hindi stories.
CO4	Apply the concepts of writings of Jai sankar Prasad.
CO5	Understand the writing style of BeeshmaSahini.

Unit - I: Introduction, Poem

.Kabeer - 1 To 10 DohasTulasi - 1 To 10 Dohas.

Unit - II:Rahim - 1 To 10 Dohas

Unit – III: Edgaah - Premchand. Madhuva -Jayashankar Prasad.

Unit - IV:stories,

Unit - V:7. HANUMAN JI ADHALATH ME - HARISHAKNA PARSAYE

Current Streams of Thought: The Faculty will impart the current developments in the subject during the semester to the students and this component will not be a part of Examinations.

Text Books

Semester		19IFREC41: FRENCH – IV (Option)															L	T	P	C
IV																	3	0	0	3

Learning Objective (LO)

LO1	Draw a France map and name its regions and cites.
LO2	Fix an appointment
LO3	Draw a person physically and name its parts.
LO4	Draw a France map and name its regions and cites.
LO5	Fix an appointment

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Describe a country
CO2	Take an appointment with a doctor or with friends, etc.
CO3	Express in which part of the body they have pain
CO4	Describe a person physically and mentally
CO5	Ask others about how they are feeling using expressions such as 'Qu'est-ce que tu as? Oùest-ce que tu as mal?'

Unit I

Faire un bilan du sondage

Aborder quelqu'un (Parler de moyens de communication)

Unit II

Faire valoir son droit

Exprimer une opinion sur la vérité d'un fait.

Savoir-vivre en France

Unit III

Donner un conseil

Téléphoner /Prendre rendez-vous

Unit IV

Exposer un problème/ réagir

Parler du corps et des problèmes de santé

Unit V

Parler des qualités et des défauts des personnes

Demander / donner une explication

décrire une personne

Evaluez-vous

Semester	19IENG42 - ENGLISH THROUGH LITERATURE IV: SHORT STORY	L	T	P	C
IV		3			3

Learning Objective (LO)

LO1	Develop the communicative competence of learners in the English Language through training them in the skills of listening, speaking, reading, and writing
LO2	Enable the students to know about the origin and development of short story
LO3	Write objectively, avoiding vagueness, prejudice, and exaggeration
LO4	Enable the learner to function through the written mode of English language in all
LO5	Discover an author's purpose, and draw conclusions about certain events, evaluating cause and effect, and understanding point of view.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Use more vocabularies while writing
CO2	Ensure about the history and development
CO3	Develop a flow in writing
CO4	Come up with new ideas while reading stories from different perspectives
CO5	Write in a style appropriate for communicative purposes

Unit I

- | | |
|-------------|------------------------|
| 5. O' Henry | "The Gift of The Magi" |
| 6. Ken Liu | "The Paper Menagerie" |
| Grammar | Synonyms and Antonyms |

Unit II

- | | |
|----------------------|----------------------|
| 1. Flora Annie Steel | "Valiant Vicky" |
| 2. Oscar Wilde | "Happy Prince" |
| Grammar | Words often confused |

Unit III

- | | |
|-------------------|-----------------------|
| 1. R. K. Narayan | "The Martyr's Corner" |
| 2. Mahasweta Devi | "Draupati" |
| Grammar | Paragraph-Writing |

Unit IV

- | | |
|---------------------|----------------------------------|
| 1. Leo Tolstoy | "How much Land Does a Man Need?" |
| 2. Somerset Maugham | "The Verger" |
| Grammar | Letter-Writing |

Unit V

- | | |
|--------------------|----------------|
| 1. Langston Hughes | "On the Road" |
| 2. Premchand | "Bakthi Marg" |
| Grammar | Precis-Writing |

Semester	19IINFC43: Web Technology	L	T	P	C
IV		4	0	0	4

Learning Objective (LO)

LO1	To learn about HTML, DHTML concepts.
LO2	To implement a variety of presentation effects in HTML.
LO3	To understand the concepts of client-side applications.
LO4	To gain the Knowledge of XML and its applications.
LO5	To know about java scripts and create adaptive web pages

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Acquire knowledge on the concepts of HTML and DHTML.
CO2	Able to create web documents by implementing various presentation effects using HTML.
CO3	Able to develop applications using client-side scripting
CO4	Understand the uses of XML and able to develop applications which uses XML to store and transfer the data.
CO5	Develop websites which contains adaptive web pages

Unit-1

Structuring Documents for the Web: Introducing HTML and XHTML, Basic Text Formatting, Presentational Elements, Phrase Elements, Lists, Editing Text, Core Elements and Attributes, Attribute Groups. Links and Navigation: Basic Links, Creating Links with the <a> Element,

Advanced E- mail Links. Images, Audio, and Video: Adding Images Using the Element, Using Images as Links Image Maps, Choosing the Right Image Format, Adding Flash, Video and Audio to your web pages.

Unit-2

Tables: Introducing Tables, Grouping Section of a Table, Nested Tables, Accessing Tables. Forms: Introducing Forms, Form Controls, Sending Form Data to the Server. Frames: Introducing Frameset, <frame> Element, Creating Links Between Frames, Setting a Default Target Frame Using <base> Element, Nested Framesets, Inline or Floating Frames with <iframe>.

Unit-3

Cascading Style Sheets: Introducing CSS, Where you can Add CSS Rules. CSS Properties: Controlling Text, Text Formatting, Text Pseudo Classes, Selectors, Lengths, Introducing the Box Model. More Cascading Style Sheets: Links, Lists, Tables, Outlines, The :focus and :activate Pseudo classes Generated Content, Miscellaneous Properties, Additional Rules, Positioning and Layout wit, Page Layout CSS , Design Issues.

Unit-4

Java Script: How to Add Script to Your Pages, Variables and Data Types – Statements and Operators, Control Structures, Conditional Statements, Loop Statements – Functions - Message box, Dialog Boxes, Alert Boxes, Confirm Boxes, Prompt Boxes.

Unit-5

Working with JavaScript: Practical Tips for Writing Scripts, JavaScript Objects: Window Object - Document object - Browser Object - Form Object - Navigator object Screen object - Events, Event Handlers, Forms – Validations, Form Enhancements, JavaScript Libraries.

<p>Current Streams of thought: Progressive web apps (PWA) and accelerated mobile pages (AMP), WebAssembly</p>

Semester	19IINFC44: Relational Data Base Management System	L	T	P	C
IV		4	0	0	4

Learning Objective (LO)

LO1	Understand the basic database concepts, including the database languages, Structure, Architecture and operations of the Relational database.
LO2	Construct simple and moderately advanced database queries using Structured Query Language (SQL).
LO3	To apply Relational Database design principles
LO4	To Understand the concepts of Indexing and Hashing,
LO5	To understand the concepts of serializability, concurrency and Deadlock handling.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Learned the concepts like Database, Database languages, Architecture and operations of the relational database.
CO2	Able to construct simple and advanced queries using SQL.
CO3	Acquire knowledge on design principles of Relational Databases.
CO4	Learned the Indexing and Hashing concepts.
CO5	Apply the concepts of serializability, concurrency and Deadlock handling in

Unit-1

Introduction: Database System Applications-DBMS Vs. File System - View of Data-Data Model Database Languages - Database users and Administrators - Transaction Management - Database System Structure - Application Architecture. Data Models: Basic Concepts - Constraint- Keys- ER Diagram - Weak Entity - Extended ER Features - UML; Relational Model: Structure of Relational Databases - Relational Algebra - Views.

Unit-2

SQL: Background-Basic Structure-Set Operation-Aggregate Function-Null Values-Nested Sub Queries - Views - Modification of the Database - Data Definition Language - Embedded SQL - Dynamic SQL.

Unit-3

Advance SQL : Integrity and Security: Domain - Constraint - Referential Integrity - assertions - Triggers - Security and Authorization - Authorization in SQL - Encryption and Authentication.

Unit-4

Relational Database Design: First Normal Form - Pitfalls in Relational Database Design- Functional Dependencies (Second Normal Form) - Boyce-Codd Normal Form - Third Normal Form - Fourth Normal Form - Overall Database Design Process.

Unit-5

Transaction Management: Transaction concepts - States - Serializability. Lock based concurrency control: Locks - Granting - Two-Phase Locking protocol. Time stamp-based protocol: Timestamps - Timestamp ordering protocol - Dead lock handling.

Current Streams of thought: Databases that bridge SQL/NoSQL – Databases in the cloud as a service

Semester	19IINFC45: System Software	L	T	P	C
IV		4	0	0	4

Learning Objective (LO)

LO1	To introduce software systems with an emphasis on operating system.
LO2	To identify and understand different phases and passes of Assembler and their functioning.
LO3	To understand the basic concepts of linker, loader, interpreter, editor and debugger.
LO4	To understand the basic macro processor functions, Machine-independent macro processor features, macro expansion and MASM macro processor.
LO5	To study System Software Tools.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand the concepts of system softwares like operating systems, device
------------	--

	drivers, compilers, interpreters and firmwares.
CO2	Acquire knowledge in the different phases and passes of assembler and their functions.
CO3	understand the basic concepts of linker, loader, interpreter, editor and debugger.
CO4	Analyze the macro and MASM processor functions.
CO5	Understand the principles of system software tools.

Unit-1

The Simplified Instructional Computer (SIC) - Machine architecture - Data and instruction formats - addressing modes - instruction sets - I/O and programming.

Unit-2

A simple SIC assembler – Assembler algorithm and data structures - Machine dependent assembler features - Instruction formats and addressing modes – Program relocation - Machine independent assembler features - Literals – Symbol-defining statements – Expressions - One pass assemblers and Multi pass assemblers - Implementation example - MASM assembler.

Unit-3

Design of an Absolute Loader – A Simple Bootstrap Loader - Machine dependent loader features - Relocation – Program Linking – Algorithm and Data Structures for Linking Loader - Machine-independent loader features - Automatic Library Search – Loader Options - Loader design options - Linkage Editors – Dynamic Linking – Bootstrap Loaders - Implementation example - MSDOS linker

Unit-4

Macro Definition and Expansion – Macro Processor Algorithm and data structures - Machine-independent macro processor features - Concatenation of Macro Parameters – Generation of Unique Labels – Conditional Macro Expansion – Keyword Macro Parameters-Macro within Macro-Implementation example - MASM Macro Processor – ANSI C Macro language.

Unit-5

Overview of the Editing Process - User Interface – Editor Structure - Interactive debugging systems - Debugging functions and capabilities – Relationship with other parts of the system – User-Interface Criteria.

Current Streams of thought: Cross-Platform development – Internet of things

Semester	19IINFP46: Practical-V: Web Technology Lab	L	T	P	C
IV		0	0	4	2

Learning Objective (LO)

LO1	To design web pages using various HTML tags
LO2	To write simple programs in Java Script to create forms.
LO3	To understand the importance of cascade style sheets in creating a web application.
LO4	To understand the use of XML in web applications.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Develop to build a complete website using HTML
CO2	Create web pages which implements client side scripting.
CO3	Able to implement various styles for the web page using CSS.
CO4	Develop a simple web application using XML which used to store and

transmit the data over the network

List of Exercises

1. Create a form having number of elements (Textboxes, Radio buttons, Checkboxes, and so on). Write JavaScript code to count the number of elements in a form.
2. Create a HTML form that has number of Textboxes. When the form runs in the Browser fill the textboxes with data. Write JavaScript code that verifies that all textboxes has been filled. If a textboxes has been left empty, popup an alert indicating which textbox has been left empty.
3. Develop a HTML Form, which accepts any Mathematical expression. Write JavaScript code to Evaluates the expression and Displays the result.
4. Create a page with dynamic effects. Write the code to include layers and basic animation.
5. Write a JavaScript code to find the sum of N natural Numbers. (Use user-defined function)
6. Write a JavaScript code block using arrays and generate the current date in words, this should include the day, month and year.
7. Create a form for Student information. Write JavaScript code to find Total, Average, Result and Grade.
8. Create a form for Employee information. Write JavaScript code to find DA, HRA, PF, TAX, Gross pay, Deduction and Net pay.
9. Create a form consists of a two Multiple choice lists and one single choice list
(a)The first multiple choice list, displays the Major dishes available
(b)The second multiple choice list, displays the Starters available.
(c)The single choice list, displays the Soft drinks available.
10. Create a web page using two image files, which switch between one another as the mouse pointer moves over the image. Use the on Mouse Over and on Mouse Out event handlers.

Outcome Mapping

Semester	19IINFP47: Practical – VI: SQL and PL/SQL Lab	L	T	P	C
----------	---	---	---	---	---

IV		0	0	4	2
-----------	--	----------	----------	----------	----------

Learning Objective (LO)

LO1	To describe a sound introduction to the discipline of database management systems.
LO2	To give a good formal foundation on the relational model of data and usage of Relational Algebra.
LO3	To introduce the concepts of basic SQL as a universal Database language.
LO4	To enhance knowledge in DDL, DML and DCL commands
LO5	To design the effective database models.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Identify the data types, draw appropriate conceptual models, design database structure, and forms.
CO2	Implement simple database systems using relational database concepts.
CO3	Understand the needs of Structured Query Language.
CO4	Acquire knowledge in DDL, DML and DCL methods in Business data models.
CO5	Able to develop database models which implements normalization and decomposition techniques.

List of Exercises

- Data Definition of Base Tables.
- DDL with Primary key constraints
- DDL with constraints and verification by insert command
- Data Manipulation of Base Tables and Views
- Demonstrate the Query commands
- Write a PL/SQL code block that will accept an account number from the user and debit an amount of Rs. 2000 from the account if the account has a minimum balance of 500 after the amount is debited. The Process is to fired on the Accounts table.
- Write a PL/SQL code block to calculate the area of the circle for a value of radius varying from 3 to 7. Store the radius and the corresponding values of calculated area in a table Areas. Areas – radius, area.
- Write a PL/SQL block of code for reversing a number. (Example : 1234 as 4321).

Semester	19IMATA02: Allied-IV: MATHEMATICS – II	L	T	P	C
IV		5	0	0	5

Learning Objective (LO): In this paper the student is exposed to the idea of integration and different methods of integration. The application of integration to the evaluation of areas and volumes is also introduced. The notion of vector and its derivative is also taught. The notion of line integral, surface integral and volume integral using vectors is also studied and the verification of three basic theorems of vector calculus namely Green's theorem, Gauss divergence theorem and Stoke's theorem are carried out.

Course Outcomes:

Every student shall get a good exposure in

CO1:	basic mathematical concepts related to the science field
CO2:	problem solving
CO3:	applications of mathematics
CO4:	understanding the application of vector calculus

Unit-1: Integration

Introduction, Definite integral, Methods of integration, Integrals of the form

$$\int \frac{f'(x)}{f(x)} dx$$

$$\int F\{f(x)\}f'(x) dx$$

$$\int \frac{dx}{ax^2 + bx + c} dx$$

$$\int \frac{lx + m}{ax^2 + bx + c} dx$$

$$\int \frac{1}{\sqrt{ax^2 + bx + c}}$$

$$\int \frac{px + q}{\sqrt{ax^2 + bx + c}} dx$$

Unit-2: Integration

Properties of definite integrals, Integration by parts, Reduction formula for the following types

$$I_n = \int x^n e^{ax} \quad \text{S } n \rightarrow +\text{ve integer}$$

$$I_n = \int \cos^n x dx \quad n, \text{ positive integer}$$

$$I_n = \int \sin^n x dx$$

$$I_{m,n} = \int \sin^m x \cos^n x dx \text{ Bernoulli's formula.}$$

Unit-3:

Area under plane curves, Area of a closed curves, Area between two intersecting curves, Areas in polar coordinates, Volume of the solid of revolution, Length of a curve, Area of surface of revolution.

Unit-4:

Vector differentiation, Scalar functions, Vector functions, Differentiation of a vector, Differentiations formulas, Differentiation of dot and cross products, The Vector differential operator Del, Gradient of a scalar function, Directional derivatives, Divergence of a vector, Curl of a vector, Expansion formulae, Second order differential operators, Solenoidal and irrotational fields.

Unit-5:

Vector integration, The line integral, Green's theorem in two dimesions-verification, Gauss divergence theorem (without proof)-verification and evaluation of integrals, Stoke's theorem (without proof)-verification and evaluation of integrals.

Text Book:

1. Content and treatment as in the book "Calculus (Major)" Vol. II by S. Narayanan and T.K. Manicavachogam Pillay, S. Viswanathan Printers, 2003.
 - Unit I Chapter 1 Sections 1 to 8
 - Unit II Chapter 1 Sections 11 to 15.1
 - Unit III Chapter 2 Sections 1.1 to 1.4, Sections 3 to 5
2. Content and treatment as in the book "Vector Calculus and Fourier Series" by M.K. Venkataraman and Manorama Sridhar, by The National Publishing Company, 2002.
 - Unit IV Chapter 2 Sections 2.2 to 2.4, 2.6, 2.7.
Chapter 3 Sections 3.2, 3.3, 3.4, 3.7, 3.9, 3.11, 3.12, 3.15.
 - Unit V Chapter 4 Sections 4.1, 4.3, 4.9 and 4.12

Supplementary Reading:

1. G.B.Thomas and R.L.Finney. (1998) Calculus and Analytic Geometry, Addison Wesley (9th Edn), Mass. (Indian Print).
2. M.K.Venkataraman. (1992) Engineering Mathematics-Part B. National Publishing Company, Chennai.
3. P.R.Vittal. (2004) Vector Calculus, Fourier series and Fourier Transform. Margham Publications, Chennai.
4. B.S. Grewal (2008) Higher Engineering Mathematics, Khanna Publishers, (2008).

THIRD YEAR: FIFTH SEMESTER

Semester	19IINFC51: Software Engineering	L	T	P	C
V		4	0	0	4

Learning Objective (LO)

LO1	To understand the various software engineering models.
LO2	To understand the approaches of developing software.
LO3	To identify the risks in software development.
LO4	To understand and collect the requirements of software engineering.
LO5	To understand the design concepts, testing methods and strategies.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Learned the various software engineering models.
CO2	Analyze the various approaches of software development.
CO3	Understand the risks in the software development.
CO4	Analyze the requirements of software engineering.
CO5	Implement the design concepts, testing methods and strategies

Unit-1

Introduction - Software Engineering Discipline - Evolution and Impact - Programs vs Software Products. Software Life Cycle Models: Use of a Life Cycle Models - Classical Waterfall Model - Iterative Waterfall Model - Prototyping Model - Evolutionary Model - Spiral Model. Software Project Management: Responsibilities of a Software Project Manager - Project Planning - Metrics for Project Size Estimation - Project Estimation Techniques -Risk Management.

Unit-2

Requirements Analysis and Specification: Requirements Gathering and Analysis -Software Requirements Specification (SRS) - Formal System Development Techniques. Software Design: Characteristics of a Good Software Design - Cohesion and Coupling -Neat Arrangement - Software Design Approaches.

Unit-3

Function-Oriented Software Design: Overview of SA/SD Methodology - Structured Analysis - Data Flow Diagrams (DFDs).Object Modeling Using UML: Overview of Object-Oriented Concepts - UML Diagrams - Use Case Model - Class Diagrams - Interaction Diagrams - Activity Diagrams - State Chart Diagram.

Unit-4

User Interface Design: Characteristics of a Good User Interface - Basic Concepts - Types of User Interfaces - Component-Based GUI Development; Coding and Testing: Coding - Testing - UNIT Testing - Black-Box Testing - White-Box Testing - Debugging -Integration Testing - System Testing.

Unit-5

Software Reliability and Quality Management: Software Reliability - Statistical Testing -Software Quality - Software Quality Management System - ISO 9000.Computer Aided Software Engineering: CASE Environment - CASE support in Software Life Cycle - Characteristics of CASE Tools - Architecture of a CASE Environment. Software Maintenance: Characteristics of Software Maintenance - Software Reverse Engineering - Software Maintenance Process Models - Estimation of Maintenance Cost. Software Reuse: Issues in any Reuse Program - Reuse Approach

Current Streams of thought: Continuous Delivery and Deployment – Low-Code Development

Semester		19IINFC52: Operating System															L	T	P	C
V																	4	0	0	4

Learning Objective (LO)

LO1	To understand the concepts, operation, design, implementation and services of an operating system.
LO2	To understand the structure and computing environment of the system.
LO3	To understand the concepts of process and its operations and how to synchronize and schedule the process. The methods of deadlock and its characterization were taught.
LO4	To understand the different approaches to memory management.
LO5	To understand the mass storage structure and how to schedule the disk. The structure and organization of the file

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand the structure the OS and basic architectural components involved in OS design.
CO2	Understands the concepts of operating structure and how to design and implement the computing environment of the system.
CO3	Understands the concept of scheduling for process and how to avoid the dead lock situations for the process.

CO4	Finding the ways to manage the memory and how to utilize the memory effectively.
CO5	Learned about mass storage structure, disk scheduling and file organization.

Unit-1

Introduction - History of operating system- Different kinds of operating system –Operating system concepts - System calls-Operating system structure.

Unit-2

Processes and Threads: Processes - threads - thread model and usage - inter process communication.

Unit-3

Scheduling - Memory Management: Memory Abstraction - Virtual Memory - Page replacement algorithms.

Unit-4

Deadlocks: Resources- introduction to deadlocks - deadlock detection and recovery - deadlocks avoidance - deadlock prevention. Multiple processor system: multiprocessors - multi computers.

Unit-5

Input / Output: principles of I/O hardware - principles of I/O software. Files systems: Files - directories - files systems implementation - File System Management and Optimization.

Current Streams of thought:Real-Time Operating System Trends (RTOS) – Open Source RTOSs

Semester	19IINFC53: Programming in Python	L	T	P	C
V		4	0	0	4

Learning Objective (LO)

LO1	To introduce the programming concepts and techniques.
LO2	To introduce the Python language syntax.
LO3	To learn control statements, loops, functions, and lists.
LO4	To write programs for wide variety problems in maths, science, finance, and games.
LO5	To develop the ability to write database applications in python.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Analyze and design strategies for solving basic programming problems.
CO2	Use primitive data types and statement syntaxes
CO3	Create programs using conditional statements, loops and functions.
CO4	Develop programs to solve a variety of problems in math, science, business, and games.
CO5	Implement database applications using python.

Unit-1

Introduction to Python - Why Python - Installing in various Operating Systems - Executing Python Programs - Basic Programming concepts - Variables, expressions and statements - Input/ Output – Operators.

Unit-2

Conditions - Functions - Arguments - Return values - Iteration - Loops - Strings -Data Structures - Lists - Dictionaries - Tuples - Sequences - Exception Handling.

Semester	19IINF54: Open Source Technology	L	T	P	C
V		4	0	0	4

Learning Objective (LO)

LO1	To introduce Open Source methodologies.
LO2	To make the students to gain experience using open source tools, languages and frameworks to prepare for careers in software development.
LO3	To understand common open source licenses and the impact of choosing a license.
LO4	To be familiar with open source software products and development tools currently available on the market.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand the Open Source Methodologies.
CO2	Have knowledge on software development using open source software tools.
CO3	Acquire knowledge on open source licenses and its impact.
CO4	Know the open source software products available in the market and its uses

Unit-1

Introduction: Open Source, Free Software, Free Software vs. Open Source software, Public Domain Software, FOSS does not mean no cost. History : BSD, The Free Software Foundation and the GNU Project.

Unit-2

Open Source History, Initiatives, Principle and methodologies. Philosophy : Software Freedom, Open Source Development Model Licences and Patents: What Is A License, Important FOSS Licenses (Apache,BSD,GPL, LGPL), copyrights and copylefts, Patents Economics of FOSS : Zero Marginal Cost, Income-generation opportunities, Problems with traditional commercial software, Internationalization

Unit-3

Community Building: Importance of Communities in Open Source Movement-JBoss Community- Starting and Maintaining an Open Source Project - Open Source Hardware

Semester	19IINFP55: Practical - VII: Python Programming Lab	L	T	P	C
V		0	0	4	2

Learning Objective (LO)

LO1	To understand the programming basics in Python Programming
LO2	To understand the object-oriented program design and development in Python Programming
LO3	To understand and be able to use the basic programming principles such as data types, variable, conditionals, loops, array, recursion and function calls.
LO4	To understand file handling in Python.
LO5	To learn the Databases operations in Python

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand the basics of programming using PYTHON.
CO2	Acquire knowledge on object-oriented program design and development using Python.
CO3	Develop Python programs using conditional statements, loops, array and functions.
CO4	Develop applications which implements file handling operations.
CO5	Design and develop applications using database operations

List of Exercises

1. Create a simple calculator to do all the arithmetic operations
2. Write a program to use control flow tools like if.
3. Write a program to use for loop
4. Data structures
 - use list as stack
 - use list as queue
 - tuple, sequence
5. Create new module for mathematical operations and use in your program
6. Write a program to read and write files, create and delete directories

7. Write a program with exception handling
8. Write a program using classes
9. Connect with MySQL and create address book
10. Write a program using string handling and regular expressions
11. Program to parse apache log file

Outcome Mapping

CO/ PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6	PSO7	PSO8

CO4	3				1		3	2			1	3	3			2		

Semester	19IINFP56: Practical – VIII: Open Source Technology Lab	L	T	P	C
V		0	0	4	2

Learning Objective (LO)

LO1	To develop technical solutions for problems using the open source software readily available at free of cost.
LO2	To install WAMP Server.
LO3	Learn programming in PHP.
LO4	To develop application which uses databases for storing the data.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Develop systems for the problems using open source technologies.
CO2	Know the installation procedure for WAMP server.
CO3	Create programs for solving business logic using PHP
CO4	Implement the database models in the web applications..

List of Exercises

1. Create a simple HTML form and accept the user name and display the name through PHP echo statement.
2. Write a PHP script to redirect a user to a different page.
3. Write a PHP function to test whether a number is greater than 30, 20 or 10 using ternary operator.
4. Create a PHP script which display the capital and country name from the given array. Sort the list by the name of the country
5. Write a PHP script to calculate and display average temperature, five lowest and highest temperatures.
6. Create a script using a for loop to add all the integers between 0 and 30 and display the total.
7. Write a PHP script using nested for loop that creates a chess board.
8. Write a PHP function that checks if a string is all lower case.
9. Write a PHP script to calculate the difference between two dates.
10. Write a PHP script to display time in a specified time zone.

Outcome Mapping

Semester	19IINF61: Principles and Practices of Communication Systems	L	T	P	C
VI		4	0	0	4

Learning Objective (LO)

LO1	Learn Basics' Amplitude Modulation System
LO2	Study working Principles of AM,DSBSC, SSB and VSB signals.
LO3	Build skills in FM Transmission Bandwidth., Generation and Demodulation of FM signal.

LO4	Develop the Fundamental of Noise Theory and Performance of continuous Wave Modulation Systems.
LO5	Study working principle of Digital Transmission, Satellite and Optical Communication

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Comprehend the electronic communication system.
CO2	Understand the working principles of AM, DSBSC, SSB and VSB signals.
CO3	Understand the skills in FM Transmission Bandwidth.
CO4	Understand the Fundamental of Noise Theory.
CO5	Know the basic concepts of Digital Transmission, Satellite and Optical Communication

Unit-1

Amplitude Modulation Systems: Review of Spectral Characteristics of Periodic and Non-periodic signals; Generation and Demodulation of AM, DSBSC, SSB and VSB Signals; Comparison of Amplitude Modulation Systems

Angle Modulation Systems: Frequency Translation; Non – Linear Distortion; Phase and Frequency Modulation; Single tone, Narrow Band and Wideband FM; Transmission Bandwidth; Generation and Demodulation of FM Signal, FDM and OFDM.

Unit-2

Fundamentals of Noise Theory: Review of Probability, Random Variables and Random Process; Gaussian Process Shot noise, Thermal noise and white noise; Narrow band noise, Noise margin; Noise temperature; Noise Figure

Performance of Continuous Wave Modulation Systems: Super heterodyne Radio receiver and its characteristic; SNR; Noise in DSBSC systems using coherent detection; Noise in AM system using envelope detection Envelop Detection for FM; FM threshold effect; Pre-emphasis and De-emphasis in FM; Comparison of performances.

Unit-3

Digital Communication: Introduction, Shannon limit for information capacity, digital amplitude modulation, frequency shift keying, FSK bit rate and baud, FSK transmitter, BW consideration of FSK, FSK receiver, phase shift keying –binary phase shift keying QPSK, Quadrature Amplitude modulation, bandwidth efficiency, carrier recovery types- squaring loop, Costas loop, DPSK.

Unit-4

Digital Transmission: Introduction, Pulse modulation, PCM sampling, sampling rate, signal to quantization noise rate, companding analog and digital percentage error, delta modulation,

adaptive delta modulation, differential pulse code modulation, pulse transmission types- Intersymbol interference, eye patterns.

Unit-5

Satellite and Optical Communication: Satellite Communication Systems Keplers Law, LEO and GEO Orbits, footprint, Link model-Optical Communication Systems-Elements of Optical Fiber Transmission link, Types, Losses, Sources and Detectors

Current Streams of thought: Use of different modulation and demodulation techniques used in analog communication ,Identify and solve basic communication problems 3. Analyze transmitter and receiver circuits

Textbook

Semester	19IINFC62: Mobile Computing	L	T	P	C
VI		4	0	0	4

Learning Objective (LO)

LO1	To understand of mobile computer systems particularly in the context of wireless network systems
LO2	To emphasizes how to interface hardware to mobile computing devices
LO3	To learn the concepts of Mobile computing
LO4	To explore theoretical issues of Mobile computing
LO5	To develop skills of finding solutions and build software for Mobile computing applications.
LO6	To study the specifications and functionalities of various protocols/standards of mobile networks
LO7	To learn Android and IOS platform and its architecture

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Have knowledge on the concepts and features of mobile computing technologies and applications.
CO2	Have a good understanding of wireless and mobile communication networks and their applications.
CO3	Identify the important issues of developing mobile computing systems and applications.
CO4	Possess good knowledge on Android platform and Architecture designing User Interface and developing Android App.
CO5	Have knowledge on the concepts and features of mobile computing technologies and applications

Unit-1

Mobile Communications, Mobile Computing – Paradigm, Promises/Novel Applications and Impediments and Architecture; Mobile and Handheld Devices, Limitations of Mobile and

Handheld Devices.GSM – Services, System Architecture, Radio Interfaces, Protocols, Localization, Calling, Handover, Security, New Data Services, GPRS.

Unit-2

Motivation for a specialized MAC (Hidden and exposed terminals, Near and far terminals), SDMA, FDMA, TDMA, CDMA, Wireless LAN/(IEEE 802.11)-Mobile Network Layer IP and Mobile IP Network Layers, Packet Delivery and Handover Management, Location Management, Registration, Tunneling and Encapsulation, Route Optimization, DHCP.

Unit-3

Conventional TCP/IP Protocols, Indirect TCP, Snooping TCP, Mobile TCP, Other Transport Layer Protocols for Mobile Networks. Database Issues: Database Hoarding and Caching Techniques, Client-Server Computing & Adaptation, Transactional Models, Query processing, Data Recovery Process & QoS Issues.

Unit-4

Communications Asymmetry, Classification of Data Delivery Mechanisms, Data Dissemination, Broadcast Models, Selective Tuning and Indexing Methods, Data Synchronization.

Unit-5

Introduction, Applications & Challenges of a MANET, Routing, Classification of Routing Algorithms, Algorithms such as DSR, AODV, DSDV, Mobile Agents, Service Discovery. Protocols and Platforms for Mobile Computing: WAP, Bluetooth, J2ME, iOS/Windows CE, Android-Security.

Current Streams of thought: Mobile Platforms and Applications, Mobile Device Operating Systems ,M-Commerce–Structure,Pros& Cons–Mobile Payment System–Security Issues.

Semester	19IINFC63: Linux and Shell Programming	L	T	P	C
VI		4	0	0	4

Learning Objective (LO)

LO1	To understand the Linux OS
LO2	To Study shell programming.
LO3	To learn text formatting.
LO4	To handle files.
LO5	To write scripts

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Have good knowledge in script writing.
CO2	Process the text in the Linux environment.
CO3	Solve the practical issues in Linux shell scripting.
CO4	Able to write scripts with functions.

Unit-1

Introduction to Linux: operating system and Linux - History of Linux and Unix - Linux overview - Linux Distributions - Vi editors.

Unit-2

Shell - comparison of Shells - working in the shell - Learning Basic Commands - Compiler and interpreter differences - various directories - Drilling deep into process management, job control and Automation.

Unit-3

Text processing - Text filtering Tools - working with commands. - Logical operators. - local variables and its scope - working with arrays.

Unit-4

Tricks with shell scripting - interactive shell scripts - The here document and << operator - sort command - WC command - file handling – Debugging.

Unit-5

Automating Decision - Making in scripts - Automating repetitive tasks - working with Functions.

Current Streams of thought:Recent trends in signals and kernels in Linux

Text Books

Semester	19IINF64: Data Communications and Network	L	T	P	C
VI		4	0	0	4

Learning Objective (LO)

LO1	To understand the fundamental concepts of computer networking such as network architectures, Layers and protocols.
LO2	Enumerate the layers of the OSI model and TCP/IP. Explain the function(s) of each layer.
LO3	Identify the different types of network devices and their functions within a network.
LO4	Familiarity with the basic protocols of computer networks, and how they can be used to assist in network design and implementation.
LO5	To Understand and explain Data Communications System and its components.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Familiarize the student with the basic taxonomy and terminology of the computer networking area.
CO2	Identify the different types of network topologies and protocols.
CO3	To understand the functions of each layer of the OSI model and TCP/IP.
CO4	Familiarize the student with the concept of SDMS, TDMA, FDMA AND CDMA.

Unit-1

Application Layer: Network Architecture – Layers - HTTP – DNS – E-Mail (SMTP, MIME, POP3, IMAP, Web Mail), FTP, Telnet - SNMP.

Unit-2

Transport Layer: User Datagram Protocol (UDP) – Transmission Control Protocol (TCP) – Flow Control – Congestion Control – Queuing - Discipline Introduction to Quality of services (QOS).

Unit-3

Network Layer: Circuit Switching - Packet Switching Virtual Circuit Switching – IP – ARP – DHCP – ICMP – Routing – RIP – OSPF – Subnetting – CIDR – Interdomain Routing – BGP – IPV6 Basic Features – Inter Domain Multicast – Congestion Avoidance in Network Layer.

Unit-4

Data Link Layer: Channel access on links – SDMA – TDMA – FDMA – CDMA – Hybrid Multiple Access Techniques – Issues in the Data Link Layer – Framing - Error correction and detection – Link Level Flow Control – Medium Access – Ethernet – Token Ring – FDDI – Wireless LAN – Bridges and Switches.

Unit-5

Data Communications: Data Transmission – Transmission Media – Signal Encoding Techniques – Multiplexing – Spread Spectrum.

Current Streams of thought: A Project on Packet forwarding mechanism

Semester	19IINFC65: Computer Graphics	L	T	P	C
VI		4	0	0	4

Learning Objective (LO)

LO1	To understand the basic concepts of Computer Graphics
LO2	To apply geometric transformations, viewing and clipping on graphical objects
LO3	To understand visible surface detection techniques and illumination models
LO4	To familiarize input and output devices of computer graphics system.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand the concepts of computer graphics system.
CO2	Handle the devices relates to computer graphics.
CO3	Develop algorithms for geometric transformation.
CO4	Detect visible surfaces using various techniques.

Unit-1

Overview of graphics Systems: Video Display Device - Refresh Cathode-Ray tubes Raster - Scan Displays Random - Scan Displays - Color CRT Monitors - Direct view Storage tubes Flat - Panel Displays Three - Dimensional Viewing Devices, Stereoscopic and Virtual - Reality Systems.

Unit-2

Raster - Scan Systems Video Controller - Random - Scan Systems Video Controller - Random-Scan Systems - Input device – Keyboard- Mouse - Trackball - Space ball and Joysticks - Data Glove – Digitizers Image Scanners - Touch Panels - Light pens. Voice Systems - Hard-Copy Devices - Line Drawing Algorithms-DDA Algorithms - Circle generating Algorithm Properties of Ellipses.

Unit-3

Two Dimensional Geometric Transformation: Basic Transformations - Translation - Rotation - Scaling - Matrix Representations and Homogeneous Coordinates - Other Transformations Reflections Two Dimensional Viewing : Windows to view point coordinate Transformations - Clipping Operations - Point Clipping - Line Clipping - Curve Clipping - Text Clipping - Exterior Clipping.

Unit-4

Three Dimensional Concepts: Three Dimensional Display method - Parallel projection - Depth cueing visible line and surface - Three Dimensional Geometric and modelling Transformations: Translation - Rotation - Scaling - Composite Transformations. Three Dimensional Viewing: Viewing pipeline - Viewing Coordinates - Projections - Parallel Projections - Perspective Projections.

Unit-5

Visible Surface Detection Methods : Classification Visible Surface Detection Algorithms - Back Face Detection - Depth - Buffer Method - A-Buffer Method - Scan line method - Depth sorting method - BSP tree method - Area Subdivision Method.

Semester	19IINFP66: Practical –IX: Shell Programming Lab	L	T	P	C
VI		0	0	4	2

Learning Objective (LO)

LO1	To Simulate the file commands
LO2	To write shell program for handling files.
LO3	To write programs for familiarising control statements.

LO4	To write programs for handling strings.
------------	---

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Write shell script for implementing control structures.
CO2	Write shell script for handling strings.
CO3	Write shell script for simulating file commands.
CO4	Write shell script for solving various problems.

List of Exercises

- Write a shell script to stimulate the file commands: rm, cp, cat, mv, cmp, wc, split, diff.
- Write a shell script to show the following system configuration:
 - currently logged user and his log name.
 - current shell, home directory, Operating System type, current Path setting, current working directory.
 - show currently logged number of users, show all available shells
 - show CPU information like processor type, speed
 - show memory information.
- Write a Shell Script to implement the following: pipes, Redirection and tee commands.
- Write a shell script for displaying current date, user name, file listing and directories by getting user choice.
- Write a shell script to implement the filter commands.
- Write a shell script to remove the files which has file size as zero bytes.
- Write a shell script to find the sum of the individual digits of a given number.
- Write a shell script to find the greatest among the given set of numbers using command line arguments.
- Write a shell script for palindrome checking.
- Write a shell script to print the multiplication table of the given argument using for-loop.

Semester	19IINFD67: Mini Project	L	T	P	C
VI		0	0	4	2

Learning Objective (LO)

LO1	To study the basic concepts of identifying, analysing and programming of real world problems and find the required solution.
LO2	Build and test the project.
LO3	Improve the communication and management skills.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Obtain practical knowledge on chosen project domain.
CO2	Distinguish, analyze, articulate and handle projects in a systematic manner.
CO3	Manage and work as an individual or in a team in development of technical projects.
CO4	Develop plans and effective communication skills for presentation of project and other development environment.

Outcome Mapping

FOURTH YEAR: SEVENTH SEMESTER

Semester	19IIT71: Distributed Operating System	L	T	P	C
VII		4	0	0	4

Learning Objective (LO)

LO1	To provide hardware and software issues in modern distributed systems.
LO2	To get knowledge in distributed architecture, naming, synchronization, consistency and Replication, tolerance, security, and distributed file systems.
LO3	To analyze the current popular distributed systems such as peer-to-peer (P2P) systems will also be analyzed.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	To provide hardware and software issues in modern distributed systems
CO2	To get knowledge in distributed architecture, naming, synchronization, consistency and replication, fault tolerance, security, and distributed file systems.
CO3	To analyze the current popular distributed systems such as peer-to-peer (P2P) systems will also be analyzed
CO4	To know about Shared Memory Techniques.
CO5	Have Sufficient knowledge about file access
CO6	Have knowledge of Synchronization and Deadlock

Unit-1

Introduction – Operating System Definition – Functions of Operating System – Types of Advanced Operating System – Design Approaches – Synchronization Mechanisms – concepts of a Process – Critical Section Problem – Process Deadlock – Models of Deadlock – Conditions for Deadlock – System with single-unit requests, Consumable Resources , Reusable Resources.

Unit-2

Distributed Operating Systems: Introduction- Issues – Communication Primitives – Inherent Limitations –Lamport’s Logical Clock , Vector Clock, Global State , Cuts – Termination

Detection – Distributed Mutual Exclusion – Non Token Based Algorithms – Lamport’s Algorithm
 - Token Based Algorithms –Distributed Deadlock Detection – Distributed Deadlock Detection
 Algorithms – Agreement Protocols

Unit-3

Distributed Resource Management – Distributed File Systems – Architecture – Mechanisms –
 Design Issues – Distributed shared Memory – Architecture – Algorithm – Protocols – Design
 Issues – Distributed Scheduling – Issues – Components – Algorithms.

Unit-4

Failure Recovery and Fault Tolerance – Concepts – Failure Classifications – Approaches to
 Recovery – Recovery in Concurrent Systems – Synchronous and Asynchronous Check pointing
 and Recovery –Check pointing in Distributed Database Systems – Fault Tolerance Issues –
 Two-Phase and Nonblocking Commit Protocols – Voting Protocols – Dynamic Voting Protocols.

Unit-5

Multiprocessor and Database Operating Systems –Structures – Design Issues – Threads –
 Process Synchronization – Processor Scheduling – Memory management – Reliability/Fault
 Tolerance – Database Operating Systems – concepts – Features of Android OS, Ubuntu,
 Google Chrome OS and Linux operating systems.

Current Streams of thought:Types – disk scheduling examples- Network operating systems -
 Design issues.

Semester	19IITT72 Advanced Java Programming	L	T	P	C
VII		4	0	0	4

Learning Objective (LO)

LO1	Design/Develop Program
LO2	Develop appropriate data model and database scheme
LO3	Create and test prototypes
LO4	Develop Structure

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Students will learn to create and access arrays and array lists, including those with references to generalized objects types
CO2	Students will develop linked data structures such as lists and trees.
CO3	Students will learn how to handle exceptions and errors
CO4	Students will design and implement custom checked and unchecked exception types.

Unit-1

Design Patterns: Introduction to Design patterns - Catalogue for Design Pattern - Factory Method Pattern, Prototype Pattern, Singleton Pattern- Adapter Pattern- Proxy Pattern-Decorator Pattern- Command Pattern- Template Pattern- Mediator Pattern-Collection Framework – Array List class – Linked List class – Array List vs. Linked List - List Iterator interface - Hash Set class-Linked Hash Set class-Tree Set class Priority Queue class - Map interface-Hash Map class-Linked Hash Map class –Tree Map class - Comparable interface -Comparator interface-Comparable vs. Comparator

Unit-2

Applet Fundamentals- Applet Class - Applet lifecycle- Steps for Developing Applet Programs- Passing Values through Parameters- Graphics in Applets- GUI Application - Dialog Boxes - Creating Windows - Layout Managers – AWT Component classes – Swing component classes- Borders – Event handling with AWT components - AWT Graphics classes - File Choosers - Color Choosers – Tree – Table – Tabbed panels–Progressive bar - Sliders.

Unit-3

JDBC -Introduction - JDBC Architecture - JDBC Classes and Interfaces – Database Access with MySQL -Steps in Developing JDBC application - Creating a New Database and Table with JDBC - Working with Database Metadata; Java Networking Basics of Networking - Networking in Java- Socket Program using TCP/IP - Socket Program using UDP- URL and Inet address classes.

Unit-4

Servlet: Advantages over Applets - Servlet Alternatives - Servlet Strengths - Servlet Architecture - Servlet Life Cycle – Generic Servlet, Http Servlet - First Servlet - Invoking Servlet - Passing Parameters to Servlets - Retrieving Parameters - Server-Side Include – Cookies- JSP Engines - Working with JSP - JSP and Servlet - Anatomy of a JSP Page- Database Connectivity using Servlets and JSP.

Unit-5

Lambda Expressions- Method Reference- Functional Interface- Streams API, Filters- Optional Class- Nashorn- Base 64 Encode Decode- JShell(RPEL)- Collection Factory Methods- Private Interface Methods- Inner Class Diamond Operator- Multiresolution Image API.

Current Streams of thought:Graphics multithreading, internet networking, and JDBC database connectivity (time permitting).

Semester	19IITT73: Design and Analysis of Algorithms	L	T	P	C
VII		4	0	0	4

Learning Objective (LO)

LO1	To teach paradigms and approaches used to analyze and design algorithms and to appreciate the impact of algorithm design in practice
LO2	To make students understand how the worst-case time complexity of an algorithm is defined, how asymptotic notation is used to provide a rough classification of algorithms
LO3	To explain different computational models (e.g., divide-and-conquer), order notation and various complexity measures (e.g., running time, disk space) to analyse the complexity/performance of different algorithms.
LO4	To teach various advanced design and analysis techniques such as greedy algorithms, dynamic programming & Know the concepts of tractable and intractable problems and the classes P, NP and NP-complete problems

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Analyze the asymptotic performance of algorithms.
CO2	Write rigorous correctness proofs for algorithms.
CO3	Demonstrate a familiarity with major algorithms and data structures.
CO4	Apply important algorithmic design paradigms and methods of analysis.
CO5	Synthesize efficient algorithms in common engineering design situations

Unit-1

Introduction: Algorithm Definition – Algorithm Specification – Performance Analysis-Asymptotic Notations. Elementary Data Structures: Stacks and Queues – Trees – Dictionaries – Priority Queues – Sets and Disjoint Set Union – Graphs

Unit-2

Divide and Conquer: The General Method – Defective Chessboard – Binary Search – Finding The Maximum And Minimum – Merge Sort – Quick Sort – Selection - Strassen's Matrix Multiplication.

Unit-3

The Greedy Method: General Method - Container Loading - Knapsack Problem - Tree Vertex Splitting – Job Sequencing With Deadlines - Minimum Cost Spanning Trees - Optimal Storage On Tapes – Optimal Merge Patterns - Single Source Shortest Paths.

Unit-4

Dynamic Programming: The General Method – Multistage Graphs – All-Pairs Shortest Paths – Single-Source Shortest Paths - Optimal Binary Search Trees - String Editing - 0/1 Knapsack - Reliability Design - The Traveling Salesperson Problem - Flow Shop Scheduling. Basic Traversal and Search Techniques: Techniques for Binary Trees – Techniques for Graphs – Connected Components and Spanning Trees – Biconnected Components and DFS.

Unit-5

Backtracking: The General Method – The 8-Queens Problem – Sum of Subsets – Graph Coloring – Hamiltonian Cycles – Knapsack Problem Branch and Bound: Least Cost searchhod - 0/1 Knapsack Problem.

Current Streams of thought: Hashing-Divide and Conquer- Minimum Spanning Tree

Semester	19IITT74: Cryptography and Network Security	L	T	P	C
VII		4	0	0	4

Learning Objective (LO)

LO1	To understand basics of Cryptography and Network Security.
LO2	To be able to secure a message over insecure channel by various means
LO3	To learn about how to maintain the Confidentiality, Integrity and Availability of a data.
LO4	To understand various protocols for network security to protect against the threats in the networks.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Provide security of the data over the network.
CO2	Do research in the emerging areas of cryptography and network security.
CO3	Implement various networking protocols.
CO4	Protect any network from the threats in the world.

Unit-1

Introduction - Security trends – Legal, Ethical and Professional Aspects of Security, Need for Security at Multiple levels, Security Policies – Model of network security – Security attacks, services and mechanisms – OSI security architecture – Classical encryption techniques: substitution techniques, transposition techniques, steganography- Foundations of modern cryptography: perfect security – information theory – product cryptosystem – cryptanalysis.

Unit-2

Symmetric Encryption and Message Confidentiality - Symmetric Encryption Principles, Symmetric Block Encryption Algorithms, Stream Ciphers and RC4 ,Cipher Block Modes of Operation, Location of Encryption Devices, Key Distribution. Public-key Cryptography and Message Authentication: Approaches to Message Authentication, Secure Hash Functions and HMAC, Public-Key Cryptography Principles, Public-Key Cryptography Algorithms, Digital Signatures, Key Management.

Unit-3

Authentication Applications - Kerberos, x.509 Authentication Service, Public-Key Infrastructure. Electronic Mail Security: Pretty Good Privacy (PGP), S/MIME.

Unit-4

IP Security - IP Security Over view, IP Security Architecture, Authentication Header, Encapsulating Security Payload, Combining Security Associations. Web Security: Web Security Considerations, Secure Socket Layer(SSL) and Transport Layer Security(TLS), Secure Electronic Transaction(SET).Network Management Security: Basic Concepts of SNMP, SNMPv1 Community Facility, SNMPv3.

Unit-5

Intruders - Intruders, Intrusion Detection, Password Management. Malicious Software: Virus and Related Threats, Virus Countermeasures, Distributed Denial of Service Attacks. Firewalls: Firewall Design Principles, Trusted Systems, Common Criteria for Information Technology Security Evaluation.

Current Streams of thought: (Web and System Security) Web Security: Secure socket layer and transport layer security - secure electronic transaction (SET) - System Security: Intruders - Viruses and related threads - firewall design principals – trusted systems.

Semester	19IITP75: Practical – X: Advanced Java Lab	L	T	P	C
VII		0	0	4	2

Learning Objective (LO)

LO1	Using Graphics, Animations and Multithreading for designing Simulation and Game based applications.
LO2	Design and develop GUI applications using Abstract Windowing Toolkit
LO3	(AWT), Swing and Event Handling

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	learn the random numbers, fileoperations,two-way communication using Java Applets
CO2	apply event handling on AWT and Swing components.Java Servlet using

	NetBeans IDE.
CO3	learn to access RMI concepts using NetBeans IDE. through Java programs
CO4	Develop EJB using NetBeans IDE

List of Exercises

- Generation of random numbers using Java utilities.
- Implementation of file operations using I/O streams.
- Implementation of two way communication between client and server.
- Creation of animation and playing audio clip using Applet.
- Demonstrating the mouse events in event handling using Frame.
- Implementation of database handling using MySql and JDBC.
- Demonstrating cookies in Java Servlet using NetBeans IDE.
- Reading and Displaying the parameters in JSP using NetBeans IDE.
- Designing a simple calculator using JavaScript.
- Demonstrating the frames and web page validation using JavaScript.
- Implementing RMI concepts using NetBeans IDE.
- Adding two variables by Session Bean in EJB using NetBeans IDE.

Semester	19IITP76: Practical – XI: Algorithm Lab	L	T	P	C
VII		0	0	4	2

Learning Objective (LO)

LO1	To learn the importance of designing an algorithm in an effective way by considering space and time complexity
LO2	To learn graph search algorithms.
LO3	To study network flow and linear programming problems
LO4	To learn the dynamic programming design techniques.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Design an algorithm in a effective manner
CO2	Design and apply iterative and recursive algorithms.
CO3	Design and implement optimization algorithms in specific applications.

List of Exercises

1. A. Create a Java class called Student with the following details as variables within it.

(i) USN(ii)Name(iii)Branch(iv)Phone

Write a Java program to create nStudent objects and print the USN, Name, Branch, and Phoneof these objects with suitable headings.

B. Write a Java program to implement the Stack using arrays. Write Push(), Pop(), and Display() methods to demonstrate its working.

2. A. Design a superclass called Staff with details as StaffId, Name, Phone, Salary. Extend this class by writing three subclasses namely Teaching (domain, publications), Technical (skills), and Contract (period). Write a Java program to read and display at least 3 staff objects of all three categories.

B. Write a Java class called Customer to store their name and date_of_birth. The date_of_birth format should be dd/mm/yyyy. Write methods to read customer data as <name, dd/mm/yyyy> and display as <name, dd, mm, yyyy> using StringTokenizer class considering the delimiter character as “/”.

3. A. Write a Java program to read two integers a and b. Compute a/b and print, when b is not zero. Raise an exception when b is equal to zero.

B. Write a Java program that implements a multi-thread application that has three threads. First thread generates a random integer for every 1 second; second thread computes the square of the number and prints; third thread will print the value of cube of the number.

4. Sort a given set of n integer elements using Quick Sort method and compute its time complexity. Run the program for varied values of n > 5000 and record the time taken to sort. Plot a graph of the time taken versus non graph sheet. The elements can be read from a file or can be generated using the random number generator. Demonstrate using Java how the divide and-conquer method works along with its time complexity analysis: worst case, average case and best case.
5. Sort a given set of n integer elements using Merge Sort method and compute its time complexity. Run the program for varied values of n > 5000, and record the time taken to sort. Plot a graph of the time taken versus non graph sheet. The elements can be read from a file or can be generated using the Random number generator. Demonstrate using Java how the divide and- conquer method works along with its time complexity analysis: worst case, average case and best case.
6. Implement in Java, the 0/1 Knapsack problem using (a) Dynamic Programming method (b) Greedy method.
- 7 .From a given vertex in a weighted connected graph, find shortest paths to other vertices using Dijkstra's algorithm. Write the program in Java.
8. Find Minimum Cost Spanning Tree of a given connected undirected graph using Kruskal's algorithm. Use Union-Find algorithms in your program.
9. Find Minimum Cost Spanning Tree of a given undirected graph using Prim's algorithm.
10. Write Java programs to (a) Implement All-Pairs Shortest Paths problem using Floyd's algorithm.
- (b) Implement Travelling Sales Person problem using Dynamic programming.
11. Design and implement in Java to find a subset of a given set $S = \{S_1, S_2, \dots, S_n\}$ of n positive integers whose SUM is equal to a given positive integer d. For example, if $S = \{1, 2, 5, 6, 8\}$ and $d = 9$, there are two solutions $\{1,2,6\}$ and $\{1,8\}$. Display a suitable message, if the given problem instance doesn't have a solution.
12. Design and implement in Java to find all Hamiltonian Cycles in a connected undirected Graph G of n vertices using backtracking principle

FOURTH YEAR: EIGHTH SEMESTER

Semester	19IINFC81: Advanced Web Technology	L	T	P	C
VIII		4	0	0	4

Learning Objective (LO)

LO1	Explore the backbone of web page creation by developing .NET skill.
LO2	Enrich knowledge about HTML control and web control classes
LO3	Provide depth knowledge about ADO.NET
LO4	Understand the need of usability, evaluation methods for web services

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Explore the backbone of web page creation by developing .NET skill.
CO2	Enrich knowledge about HTML control and web control classes
CO3	Provide depth knowledge about ADO.NET
CO4	Understand the need of usability, evaluation methods for web services

Unit-1

Overview of ASP.NET - The .NET framework – Learning the .NET languages : Data types – Declaring variables- Scope and Accessibility- Variable operations- Object Based manipulation- Conditional Structures- Loop Structures- Functions and Subroutines. Types, Objects and Namespaces : The Basics about Classes- Value types and Reference types- Advanced class programming- Understanding name spaces and assemblies. Setting Up ASP.NET and IIS.

Unit-2

Developing ASP.NET Applications - ASP.NET Applications: ASP.NET applications– Code behind- The Global.asax application file- Understanding ASP.NET Classes- ASP.NET Configuration. Web Form fundamentals: A simple page applet- Improving the currency converter- HTML control classes- The page class- Accessing HTML server controls. Web controls: Web Control Classes – AutoPostBack and Web Control events- Accessing web controls. Using Visual Studio.NET: Starting a Visual Studio.NET Project- Web form Designer- Writing code- Visual studio.NET debugging. Validation and Rich Controls: Validation- A simple

Validation example- Understanding regular expressions- A validated customer form. State management - Tracing, Logging, and Error Handling.

Unit-3

Working with Data - Overview of ADO.NET - ADO.NET and data management- Characteristics of ADO.NET-ADO.NET object model. ADO.NET data access : SQL basics– Select , Update, Insert, Delete statements- Accessing data- Creating a connection- Using a command with a DataReader - Accessing Disconnected data - Selecting multiple tables – Updating Disconnected data. Data binding: Single value Data Binding- Repeated value data binding- Data binding with data bases. Data list – Data grid – Repeater – Files, Streams and Email – Using XML

Unit-4

Web Services - Web services Architecture : Internet programming then and now- WSDL– SOAP- Communicating with a web service-Web service discovery and UDDI. Creating Web services : Web service basics- The StockQuote web service – Documenting the web service- Testing the web service- Web service Data types- ASP.NET intrinsic objects. Using web services: Consuming a web service- Using the proxy class- An example with TerraService.

Unit-5

Advanced ASP.NET - Component Based Programming: Creating a simple component – Properties and state- Database components- Using COM components. Custom controls: User Controls- Deriving Custom controls. Caching and Performance Tuning: Designing and scalability– Profiling- Catching- Output catching- Data catching. Implementing security: Determining security requirements- The ASP.NET security model- Forms authentication- Windows authentication.

Current Streams of thought:Web Standards, Progressive Web Apps (PWA), Single Page Application (SPA)

Semester	19IINFC82: Compiler Design	L	T	P	C
VIII		4	0	0	4

Learning Objective (LO)

LO1	Discover principles, algorithms and techniques that can be used to construct various phases of compiler.
LO2	Acquire knowledge about finite automata and regular expressions
LO3	Learn context free grammars, compiler parsing techniques.
LO4	Explore knowledge about Syntax Directed definitions and translation scheme
LO5	Understand intermediate machine representations and actual code generation

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Know about the phases of compiler and the process done in each phase
CO2	Use the knowledge of patterns, tokens & regular expressions, grammars
CO3	Have the knowledge in semantic analysis and syntax directed translation and
CO4	Design a code generator with knowledge in code optimization.

Unit-1 - Lexical analysis - Language Processors, The Structure of a Compiler, Parameter passing mechanism – Symbol table - The role of the lexical analyzer - Input buffering - Specification of tokens - Recognition of tokens – Finite automata - Regular expression to automata.

Unit-2 - Syntax Analysis - The role of the parser - Context-free grammars - Writing a grammar - Top down Parsing - Bottom-up Parsing - LR parsers- LALR parsers.

Unit-3 - Semantic Analysis - Inherited and Synthesized attributes – Dependency graphs – Ordering the evaluation of attributes – S-attributed definitions – L-attributed definitions –

Applications of Syntax Directed translation – Syntax Directed translations schemes - Storage organization – Stack allocation of space.

Unit-4 - Intermediate Code Generation - Variants of Syntax trees – Three Address code – Types and Declarations - Translation of Expressions – Type checking - Control flow - Back patching - Switch Statements - Procedure calls.

Unit-5 - Code Generation and Code Optimization - Issues in the design of a code generator - The target language – Address in the Target Code – Basic Block and Flow graphs – Optimization of Basic Blocks - A simple code generator – Peephole Optimization.

Current Streams of thought: Advanced Compiler Design and Implementation, Principles of Program Analysis

Semester	19IINFC83: Digital Image Processing	L	T	P	C
VIII		4	0	0	4

Learning Objective (LO)

LO1	To know the basic concepts of Digital Image Processing
LO2	To understand the Digital Image Processing methods such as Spatial domain and Frequency domain
LO3	Knowing the features and applications of Edge detection
LO4	To have an idea about Image Compression and its models
LO5	Understanding the Segmentation and Morphological concepts

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Know about the general concept of digital image processing.
CO2	Examine various types of images, color models, intensity transformations and spatial filtering.
CO3	Analyze images in the frequency domain using various transforms.
CO4	Evaluate the methodologies for image compression and segmentation techniques

Unit-1

Fundamentals: Image Sensing and Acquisition, Image Sampling and Quantization, relationship between Pixels; Random noise; Gaussian Markov Random Field, σ -field, Linear and Non-linear Operations; Image processing models: Causal, Semi-causal, Non-causal models.

ColorModels:Color Fundamentals, Color Models, Pseudo-color Image Processing, Full Color Image Processing, Color Transformation, Noise in Color Images.

Unit-2

Spatial Domain: Enhancement in spatial domain: Point processing; Mask processing; Smoothing Spatial Filters; Sharpening Spatial Filters; Combining Spatial Enhancement Methods.

Frequency Domain: Image transforms: FFT, DCT, Karhunen-Loevetransform, Hotlling's T^2 transform, Wavelet transforms and their properties. Image filtering in frequency domain.

Unit-3

Edge Detection: Types of edges; threshold; zero-crossing; Gradient operators: Roberts, Prewitt, and Sobel operators; residual analysis based technique; Canny edge detection. Edge features and their applications.

Unit-4

Image Compression: Fundamentals, Image Compression Models, Elements of Information Theory. Error Free Compression: Huff-man coding; Arithmetic coding; Wavelet transform based coding; Lossy Compression: FFT; DCT; KLT; DPCM; MRFM based compression; Wavelet transform based; Image Compression standards.

Unit-5

Image Segmentation: Detection and Discontinuities: Edge Linking and Boundary Deduction; Threshold; Region-Based Segmentation. Segmentation by Morphological watersheds. The use of motion in segmentation, Image Segmentation based on Color.

Morphological Image Processing: Erosion and Dilation, Opening and Closing, Hit-Or-Miss Transformation, Basic Morphological Algorithms, Gray-Scale Morphology.

Current Streams of thought: Image Recognition, Artificial Intelligence, Content Based Image Retrieval (CBIR)

Semester	19IINFP84: Practical – XII: Advanced Web Technology Lab	L	T	P	C
VIII		0	0	4	2

Learning Objective (LO)

LO1	To design web pages using ASP.NET
LO2	To write scripting to validate the webpages.
LO3	To connect with databases using LINQ.
LO4	To create web services

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	To design web pages using ASP.NET
CO2	To write scripting to validate the webpages.
CO3	To connect with databases using LINQ.
CO4	To create web services

List of Exercises

- 1.Create a welcome Cookie (Hit for a page) and display different image and text content each time when the user hit the page
- 2.List a table of content and navigate within the pages.
- 3.Demonstrate Request and Response object using HTML Form.
- 4.Database Connection to display all the values in the table in a webpage using ADO.NET.
- 5.Query textbox and Displaying records & Display records by using database
- 6.Write LINQ queries to access the database.
- 7.Create a web service using ASP.NET
- 8.Write a component based programming using advanced ASP.NET

Outcome Mapping

Semester	19IINFP85: Practical – XIII: Image Processing Lab	L	T	P	C
VIII		0	0	4	2

Learning Objective (LO)

LO1	To impart skills on the processing of digital images.
LO2	To learn the transformation of images from spatial domain to frequency domain.
LO3	To perform the edge deduction techniques.
LO4	To gain knowledge about compressing the images using suitable techniques.
LO5	To know the segmentation methods

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Retrieve and display the image.
CO2	Transform the domain from spatial to frequency.
CO3	Apply suitable operators to detect the edge.
CO4	Perform the process of compression and segmentation using certain methods

List of Exercises

- Perform the linear and non linear operations on images.
- Perform smoothing operations on an image in spatial domain.
- Perform sharpening operations on an image in spatial domain.
- Transform the image into DCT, FFT and wavelet.
- Implement the canny edge deduction.

- Evaluate the performance of gradient operators.
- Implement the huff-man coding technique.
- Perform DCT compression method.
- Implement the image segmentation based on color.
- Implement the concepts of erosion and dilation.

Outcome Mapping

FIFTH YEAR: NINTH SEMESTER

Semester	19IINFC91: Machine Learning	L	T	P	C
IX		4	0	0	4

Learning Objective (LO)

LO1	To Learn about Machine Intelligence and Machine Learning applications
LO2	To implement and apply machine learning algorithms to real-world applications.
LO3	To identify and apply the appropriate machine learning techniques for classification, pattern recognition, optimization and decision problems.
LO4	To understand how to perform evaluation of learning algorithms and model selection.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Have a good understanding of the fundamental issues and challenges of machine learning: data, model selection, model complexity, etc.
CO2	Have an understanding of the strengths and weaknesses of many popular machine learning approaches.
CO3	Appreciate the underlying mathematical relationships within and across Machine Learning algorithms and the paradigms of supervised and unsupervised learning.
CO4	Design and implement various machine learning algorithms in a range of real-world applications.

Unit-1

INTRODUCTION Learning Problems – Perspectives and Issues – Concept Learning – Version Spaces and Candidate Eliminations – Inductive bias – Decision Tree learning – Representation – Algorithm – Heuristic Space Search.

Unit-2

NEURAL NETWORKS AND GENETIC ALGORITHMS :Neural Network Representation – Problems – Perceptrons – Multilayer Networks and Back Propagation Algorithms – Advanced Topics – Genetic Algorithms – Hypothesis Space Search – Genetic Programming – Models of Evaluation and Learning.

Unit-3

BAYESIAN AND COMPUTATIONAL LEARNING : Bayes Theorem – Concept Learning – Maximum Likelihood – Minimum Description Length Principle – Bayes Optimal Classifier – Gibbs Algorithm – Naïve Bayes Classifier – Bayesian Belief Network – EM Algorithm – Probability Learning – Sample Complexity – Finite and Infinite Hypothesis Spaces – Mistake Bound Model.

Unit-4

INSTANT BASED LEARNING :K- Nearest Neighbour Learning – Locally weighted Regression – Radial Basis Functions – Case Based Learning.

Unit-5

ADVANCED LEARNING :Learning Sets of Rules – Sequential Covering Algorithm – Learning Rule Set – First Order Rules – Sets of First Order Rules – Induction on Inverted *Deduction* – Inverting Resolution – Analytical Learning – Perfect Domain Theories – Explanation Base Learning – FOCL Algorithm – Reinforcement Learning – Task – Q-Learning – Temporal Difference Learning.

Current Streams of thought: Convergence of AI and IoT,Cloud Computing Optimization, Improved Cyber Security

Semester	19IINF92: Data Warehousing and Mining															L	T	P	C
IX																4	0	0	4

Learning Objective (LO)

LO1	To identify the scope and necessity of Data Mining & Warehousing.
LO2	To understand various tools of Data Mining.
LO3	To develop ability to design various algorithms based on data mining tools.
LO4	To be familiar with Data warehousing structure.
LO5	To design Data Warehousing system for an enterprise.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Know about basic data mining concepts for solving real world problems.
CO2	Understand the concepts of data warehousing and its architecture
CO3	Analyze the various types of classification
CO4	Apply basic statistical methods to evaluate the results of data mining models.

CO5	Develop data mining application to solve problems in various domains.
------------	---

Unit-1

Data Mining And Data Preprocessing: Data Mining – Motivation – Definition – Data Mining on Kind of Data –Functionalities – Classification – Data Mining Task Primitives – Major Issues in Data Mining – Data Preprocessing – Definition – Data Clearing – Integration and Transformation – Data Reduction.

Unit-2

Data Warehousing: Multidimensional Data Model –Data Warehouse Architecture – Data Warehouse Implementation –From data Warehousing to Data Mining – On Line Analytical Processing - On Line Analytical Mining.

Unit-3

Frequent Patterns, Associations And Classification: The Apriori Algorithm – Definition of Classification and Prediction – Classification by Decision Tree Induction - Bayesian Classification – Rule Based Classification – Classification by Back Propagation – Lazy Learners – K-Nearest Neighbor – Other Classification Methods.

Unit-4

Cluster Analysis: Definition – Types of data in Cluster Analysis – Categorization of major Clustering Techniques – Partitioning Methods – Hierarchical Clustering – BIRCH - ROCK – Grid Based Methods – Model Based Clustering Methods – Outlier Analysis.

Unit-5

Spatial, Multimedia, Text And Web Data: Spatial Data Mining – Multimedia Data Mining – Text Mining – Mining the World Wide Web – Data Mining Applications – Trends in Data Mining.

Current Streams of thought: Data Mining Tools, Data Loading, Filtering Methods, WEKA Tool

Semester	19IINFC93: Internet of Things	L	T	P	C
IX		4	0	0	4

Learning Objective (LO)

LO1	To provide an understanding of the technologies and the standards relating to the Internet of Things.
LO2	To develop skills on IoT technical planning.
LO3	To Implement Data and Knowledge Management and use of Devices in IoT Technology.
LO4	To Understand State of the Art IoT Architecture.
LO5	To study Real World IoT Design Constraints, Industrial Automations in IoT.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand the technology and standards relating to IoT.
CO2	Know about the critical parts of the ICT ecosystem required to mainstream

	IoT.
CO3	Acquire skills on developing their own national and enterprise level technical strategies.
CO4	Interpret the vision of IoT from a global context.
CO5	Determine the Market perspectives of IoT.

Unit-1

INTRODUCTION TO IoT: Internet of Things - Physical Design- Logical Design- IoT Enabling Technologies - IoT Levels & Deployment Templates - Domain Specific IoTs - IoT and M2M - IoT System Management with NETCONF-YANG- IoT Platforms Design Methodology.

Unit-2

IoT ARCHITECTURE: M2M high-level ETSI architecture - IETF architecture for IoT - OGC architecture - IoT reference model - Domain model - information model - functional model - communication model - IoT reference architecture

Unit-3

IoT PROTOCOLS: Protocol Standardization for IoT – Efforts – M2M and WSN Protocols – SCADA and RFID Protocols – Unified Data Standards – Protocols – IEEE 802.15.4 – BACNet Protocol – Modbus– Zigbee Architecture – Network layer – 6LowPAN - CoAP - Security

Unit-4

WEB OF THINGS: Web of Things versus Internet of Things – Two Pillars of the Web – Architecture Standardization for WoT– Platform Middleware for WoT – Unified Multitier WoT Architecture – WoT Portals and Business Intelligence. Cloud of Things: Grid/SOA and Cloud Computing – Cloud Middleware – Cloud Standards – Cloud Providers and Systems – Mobile Cloud Computing – The Cloud of Things Architecture.

Unit-5

APPLICATIONS: The Role of the Internet of Things for Increased Autonomy and Agility in Collaborative Production Environments - Resource Management in the Internet of Things: Clustering, Synchronisation and Software Agents. Applications - Smart Grid – Electrical Vehicle Charging.

Current Streams of thought: IOT in the real world situations, IOT Security, Blockchain for IOT Security

Semester	19IINFP94: Practical – XIV: Machine Learning Lab	L	T	P	C
IX		0	0	4	2

Learning Objective (LO)

LO1	To know about the emerging technologies in the areas of machine learning and implement the machine learning concepts and algorithms.
LO2	To make use of Data sets in implementing the machine learning algorithms.
LO3	To develop a basic understanding of the principles of machine learning.
LO4	To derive practical solutions using predictive analytics.
LO5	To understand the techniques which are more appropriate for the problems.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand the concepts of machine learning algorithms.
CO2	Apply machine learning tools to build and evaluate predictors.
CO3	Comprehend how machine learning uses computer algorithms to search for patterns in data.
CO4	Familiarize in using data patterns to make decisions and predictions with real-world examples.

List of Exercises

- Reading and writing into .csv files
- Implement the Find –S algorithm.
- Implement the Candidate-Elimination algorithm.
- Classify a sample using ID3 algorithm.
- Build an artificial neural network by implementing backpropagation algorithm.
- Construct the naïve Bayesian classifier for classification.
- Construct a naïve Bayesian classifier and evaluate the classifier with accuracy, precision, and recall metrics
- Applying EM algorithm for clustering using K-means algorithm.
- Implement the k-Nearest Neighbour algorithm to classify the data set.
- Implement the non-parametric Locally Weighted Regression algorithm.

Outcome Mapping

Semester	19IINFP95: Practical – XV: Data Warehousing and Mining Lab	L	T	P	C
IX		0	0	4	2

Learning Objective (LO)

LO1	Practical exposure on implementation of well known data mining tasks.
LO2	Exposure to real life data sets for analysis and prediction.
LO3	Learning the performance evaluation of data mining algorithms in a supervised and an unsupervised setting.
LO4	Handling the small data mining project for a given practical domain.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Implement the data mining tools for data cleaning, pre-processing and data integration.
CO2	Apply the statistical techniques through R tool, Hadoop, WEKA and interpret the results obtained.
CO3	Install outsourcing packages related to R tool, use the statistical techniques and apply time series models and interpret the results obtained.
CO4	Develop packages in R tool related to mathematical and statistical techniques and incorporate them to the R tool

List of Exercises

- 1 Introduction to WEKA(Waikato Environment for Knowledge Analysis)
- 2 Implementation of measures of proximity
- 3 Introduction to exploratory data analysis using R
- 4 Implementation of Apriori Algorithm for Association rule mining
- 5 Learning and implementing k-means clustering
- 6 Learning Naïve and Decision Tress classifier in WEKA (Waikato Environment for Knowledge Analysis)
- 7 Learning Bayesian modelling

8 Implementation of outlier detection algorithms (nearest neighbor)

9 Data Mining Project

Semester	19IPSCI06 CONSTITUTION OF INDIA	L	T	P	C
IX		2	0	0	2

Learning Objectives:

Students will be able to:

LO1	To understand the basic features of Indian Constitution.
LO2	To grasp about the basic Rights & duties of Indian Citizenry
LO3	To ponder over the form of Indian Political System.
LO4	To have broad understanding about the pivotal provisions related with liberty, Equality and fraternity.

Course Outcomes:

After the successful completion of the course, the students will be able to:

CO1	Imbided about the basic features of Indian Political System.
CO2	Enlighten with the rights & duties of Indian Citizens.
CO3	Understand the significance of rule of law.
CO4	Inculcated with basic liberties.

Unit I : Introduction

Meaning of the Constitutional law and Constitutionalism – Historical Perspective of the Constitution of India – Salient features Characteristics of the Constitution of India

.Unit II : Rights and Duties

Scheme of the Fundamental Rights – The scheme of the Fundamental Duties and its legal status – The Directive Principles of State Policy-Its importance and implementation

Unit III : Centre State Relationship

Federal Structure and distribution of legislative and financial powers between the union and the states- Parliamentary form of Government in India – The Constitution powers and status of the president of India.

Unit IV : Amendments and Provisions

The Historical perspectives of the constitutional amendments in India – Emergency Provision: National Emergency, President Rule. Financial Emergency

Unit V: Institutions

Judiciary –Judiciary Activism – Amending Procedures- Recent Trends –Rights to Information- Lokpal and LokAyukta

Text Books :

FIFTH YEAR: TENTH SEMESTER

Semester	19IINFCX1: Cloud Computing	L	T	P	C
X		4	0	0	4

Learning Objective (LO)

LO1	To Acquire the Knowledge of Cloud and computing services
LO2	To learn the basics of Cloud Architecture and storage technologies.
LO3	To gain knowledge about the concept of Cloud Deployment Models
LO4	To Build Cloud based various applications
LO5	To gain Knowledge on security issues in cloud Environment.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Develop the ability to understand and different cloud programming model
CO2	Apply the fundamentals concepts of the cloud architecture
CO3	Analyze various source in the economics of outsourcing IT to the Cloud.
CO4	Explore some important cloud computing driven commercial systems such as Google Apps, Microsoft Azure and Amazon Web Services and other businesses cloud applications.
CO5	Learn how DNS works, and how it can be used for service discovery using Cloud.

Unit-1

Computing Basics: Cloud computing definition- Characteristics- Benefit-Challenges- Distributed Systems- Virtualization-Service-oriented computing- Utility-oriented computing- Building Cloud Computing environments- computing platforms & technologies - Cloud Models – Cloud Service Examples - Cloud Based Services & Applications - Cloud concepts and Technologies.

Unit-2

Virtualization, Cloud Services and Platforms: Virtualization:Virtualization- Characteristics-taxonomy-types- Pros and Cons- Examples Architecture: Reference model- types of clouds- Compute Service - Storage Services - Cloud Database Services - Application Services - Content Delivery Services - Analytics Services - Deployment And Management Service - Identity And Access Management Services - Open Source Private Cloud Software.

Unit-3

Cloud Application Design and Development: Design consideration- Reference Architecture for Cloud Application - Cloud Application Design Methodologies - Data Storage Approaches- Development in Python: Design Approaches – Application: Image Processing - Document Storage - Map Reduce - Social Media Analytics.

Unit-4

Python for Cloud: Introduction- Installing Python- Data types & Data Structures- Control Flow- Functions- Modules- Packages- File Handling-Date/Time Operations – Classes- Python for Cloud: Amazon Web Services –Google Cloud Platform - Windows Azure –Map Reduced – Packages of Interest – Designing a RESTful Web API.

Unit-5

Big Data Analytics, Multimedia Cloud & Cloud Security: Big Data Analytics: Clustering Big data - Classification of Big Data – Recommendation systems. Multimedia Cloud: Case Study: Live Video Stream App - Streaming Protocols – Case Study: Video Transcoding App-Cloud Security: CSA Cloud Security Architecture - Authentication - Authorization - Identity and Access management - Data Security - Key Management- Auditing- Cloud for Industry, Healthcare & Education.

Current Streams of thought:Service Modeling, Infrastructure Services, Platform Services, Software Services - Software as service modes, Moving existing data to cloud- Using the Wave approach.

Semester	19IINFCX2 Advanced Database Management Systems	L	T	P	C
X		4	0	0	4

Learning Objective (LO)

LO1	To acquire knowledge of database models.
LO2	To understand distributed database architecture.
LO3	To learn the concepts of spatial database.
LO4	To familiar with temporal database

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand the concepts of the various database models
CO2	Create code to work on Database Architecture
CO3	Understand the facts and behaviors of various data patterns
CO4	Efficiently handle the object oriented databases

Unit-1

Relational and parallel Database Design: Basics, Entity Types, Relationship Types, ER Model, ER-to-Relational Mapping algorithm. Normalization: Functional Dependency, 1NF, 2NF, 3NF, BCNF, 4NF and 5NF. Architecture, I/O Parallelism, Interquery Parallelism, Intraquery Parallelism, Intraoperation Parallelism, Interoperation Parallelism.

Unit-2

Distributed and Object based Databases: Architecture, Distributed data storage, Distributed transactions, Commit protocols, Concurrency control, Query Processing. Complex Data Types, Structured Types and Inheritance, Table Inheritance, array and Multiset, Object Identity and Reference Types, Object Oriented versus Object Relational.

Unit-3

Spatial Database: Spatial Database Characteristics, Spatial Data Model, Spatial Database Queries, Techniques of Spatial Database Query, Logic based Databases: Introduction, Overview, Propositional Calculus, Predicate Calculus, Deductive Database Systems, Recursive Query Processing.

Unit-4

XML Databases: XML Hierarchical data model, XML Documents, DTD, XML Schema, XML Querying, XHTML, Illustrative Experiments.

Unit-5

Temporal Databases: Introduction, Intervals, Packing and Unpacking Relations, Generalizing the relational Operators, Database Design, Integrity Constraints, Multimedia Databases: Multimedia Sources, Multimedia Database Queries, Multimedia Database Applications.

Current Streams of thought: Parallel Database Architectures, Parallel query evaluation Interquery Parallelism, Intraquery Parallelism, Intraoperation Parallelism, Design of Parallel System.

Semester	19IINFCX3 Data Science and Big Data Analytics	L	T	P	C
X		4	0	0	4

Learning Objective (LO)

LO1	To understand the basic and advanced methods to big data technology and tools.
LO2	To learn MapReduce and Hadoop and its ecosystem.
LO3	To acquire skills on R programming.
LO4	To analyse different classification methods.

LO5	To study data visualization tools
------------	-----------------------------------

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Identify the characteristics of datasets for various applications.
CO2	Understand the Select environment for the applications.
CO3	Solve problems associated with big data characteristics.
CO4	Analyze the mathematical and statistical tools with modern technologies like Hadoop and Mapreduce thereby provide better solution.

Unit-1

Introduction to Big Data Analytics : Big Data Overview – Data Structures – Analyst Perspective on Data Repositories - State of the Practice in Analytics – BI Versus Data Science - Current Analytical Architecture – Drivers of Big Data – Big Data Ecosystem - Data Analytics Lifecycle – Data Discovery – Data Preparation – Model Planning – Model Building – Communicate Results – Operationalize.

Unit-2

Basic Data Analytic Methods Using R : Introduction to R programming – R Graphical User Interfaces – Data Import and Export – Attribute and Data Types – Descriptive Statistics Exploratory Data Analysis : Visualization Before Analysis – Dirty Data – Visualizing a Single Variable – Examining Multiple Variables Data Exploration Versus Presentation – Statistical Methods of Evaluation : Hypothesis Testing – Difference of Means – Wilcoxon Rank-Sum Test – Type I and Type II Errors – Power and Sample Size – ANOVA..

Unit-3

Advanced Analytical Theory and Methods: Clustering – K Means – Use Cases – Overview – Determining number of clusters – Diagnostics – Reasons to choose and cautions – Additional Algorithms - Association Rules : A Priori Algorithm – Evaluation of Candidate Rules – Applications of Association Rules – Validation and Testing – Diagnostics. Regression : Linear Regression and Logistic Regression :- Use cases – Model Description – Diagnostics - Additional Regression Models.

Unit-4

Classification : Decision Trees – Overview – Genetic Algorithm – Decision Tree Algorithms – Evaluating Decision Tree – Decision Trees in R - Naïve Bayes – Bayes Theorem – Naïve Bayes Classifier – Smoothing – Diagnostics – Naïve Bayes in R – Diagnostics of Classifiers – Additional Classification Methods - Time Series Analysis : : Overview – Box – Jenkins Methodology – ARIMA Model – Autocorrelation Function – Autoregressive Models – Moving Average Models – ARMA and ARIMA Models – Building and Evaluating and ARIMA Model -

Text Analysis : Text Analysis Steps – Example – Collecting – Representing Term Frequency – Categorizing – Determining Sentiments – Gaining Insights.

Unit-5

Advanced Analytics-Technology and Tools:MapReduce and Hadoop : Analytics for Unstructured Data .- *UseCases - MapReduce - Apache Hadoop – The Hadoop Ecosystem – pig – Hive – Hbase – Manout – NoSQL - Tools in Database Analytics : SQL Essentials – Joins – Set operations – Grouping Extensions – In Database Text Analysis - Advanced SQL – Windows Functions – User Defined Functions and Aggregates – ordered aggregates- MADIib - Analytics*

Reports Consolidation – Communicating and operationalizing and Analytics Project – Creating the Final Deliverables : Developing Core Material for Multiple Audiences – Project Goals – Main Findings – Approach Model Description – Key points support with Data - Model details – Recommendations – Data Visualization.

Current Streams of thought:Real time Analytics Platform(RTAP) applications – Case Studies – Real Time Sentiment Analysis, Stock Market Predictions,Using Graph Analytics for Big Data: Graph Analytics

Semester	19IINFPX4 Data Analytics Lab	L	T	P	C
X		0	0	4	2

Learning Objective (LO)

LO1	To help students learn, understand, and practice big data analytics and machine learning approaches,
LO2	To make the student conversant with modern computing big data technologies and scaling up machine learning techniques with a focus on industry applications.
LO3	To make the student to learn classification techniques and decision trees. Decision trees are versatile Machine Learning algorithm that can perform both classification and regression tasks using R program.
LO4	To make the students to understand DBSCAN and BIRCH algorithms
LO5	To introduce the students to WEKA tools and R programming for data mining analysis

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand the students to create data frame, list and factors using R Language.
CO2	Make the students select and implement machine learning techniques and computing environment that are suitable for the applications under consideration.
CO3	Implementing Apriori Algorithm in R using sample data set.
CO4	Make the students to integrate machine learning libraries and mathematical and statistical tools with modern technologies like R Programme and WEKA tools.

List of Exercises

1. Compute descriptive statistics for the data given below and sketch frequency distribution with normal curve. Give the interpretation for the obtained statistics and the frequency distribution.
2. Derive correlation analysis and give interpretation for the result obtained.

X: 14, 20, 22, 19, 15, 18, 30, 27

Y: 16, 25, 27, 20, 16, 18, 27, 23

3. Create a data Frame for student record using R. Sketch a decision tree and give interpretation.
4. Carry out the correlation analysis between the mark scored by the male and female students of a class.
5. Draw an auto correlogram and identify the order of the given Time Series data. Give interpretation for the results obtained.

```
raw data <- c(-0.21,-2.28,-2.71,2.26,-1.11,1.71,2.63,-0.45,-0.11,4.79,5.07,-2.24,6.46,  
3.82, 4.29 ,-1.47,2.69,7.95,4.46,7.28,3.43, -3.19, -3.14, -1.25, -  
0.50,2.25,2.77,6.72,9.17,3.73, 6.72, 6.04, 10.62,9.89,8.23,5.37, -  
0.10,1.40,1.60,3.40,3.80,3.60,4.90,9.60, 18.20, 20.60,15.20, 27.00, 15.42, 13.31, 11.22,  
12.77, 12.43, 15.83, 11.44, 12.32, 12.10, 12.02, 14.41,13.54,11.36, 12.97, 10.00, 7.20)
```

6. Create a vector of a data set and treat it as an object. Using the vector and object perform (.) dot product and (x) cross product. Take your own data.
7. Import and Export data from/ to the Excel format and carry out the following analysis. Take your own data.

- o Correlation and regression.

8. Derive a Decision Tree for the data you considered in the above exercise.
9. Draw a Decision Tree. Take the data from WEKA. Interpret the result obtained.
10. Implementing Apriori Algorithm in R using sample data set.
11. R program to create a factor corresponding to height of women data set, which contains height and weights for a sample of women
12. Categorize the data given below into three groups using control structures.

5,3,4,5,8,6,20,18,22,26,23,50,45,46,44,42

Semester	19IINFPX5 Advanced Database Management SystemsLab	L	T	P	C
X			0	4	2

Learning Objective (LO)

LO1	To understand the basic concepts and terminology related to DBMS and Relational Database Design
LO2	To the design and implement Distributed Databases.
LO3	To understand advanced DBMS techniques to construct tables and write effective queries, forms, and reports.
LO4	To introduce the students to recovery algorithm, XML and relational databases.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Get exposure for students to write complex queries including full outer joins, self-join, sub queries, and set theoretic queries.
CO2	To perform the file organization and query optimization,
CO3	To perform transaction management, and database administration techniques.
CO4	Get exposure for students to write complex queries including full outer joins, self-join, sub queries, and set theoretic queries.
CO5	To perform the file organization and query optimization.

List of Exercise

1. Formal review of relational database and FDs Implication, Closure, its correctness
2. 3NF and BCNF, Decomposition and synthesis approaches, Basics of query processing, external sorting, file scans
3. Processing of joins, materialized vs. pipelined processing, query transformation rules,
4. DB transactions, ACID properties, interleaved executions, schedules, serialisability
5. Correctness of interleaved execution, Locking and management of locks, 2PL, deadlocks, multiple level granularity, CC on B+ trees, Optimistic CC

6. T/O based techniques, Multiversion approaches, Comparison of CC methods,
 7. Dynamic databases, Failure classification, recovery algorithm, XML and relational databases

Outcome Mapping

Semester	19IINFDX6: Project Work/ In-Plant Training	L	T	P	C
X		0	0	0	8

Learning Objective (LO)

LO1	To provide insights into real world challenges and problem those required IT related solutions.
LO2	To empower the students to bring out the IT related solutions for the requirements.
LO3	To expose the students to have a broad idea of literature related to the project domain.
LO4	To enable students to use all concepts of IT in creating a solution for a problem.
LO5	To improve the team building, communication and management skills of the students

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Discover the most thrust areas in the field of Information Technology.
CO2	Develop a complete project for a particular problem domain.

CO3	Identify, analyse, design and implement any IT related projects.
CO4	Compare and contrast existing solutions for developing a project.
CO5	Demonstrate an ability to work in a teams and manage with good communication skill.

Outcome Mapping

DEPARTMENT ELECTIVE COURSES

Semester	19IINFE17 Internet and its Applications	L	T	P	C
		3	0	0	3

Learning Objective (LO)

LO1	To understand the basic ideas of internet and its applications.
------------	---

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand Internet technologies.
CO2	Understand basics of communications
CO3	Learn about web servers
CO4	Learn about web browser and search engines

Unit-1

Introduction To The Internet: Computer in Business - Networking - Internet - E-mail - Resource Sharing - Gopher - World Wide Web - Telnet - Bulletin Board Service - Wide Area Information Service.

Unit-2

Internet Technologies: Modem - Internet addressing - Physical connections - Telephone Lines - Internet browsers - Internet Explorer - Netscape Navigator.

Unit-3

Web Server - Proxy Server - Web Browser - Search Engines - Search Tools - Firewalls - Data Security.

Unit-4

Internet Relay Chat - Types of Network - Packet Switched Network - Circuit Switched Network - TCP/IP - Internet Protocol.

Unit-5

Case Study: Online Passport - Online Gas Services - Online Train Reservation - Tamilnadu government services

Textbooks

1. C Xavier, "World Wide Web with HTML", Tata McGraw Hill Education, (2000).

Semester	19IITE18 Internet Programming	L	T	P	C
		3	0	0	3

Learning Objective (LO)

LO1	To understand different Internet Technologies.
LO2	To learn java scripts.
LO3	To learn web applications

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand the concepts of elements in the web.
CO2	Write programs in Javascript
CO3	Design and implement webpages.
CO4	Understand the XML basics.

Unit-1

Web Essentials: Clients, Servers and Communication – The Internet – Basic Internet protocols – World wide web – HTTP Request Message – HTTP Response Message – Web Clients – Web

Servers – HTML5 – Tables – Lists – Image – HTML5 control elements – Semantic elements – Drag and Drop – Audio – Video controls.

Unit -2

Cascading Style Sheets: CSS3 – Inline, embedded and external style sheets – Rule cascading – Inheritance – Backgrounds – Border Images – Colors – Shadows – Text – Transformations – Transitions – Animations.

Unit-3

Java Script: An introduction to JavaScript–JavaScript DOM Model-Date and Objects,-Regular Expressions- Exception Handling-Validation-Built-in objects-Event Handling- DHTML with JavaScript- JSON introduction – Syntax – Function Files – Http Request – SQL.

Unit-4

An introduction to PHP: PHP- Using PHP- Variables- Program control- Built-in functions- Form Validation- Regular Expressions – File handling – Cookies – Connecting to Database.

Unit-5

XML: Basic XML- Document Type Definition- XML Schema DOM and Presenting XML, XML Parsers and Validation, XSL and XSLT Transformation, News Feed (RSS and ATOM).

Semester	19IINFE37 Multimedia Systems	L	T	P	C
		3	0	0	3

Learning Objective (LO)

LO1	To understand the standards available for different audio, video and text applications
LO2	To learn various multimedia authoring systems in multimedia production team

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Work on multimedia.
CO2	Handle various multimedia software
CO3	Develop multimedia projects.
CO4	Deploy multimedia projects.

Unit-1

Multimedia Definition - Use Of Multimedia - Delivering Multimedia - Text: About Fonts and Faces - Using Text in Multimedia - Computers and Text - Font Editing and Design Tools - Hypermedia and Hypertext.

Unit-2

Images: Plan Approach - Organize Tools - Configure Computer Workspace - Making Still Images - Color - Image File Formats. Sound: The Power of Sound - Digital Audio - Midi Audio - Midi vs. Digital Audio - Multimedia System Sounds - Audio File Formats -Vaughan's Law of Multimedia Minimums - Adding Sound to Multimedia Project.

Unit-3

Animation: The Power of Motion - Principles of Animation - Animation by Computer - Making Animations that Work. Video: Using Video - Working with Video and Displays - Digital Video Containers - Obtaining Video Clips - Shooting and Editing Video.

Unit-4

Making Multimedia: The Stage of Multimedia Project - The Intangible Needs - The Hardware Needs - The Software Needs - An Authoring Systems Needs- Multimedia Production Team.

Unit-5

Planning and Costing: The Process of Making Multimedia - Scheduling - Estimating - RFPs and Bid Proposals. Designing and Producing - Content and Talent: Acquiring Content - Ownership of Content Created for Project - Acquiring Talent.

Text Book

1. Tay Vaughan, "Multimedia: Making It Work", 8th Edition, Osborne/McGraw-Hill, (2001).

Reference Book

CO4	3			2							3	3		3				

Semester	19IINF38 PHP Scripting Language	L	T	P	C
		3	0	0	3

Learning Objective (LO)

LO1	To understand the basic coding ideas of PHP.
LO2	To learn mailing list, custom logs and reports.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand the concepts of elements in the PHP.
CO2	Write programs in PHP.
CO3	Design and implement webpages.

Semester	19IINFE57 GUI programming	L	T	P	C
		3	0	0	3

Learning Objective (LO)

LO1	To explore the backbone of GUI programming.
LO2	To become familiar with windows and form based applications
LO3	To provide depth knowledge in connecting databases from windows applications

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Learn major programming paradigms and techniques involved in windows and form based applications
CO2	Learn about Visual Studio and Visual Basic.
CO3	By the end students can develop, implement and creating Applications with Visual Basic
CO4	Creating databases and accessing the databases
CO5	An ability to use current techniques, skills, and tools necessary for computing practice

Unit-1

Introduction to Visual Basic: Programming Languages, Procedural, Object Oriented and Event Driven, Writing VB Projects, VB Environment, Writing First Project-Finding and Fixing Errors - VB Help. Controls in VB - Coding for Controls.

Unit-2

Variables, Constants and Calculations: Data Types-Variables and Constants - Val function - Arithmetic operations - Formatting data. Decisions and conditions: If Statements - Conditions - nested If Statements - Using If Statement with option buttons and checkboxes - displaying messages - Input validation - Calling event Procedures.

Unit-3

Menus, Sub procedures and sub functions: Menus - Common Dialog Boxes - Writing General Procedures. Multiple Forms: Multiple Forms - Standard Code Modules-Variables and Constants in Multiple-Form Projects.

Unit-4

List Boxes and Combo boxes - Do/Loop - For/Next Loop - Using MsgBox Function - Using String Function - Arrays: Control Arrays - Single Dimension Array - For Each/Next Statements - User defined data types - Multidimensional Arrays.

Unit-5

Accessing Database Files: Visual basic and Database Files - Using Data Control - Viewing a Database File - Navigating the Database in Code - Using List Boxes and Combo boxes as Data-Bound Controls.

Text Book

Semester	19IINF58 Problem Solving Techniques	L	T	P	C
		3	0	0	3

Learning Objective (LO)

LO1	To understand the various steps in problem solving and implementation of algorithms.
LO2	To learn the usage of structured programming approach in solving problems.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	write algorithms and to draw flowcharts for solving problems.
CO2	convert the algorithms/flowcharts to programs
CO3	decompose a problem into functions and to develop modular reusable code.
CO4	analyze and implement perform searching and sorting problems.

Unit-1

Problem Solving: Introduction - The Problem-solving Aspect - Top-down Design-implementation of Algorithms- Program Verification - The Efficiency of Algorithms.

Unit-2

Fundamental Algorithms: Exchanging the values of Two Variables - Counting - Summation of a set of Numbers - Factorial Computation-Sine function computation - Generation of the Fibonacci sequence - Reversing the Digits of an Integer - Base Conversion Character to Number Conversion.

Unit-3

Factoring Methods: Finding the square Root of a number - The Greatest Common Divisor of Two Integers - Generating Prime Numbers - Generation of Pseudo - random Numbers - Raising a Number to a Large Power.

Unit-4

Array Techniques: Array Order Reversal-Array Counting or Histogramming - Finding the Maximum Number in a Set - Removal of Duplicates from an Ordered Array - Partitioning an Array - Finding the kth Smallest Element.

Unit-5

Merging, Sorting and Searching: Two way merge - sorting by selection, insertion, diminishing increment and partitioning -Binary search.

Semester	19IINFE86: Advanced Computer Networks	L	T	P	C
		3	0	0	3

Learning Objective (LO)

LO1	To study communication network protocols, different communication layer structure
LO2	To learn security mechanism for data communication

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	To master the terminology and concepts of the OSI reference model and the TCP-IP reference model.
CO2	To master the concepts of protocols, network interfaces, and design/performance issues in local area networks and wide area networks.
CO3	To be familiar with wireless networking concepts, and be familiar with contemporary issues in networking technologies.
CO4	To be familiar with network tools and network programming

Unit-1

Introduction – Network Hardware – Software – Reference Models – OSI and TCP/IP models – Example networks: Internet, 3G Mobile phone networks, Wireless LANs –RFID and sensor networks - Physical layer – Theoretical basis for data communication - guided transmission media

Unit-2

Wireless transmission - Communication Satellites – Digital modulation and multiplexing - Telephones network structure – local loop, trunks and multiplexing, switching. Data link layer: Design issues – error detection and correction.

Unit-3

Elementary data link protocols - sliding window protocols – Example Data Link protocols – Packet over SONET, ADSL - Medium Access Layer – Channel Allocation Problem – Multiple Access Protocols.

Unit-4

Network layer - design issues - Routing algorithms - Congestion control algorithms – Quality of Service – Network layer of Internet- IP protocol – IP Address – Internet Control Protocol.

Unit-5

Transport layer – transport service- Elements of transport protocol - Addressing, Establishing & Releasing a connection – Error control, flow control, multiplexing and crash recovery - Internet Transport Protocol – TCP - Network Security: Cryptography.

Semester	19IINFE87: Business Intelligence	L	T	P	C
		3	0	0	3

Learning Objective (LO)

LO1	Be exposed with the basic rudiments of business intelligence system.
LO2	understand the modelling aspects behind Business Intelligence.
LO3	understand of the business intelligence life cycle and the techniques used in it.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Explain the fundamentals of business intelligence.
CO2	Link data mining with business intelligence.
CO3	Apply various modelling techniques.
CO4	Explain the data analysis and knowledge delivery stages.
CO5	Apply business intelligence methods to various situations.
CO6	Decide on appropriate technique.

Unit-1

Business Intelligence:Effective and timely decisions – Data, information and knowledge – Role of mathematical models – Business intelligence architectures: Cycle of a business intelligence analysis – Enabling factors in business intelligence projects – Development of a business intelligence system – Ethics and business intelligence.

Unit - II

Knowledge Delivery:The business intelligence user types, Standard reports, Interactive Analysis and Adhoc Querying, Parameterized Reports and Self-Service Reporting, dimensional analysis, Alerts/Notifications, Visualization: Charts, Graphs, Widgets, Scorecards and Dashboards, Geographic Visualization, Integrated Analytics, Considerations: Optimizing the Presentation for the Right Message.

Unit - III

Efficiency:Efficiency measures – The CCR model: Definition of target objectives- Peer groups – Identification of good operating practices; cross efficiency analysis – virtual inputs and outputs – Other models. Pattern matching – cluster analysis, outlier analysis

Unit - IV

Business Intelligence Applications:Marketing models – Logistic and Production models – Case studies.

Unit-5

Future of Business Intelligence:Future of business intelligence – Emerging Technologies, Machine Learning, Predicting the Future, BI Search & Text Analytics – Advanced Visualization – Rich Report, Future beyond Technology.

Semester	19IINFE88: Distributed and Parallel Computing	L	T	P	C
		3	0	0	3

Learning Objective (LO)

LO1	To learn core ideas behind parallel and distributed computing.
LO2	To explore the methodologies adopted for concurrent and distributed environment.
LO3	To understand the networking aspects of parallel and distributed computing.
LO4	To provide an overview of the computational aspects of parallel and distributed computing.
LO5	To learn parallel and distributed computing models.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Explore the methodologies adopted for concurrent and distributed environment.
CO2	Analyse the networking aspects of Distributed and Parallel Computing.
CO3	Design high performance computing.
CO4	Establish effective communication among the network

Unit - 1

Parallel and Distributed Computing — Introduction- Benefits and Needs- Parallel and Distributed Systems- Programming Environment- Theoretical Foundations- Parallel Algorithms— Introduction- Parallel Models and Algorithms- Sorting- Matrix Multiplication- Convex Hull- Pointer Based Data Structures.

Unit-2

Synchronization: Process Parallel Languages- Architecture of Parallel and Distributed Systems- Consistency and Replication- Security- Parallel Operating Systems.

Unit-3

Management of Resources in Parallel Systems: Tools for Parallel Computing- Parallel Database Systems and Multimedia Object Servers.

Unit-4

Networking Aspects of Distributed and Parallel Computing - Process- Parallel and Distributed Scientific Computing.

Unit-5

High-Performance Computing: Molecular Sciences- Communication- Multimedia Applications for Parallel and Distributed Systems- Distributed File Systems.

Textbook

1. Jacek Błażewicz, et al., "Handbook on parallel and distributed processing", Springer Science & Business Media, (2013).

Semester	19IINFE89: Object Oriented System Development	L	T	P	C
		3	0	0	3

Learning Objective (LO)

LO1	Introduce the concept of Object-oriented design and understand the fundamentals of OOSD life cycle.
------------	---

LO2	Familiar with evolution of object-oriented model, classes and its notations
LO3	Practice UML in order to express the design of software projects.
LO4	Specify, analyze and design the use case driven requirements for a particular system.
LO5	Enrich knowledge about DBMS, designing classes and object oriented testing

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Show how the object-oriented approach differs from the traditional approach to systems analysis and design.
CO2	Analyze, design, document the requirements through use case driven approach
CO3	Explain the importance of modeling and how the Unified Modeling Language (UML) represents an object-oriented system using a number of modeling views.
CO4	Recognize the difference between various object relationships: inheritance, association and aggregation.
CO5	Show the role and function of test cases, testing strategies and test plans in developing object-oriented software.

Unit-1

Fundamentals of OOSD - Overview of Object Oriented Systems Development : Two orthogonal views of the software - OOSD methodology - Why an object orientation. Object basics: Object Oriented Philosophy- Objects – Attributes – Object respond to messages – Encapsulation and information hiding – class hierarchy – Polymorphism – Object relationship and associations. OOSD life cycle : Software development process – OOSD Use case Driven Approach – Reusability.

Unit-2

Methodology, Modeling and UML - Object Oriented Methodologies: Rumbaugh et al.'s object modeling technique – The Booch methodology – The Jacobson et al. methodology – Patterns – Frameworks - The Unified approach. Unified Modeling Language : Static and dynamic models – Why modeling - UML diagrams – UML class diagram – Use case diagram - UML dynamic modeling – packages and model organization.

Unit-3

Object Oriented Analysis - Object Oriented Analysis process: Business Object Analysis - Use case driven object oriented analysis – Business process modeling – Use-Case model – Developing effective documentation . Classification: Classifications theory – Approaches for identifying classes – Noun phrase approach – Common class patterns approach – Use-Case

Driven approach – Classes, Responsibilities, and Collaborators - Naming classes. Identifying object relationships, attributes, and methods : Association – Super-Sub class relationship – Aggregation – Class responsibility – Object responsibility.

Unit-4

Object Oriented Design - Object Oriented Design Process and Design Axioms - OOD process- OOD axioms – Corollaries – Design patterns. Designing classes : Designing classes – Class visibility – Refining attributes – Designing methods and protocols – Packages and managing classes. Access layer: Object Store and persistence – DBMS – Logical and physical Database Organization and access control – Distributed Databases and Client Server Computing — Multidatabase Systems – Designing Access layer classes. View Layer : Designing view layer classes – Macro level process – Micro level process – The purpose of view layer interface – Prototyping the user interface.

Unit-5

Software Quality - Software Quality Assurance : Quality assurance tests – Testing strategies – Impact of Object Orientation on Testing - Test Cases- Test Plan – Continuous testing. System Usability and Measuring User satisfaction: Usability Testing – User satisfaction test – A tool for analyzing user satisfaction. System Usability and Measuring User satisfaction : Introduction – Usability Testing.

Text Book

Semester	19IINFE96: Dot NET Programming	L	T	P	C
		3	0	0	3

Learning Objective (LO)

LO1	To explore the backbone of web page creation by developing .NET skill.
LO2	To Familiar with Application, session and view state management
LO3	To Provide depth knowledge about ADO.NET.
LO4	To Understand the need of usability, evaluation methods for web services
LO5	To acquire knowledge on the usage of recent platforms in developing web applications

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Learn major programming paradigms and techniques involved in design and implementation of modern programming languages.
CO2	Learn about Microsoft .NET framework
CO3	By the end students can develop, implement and creating Applications with C#. VB.NET and ASP.NET
CO4	Creating ASP.Net applications using standard .net controls.
CO5	An ability to use current techniques, skills, and tools necessary for computing practice

Unit-1 - The .NET Framework - Learning the .NET languages - Introduction - Net revolution - .Net framework and its architecture – CLR – What is Assembly – Components of Assembly – DLL hell and Assembly Versioning- O Objects and Namespaces - Setting Up ASP.NET and IIS

Unit-2 - Developing VB.NET Applications - Introduction to VB.Net, The .Net Framework and Common language runtime, Building VB. Net Application, VB IDE, forms, properties, events, VB language-console application and windows application, data type, declaring variable, scope of variable, operators and statements - Windows Applications-forms, adding controls to forms, handling events, MsgBox, Input Box, multiple forms, handling mouse and Keyboard events, object oriented programming creating and using classes and objects, Handling Exceptions- on Error Goto

Unit-3 - Developin - ASP.NET Applications - ASP.NET Applications – Understanding ASP.NET Controls - Overview of ASP.NET framework, Web Form fundamentals - Web control classes – Using Visual Studio.NET - Validation and Rich Controls -State management – Tracing, Logging, and Error Handling.

Unit-4 - Developing C#.NET Applications - Introducing C# - overview of C# - Literals, Variables- Data Types, -Operators, -checked and unchecked operators – Expressions – Branching -Looping-*Object Oriented Aspects Of C#*: Class – Objects - Constructors and its types- inheritance, properties, indexers, index overloading – polymorphism - sealed class and methods - interface, - abstract class, operator overloading, - delegates, events, errors and exception - Threading.

Unit-5 - ADO.NET - Overview of ADO.NET - ADO.NET data access – Connected and Disconnected Database, Create Connection using ADO.NET Object Model, Connection Class, Command Class Data binding – Data list – Data grid – Repeater – Files, Streams and Email – Using XML.

Semester	19IINFE97: Wireless Networks	L	T	P	C
		3	0	0	3

Learning Objective (LO)

LO1	To Study about Wireless Networks, Protocol Stack and Standards.
LO2	To Study about Fundamentals of 3G Services, Its Protocols and Applications.
LO3	To Study about Evolution of 4G Networks, its Architecture and Applications.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Conversant With The Latest 3G/4G And WiMAX Networks And Its Architecture.
CO2	Design and Implement Wireless Network Environment For Any Application Using Latest Wireless Protocols And Standards.
CO3	Implement Different Type of Applications For Smart Phones And Mobile Devices With Latest Network Strategies.

Unit-1

Wireless LAN - Introduction-WLAN Technologies: Infrared, UHF Narrowband, Spread Spectrum -IEEE802.11: System Architecture, Protocol Architecture, Physical Layer, MAC Layer, 802.11b, 802.11a – Hiper LAN: WATM, BRAN, HiperLAN2 – Bluetooth: Architecture, Radio Layer, Baseband Layer, Link Manager Protocol, Security – IEEE802.16-WIMAX: Physical Layer, MAC, Spectrum Allocation For WIMAX

Unit-2

Mobile Network Layer - Introduction – Mobile IP: IP Packet Delivery, Agent Discovery, Tunneling And Encapsulation, IPV6-Network Layer In The Internet- Mobile IP Session Initiation Protocol – Mobile Ad-Hoc Network: Routing, Destination Sequence Distance Vector, Dynamic Source Routing.

Unit-3

Mobile Transport Layer - TCP Enhancements For Wireless Protocols – Traditional TCP: Congestion Control, Fast Retransmit/Fast Recovery, Implications Of Mobility – Classical TCP Improvements: Indirect TCP, Snooping TCP, Mobile TCP, Time Out Freezing, Selective Retransmission, Transaction Oriented TCP – TCP Over 3G Wireless Networks.

Unit-4

Wireless Wide Area Network - Overview Of UTMS Terrestrial Radio Access Network-UMTS Core Network Architecture: 3G-MSC, 3G-SGSN, 3G-GGSN, SMS-GMSC/SMS-IW MSC, Firewall, DNS/DHCP-High Speed Downlink Packet Access (HSDPA)- LTE Network Architecture And Protocol.

Unit-5

4G Networks - Introduction – 4G Vision – 4G Features And Challenges – Applications Of 4G – 4G Technologies: Multicarrier Modulation, Smart Antenna Techniques, OFDM-MIMO Systems, Adaptive Modulation And Coding With Time Slot Scheduler, Cognitive Radio.

Text Books

Semester		L	T	P	C
19IINFE98: Advanced Data Structure and Algorithm		3	0	0	3

Learning Objective (LO)

LO1	To teach efficient storage mechanisms of data for an easy access.
------------	---

LO2	To design and implementation of various basic and advanced data structures.
LO3	To introduce various techniques for representation of the data in the real world.
LO4	To develop application using data structures.
LO5	To teach the concept of protection and management of data.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Appropriate data structure as applied to specified problem definition.
CO2	Handle operations like searching, insertion, deletion, traversing mechanism etc. on various data structures.
CO3	Apply concepts learned in various domains like DBMS, compiler construction etc.
CO4	Analyse the data structures and their implementation algorithms

Unit-1

Elementary Data Structures - Stacks and Queues - Linked Lists - Implementing pointers and objects - Hash tables - Direct-address tables - Hash functions - Open addressing - Perfect hashing - Binary search trees - Querying binary search trees - Insertion and deletion - Red-Black trees -Properties - Rotations - Insertion - Deletion.

Unit-2

The Role of algorithm in computing - Analyzing algorithm - Designing algorithm – Divide and Conquer - Maximum-sub array problem - Analyzing the divide-and-conquer algorithm - Strassen’s algorithm for matrix multiplication - Substitution method for solving recurrences.

Unit-3

Sorting and order statistics - Heap sort - Maintaining the heap priority - Building a heap - Heap sort algorithm - Priority queues - Quick sort - Description of quick sort - Performance of quick sort - A randomized version of quick sort - Analysis of quick sort - Sorting in Linear Time – Lower bounds for sorting - Radix sort - Medians and order statistics - Minimum and Maximum

Unit-4

Advanced Design and Analysis Techniques - Dynamic Programming - Rod cutting - Elements of dynamic programming - Optimal binary search trees - Greedy algorithms - An activity- selection algorithm - Elements of greedy strategy – Huffman codes - Graph Algorithms – Elementary Graph algorithms – Minimum spanning trees - Single source shortest path – All Pairs shortest path .

Unit-5

Advanced Data Structures - B- trees - Definition - Basic Operations on B-trees – Deleting a key from B-tree - Fibonacci heaps - Structure of Fibonacci heap - Data structure for disjoint sets - Disjoint set operations - Linked list representation of disjoint sets.

NP-Completeness –Basic concept of P and NP – NP-Hard Problem – Polynomial type – NP completeness – approximation and algorithm for some NP complete problems.

Text Books

1. Thomas H. Cormen, Charles E. Leiserson, Ronald L. Rivest and Clifford Stein, Introduction to Algorithms, Third Edition, The MIT press, (2009).

Semester	19IINF99: Cyber Security	L	T	P	C
		3	0	0	3

Learning Objective (LO)

LO1	To understand the key terms and concepts in cyber law, intellectual property and cyber-crimes, trademarks and domain theft.
LO2	To acquire knowledge about securing both clean and corrupted systems and protection of personal data and computer networks.
LO3	To understand the fundamentals of cryptography, and some key encryption

	techniques used today.
LO4	To understand the key terms and concepts in cyber law, intellectual property and cyber-crimes, trademarks and domain theft.
LO5	To examine secure software development practices and able to incorporate approaches for risk management and best practices.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Assess cyber security risk management policies in order to adequately protect an organizations critical information and assets.
CO2	Measure the performance of security systems within an enterprise-level information system.
CO3	Troubleshoot, maintain and update an enterprise-level information security system.
CO4	Implement continuous network monitoring and provide real-time security solutions.
CO5	Formulate, update and communicate short- and long-term organizational cyber security strategies and policies.

Unit-1

Introduction to Cyber Security - Introduction -Computer Security - Threats -Harm - Vulnerabilities - Controls - Authentication -Access Control and Cryptography - Web—User Side - Browser Attacks - Web Attacks Targeting Users - Obtaining User or Website Data - Email Attacks.

Unit-2

Risk Management & Planning - Introduction – An overview of Risk Management – Risk Identification – Risk Assessment – Risk control Strategies – Selecting a Risk control Strategy – Quantitative versus qualitative risk control practices - Risk Management Discussion Points – Recommended Risk Control Practices. Planning for Security: Introduction – Information Security Policy, Standards and Practices – The Information Security Blueprint – Security Education, Training and Awareness Program – Continuity Strategies. Security Technology: Firewalls and VPNs: Introduction – Physical Design – Firewalls – Protecting Remote Connections.

Unit-3

Security Technology - INTRUSION DETECTION, ACCESS CONTROL AND OTHER SECURITY TOOLS Introduction – Intrusion Detection and Prevention System (IDS and IPSs) – Honey Pots, Honey Nets and Padded Cell Systems – Scanning and Analysis Tools – Access Control Devices. Cryptography: Introduction – Foundations of Cryptology – Cipher Methods – Cryptographic Algorithms – Cryptographic Tools.

Unit-4

Security Implementation -Physical Security: Introduction – Physical Access Controls – Fire Security and Safety – Failure of Supporting Utilities and Structural Collapse – Interception of Data – Mobile and Portable Systems – Special Considerations for Physical Security Threats. Implementing Information Security: Introduction – Information Security Project Management – Technical Topics of Implementation – Non technical Aspects of Implementation – Information Systems Security Certification and Accreditation.

Unit-5

Information and Human Security- Fundamentals-Employee responsibilities- information classification-Information handling- Tools of information security- Information processing-secure program administration. Organizational and Human Security: Adoption of Information Security Management Standards, Human Factors in Security- Role of information security professionals.

Reference Books

Semester	19IINFEX1: Web Services	L	T	P	C
		3	0	0	3

Learning Objective (LO)

LO1	To enable the student to be familiar with distributed services, XML
------------	---

	and web services
LO2	To study the use of web services in B2C and B2B applications

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Understand the design principles and application of SOAP and REST based web services.
CO2	Design collaborating web services according to a specification.
CO3	Implement an application that uses multiple web services in a realistic business scenario.
CO4	Use industry standard open source tools such as Apache Axis2, Tomcat, Derby and Eclipse to build, test, deploy and execute web services and web applications that consume them.

Unit-1

Overview of Distributed Computing. Introduction to web services – Industry standards, Technologies and concepts underlying web services – their support to web services. Applications that consume web services.

Unit-2

XML – its choice for web services – network protocols to back end databases- technologies – SOAP, WSDL – exchange of information between applications in distributed environment – locating remote web services – its access and usage. UDDI specification – an introduction.

Unit-3

A brief outline of web services – conversation – static and interactive aspects of system interface and its implementation, work flow – orchestration and refinement, transactions, security issues – the common attacks – security attacks facilitated within web services quality of services – Architecting of systems to meet users requirement with respect to latency, performance, reliability, QOS metrics, Mobile and wireless services – energy consumption, network bandwidth utilization, portals and services management.

Unit-4

Building real world enterprise applications using web services – sample source codes to develop web services – steps necessary to build and deploy web services and client applications to meet customer s requirement – Easier development, customization, maintenance, transactional requirements, seamless porting to multiple devices and platforms.

Unit-5

Deployment of Web services and applications onto Tomcat application server and axis SOAP server (both are free wares) – Web services platform as a set of enabling technologies for XML based distributed computing.

Text Books

1. Sandeep Chatterjee, James Webber, "Developing Enterprise Web Services : An Architects Guide , Prentice Hall, Nov (2003).
2. Heather Williamson, "XML: The Complete Reference ", Tata McGraw-Hill Education India.

Semester	19IINFEX2: Web Database and Information System	L	T	P	C
		3	0	0	3

Learning Objective (LO)

LO1	Understand how n-tiered architectures can be used to implement secure, scalable systems
LO2	Design and develop database-driven websites and applications
LO3	Understanding XML as a messaging and data exchange mechanism
LO4	Understand Web "semantic systems," such as auctions, recommendation systems, and search ranking.
LO5	Understand critical components of the modern Web infrastructure: DNS, Content Delivery Networks, etc.

Course Outcomes (CO)

At the end of the course, the student will be able to

CO1	Know the concepts and terminologies related to web analytics.
CO2	Explore various parameters used for web analytics and their impact.
CO3	Explore the use of tools and techniques of web analytics.
CO4	Get experience on websites, web data insights and conversions.

Unit-1

Introduction: Web Overview, Introduction to Apache, MySQL, Networking: TCP/IP, HTTP, Introduction to PHP, Dynamic Page Generation, Sessions and Personalization.

Unit-2

Web Analytics: Basics – Traditional Ways – Expectations – Data Collection – Clickstream Data – Weblogs – Beacons – JavaScript Tags – Packet Sniffing – Outcomes data – Competitive data – Search Engine Data.

Unit-3

Qualitative Analysis: Customer Centricity – Site Visits – Surveys – Questionnaires – Website Surveys – Post visits – Creating and Running- Benefits of surveys – Critical components of successful strategy.

Unit-4

Web Analytic concepts: URLs – Cookies – Time on site – Page views – Understand standard reports – Website content quality – Navigation reports (top pages, top destinations, site overlay). – Search Analytics – Internal search, SEO and PPC – Measuring Email and Multichannel Marketing - Competitive intelligence and Web 2.0 Analytics – Segmentation – Connectable reports.

Unit-5

Goals and Funnels: Filters - Ecommerce Tracking - Real Time Reports - Customer Data Alert - Adwords Linking - Adsense Linking -Attribution Modeling - Segmentation - Campaign Tracking - Multi-Channel Attribution.
